International Trade Statistics Yearbook

Volume I
Trade by Country

United Nations
New York, 2011

DEPARTMENT OF ECONOMIC AND SOCIAL AFFAIRS

The Department of Economic and Social Affairs of the United Nations Secretariat is a vital interface between global policies in the economic, social and environmental spheres and national action. The Department works in three main interlinked areas: (i) it compiles, generates and analyses a wide range of economic, social and environmental data and information on which States Members of the United Nations draw to review common problems and to take stock of policy options; (ii) it facilitates the negotiations of Member States in many intergovernmental bodies on joint courses of action to address ongoing or emerging global challenges; and (iii) it advises interested Governments on the ways and means of translating policy frameworks developed in United Nations conferences and summits into programmes at the country level and, through technical assistance, helps build national capacities.

NOTE

Symbols of United Nations documents are composed of capital letters combined with figures.

The designations employed and the presentation of material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area, or of its authorities, or concerning the delimitation of its frontiers or boundaries.

Where the designation “country or area” appears in this publication, it covers countries, territories, cities or areas. In previous issues of this publication, where the designation “country” appears in the headings of tables, it should be interpreted to cover countries, territories, cities or areas.

In some tables, the designation “developed” economies is intended for statistical convenience and does not necessarily express a judgement about the stage reached by a particular country or area in the development process.

INTRODUCTION

The new yearbook

1. The *2010 International Trade Statistics Yearbook* (2010 ITSY) is being issued in two volumes which are prepared at different points in time during 2011.¹ Volume I is compiled early in 2011 to allow for an advanced release of an overview of international merchandise trade in 2010 and for a much earlier publication of the available 2010 country (area) data. Volume II contains the detailed tables showing international trade in main commodity groups and is finalized approximately six months after the completion of Volume I as the preparation of those tables requires additional country data which, normally, become available later in the year. Volume II contains also updated versions of the two world trade tables published in Volume I.
2. Detailed data for a total of 175 countries (or areas) are shown in Volume I with the 2010 data on imports and exports by commodity and trading partner provided for 93 countries (areas), representing approximately 74% of world trade of 2010. All tables of Volume I are made available electronically shortly after the completion of the manuscript. Beginning with the 2008 edition Volume I is published in a redesigned format in respect to the presentation of data for individual countries with the aim to provide a more analytical and condensed view of a country's trade performance (country trade profile).
3. The detailed information about the trade of particular countries by commodity and partner (values and quantities) contained in the tables and graphs for individual countries in Volume I and commodities in Volume II are taken from the publicly available database UN Comtrade (<http://comtrade.un.org/db/default.aspx>). Users are advised to visit UN Comtrade for any additional and more current information as it is continuously updated.

Concepts and definitions of International Merchandise Trade Statistics

4. The statistics in this Yearbook have been compiled by national statistical authorities largely consistent with the United Nations recommended *International Merchandise Trade Statistics, Concepts and Definitions, Revision 2*.² The main elements of the concepts and definitions are:

1. **Coverage:** As a general guideline, it is recommended that international merchandise trade statistics record all goods which add to or subtract from the stock of material resources of a country by entering (imports) or leaving (exports) its economic territory. Goods simply being transported through a country (goods in transit) or temporarily admitted or withdrawn (except for goods for inward or outward processing)

¹ The 2010 ITSY is the fifty-ninth edition of this yearbook.

² Statistical Papers, Series M No. 52, Rev.2, (United Nations publication, Sales No. E.98.XVII.16). At its forty-first session, held from 23 to 26 February 2010, the Statistical Commission adopted the revised recommendations "International merchandise trade statistics: concepts and definitions 2010" (IMTS 2010) which provide very important amendments while retaining the existing conceptual framework (available at: <http://unstats.un.org/unsd/trade/EG-IMTS/EG-IMTS%20web%20announcement.htm>).

do not add to or subtract from the stock of material resources of a country and are not included in the international merchandise trade statistics. The general guidelines serve as a basis for a set of specific recommendations on the inclusion or exclusion of certain categories of goods.

2. Time of recording: Coherence with the System of National Accounts and the Balance of Payments requires that transactions be recorded at the time when the change of ownership takes place. As a general guideline it is recommended that goods be included at the time when they enter or leave the economic territory of a country.

3. Statistical territory: In international merchandise trade statistics the objective is to record goods entering and leaving the economic territory of a country. In practice, what is recorded is goods that enter or leave the statistical territory, which is the territory with respect to which data are being collected. The statistical territory may coincide with the economic territory of a country or with some part of it. It follows that when the statistical territory of a country and its economic territory differ, international merchandise trade statistics do not provide a complete record of inward and outward flows of goods.

4. The trade systems: There are two trade systems in common use by which international merchandise trade statistics are compiled: the general trade system and the special trade system in its strict definition and relaxed definition.

(a) *The general trade system* is in use when the statistical territory of a country coincides with its economic territory. Consequently, under the general trade system, imports include all goods entering the economic territory of a compiling country and exports include all goods leaving the economic territory of a compiling country.

(b) *The special trade system* is in use when the statistical territory comprises only a particular part of the economic territory. *The special trade system (strict definition)* is in use when the statistical territory comprises only the free circulation area, that is, the part within which goods "may be disposed of without customs restriction". Consequently, in such a case, imports include all goods entering the free circulation area of a compiling country, which means cleared through customs for home use, and exports include all goods leaving the free circulation area of a compiling country.

(c) *The special trade system (relaxed definition)* is in use when (a) goods that enter a country for or leave it after inward processing and (b) goods that enter or leave an industrial free zone are also recorded and included in international merchandise trade statistics.

5. Classification: It is recommended that countries use the *Harmonized Commodity Description and Coding System* (HS) for the collection, compilation and dissemination of international merchandise trade statistics as suggested by the Statistical Commission at its twenty-seventh session (22 February to 3 March 1993).³ The

³ See Official Records of the Economic and Social Council, 1993, Supplement No. 6 (E/1993/26), para. 162 (d).

Harmonized System was adopted by the Customs Co-operation Council in June 1983, and the International Convention on the Harmonized System (HS Convention) entered into force on 1 January 1988 (HS 1988).⁴ In accordance with the preamble to the HS Convention, which recognized the importance of ensuring that the HS be kept up to date in the light of changes in technology or in patterns of international trade, the HS is regularly reviewed and revised. The fourth edition, HS 2007 which is a substantial revision from previous versions came into effect 1 January 2007.⁵ The *Standard International Trade Classification (SITC)*⁶ which was in the past used by countries in data compilation and reporting has been recognized for its continued use in analysis.⁷

6. Valuation: At its fifteenth session, in 1953, the Economic and Social Council, taking the view that trade statistics must reflect economic realities, recommended that the Governments of Member States of the United Nations, wherever possible, use transaction values in the compilation of their national statistics of external trade or, when national practices are based on other values, endeavor to provide supplementary statistical data based on transaction values (Economic and Social Council resolution 469 B (XV)). To promote the comparability of international merchandise trade statistics and taking into account the commercial and data reporting practices of the majority of countries, it is recommended that: (a) The statistical value of imported goods be a CIF-type value; (b) The statistical value of exported goods be an FOB-type value. FOB-type values include the transaction value of the goods and the value of services performed to deliver goods to the border of the exporting country. CIF-type values include the transaction value of the goods, the value of services performed to deliver goods to the border of the exporting country and the value of the services performed to deliver the goods from the border of the exporting country to the border of the importing country.

7. Partner country: It is recommended that in the case of imports, the country of origin be recorded; and that in the case of exports, the country of last known destination be recorded. The country of origin of a good (for imports) is determined by rules of origin established by each country. The country of last known destination is the last country - as far as it is known at the time of exportation - to which goods are to be delivered, irrespective of where they have been initially dispatched to and whether or not, on their way to that last country, they are subject to any commercial transactions or other operations which change their legal status.

5. The pages containing the country profiles (part 2 of this publication) indicate the trade system, valuation and partner attribution each country is following. For more detailed information on national practices in the compilation and dissemination of international

merchandise trade data please go to http://unstats.un.org/unsd/tradereport/introduction_MM.asp.

Sources and Presentation

6. Sources: Figures on the total imports and exports of countries (or areas) presented in world table A are mainly taken from *International Financial Statistics* (IFS) published monthly by the International Monetary Fund (IMF) but also from other sources such as national publications and websites and the *United Nations Monthly Bulletin of Statistics Questionnaire* for the following countries: Andorra, Bermuda, Cayman Islands, Cuba, Gibraltar, Montenegro (beginning 2006), Occupied Palestinian Territory, Russian Federation, Serbia and Montenegro (before 2006), Turkmenistan, Turks and Caicos, Tuvalu and Uzbekistan. Estimates for missing data are made in order to arrive to regional totals but are otherwise not shown. The estimation process is automated using quarterly year-on-year growth rates for the extrapolation of missing quarterly data (unless quarterly data can be estimated using available monthly data within the quarter). Regional totals containing estimated data are printed in bold. Estimates are reviewed and adjusted where necessary. Table A shows data as available by end of May 2011.

7. Figures presented in world table D are calculated using UN Comtrade data (see details below). Data for missing reporters are estimated either through the extrapolation of the data of the two adjacent years, or, if this is not possible, through the use of the data reported by the trading partners (so called mirror data). Mirror statistics is also used in case the partner distribution or confidential data make it necessary to adjust the reported data. All estimates are reviewed and adjusted where necessary. Table D uses data as available on UN Comtrade by end of May 2011.

8. The figures in the country tables and graphs of part 2 (country trade profiles) are obtained from data directly submitted by countries to the United Nations Statistics Division (UNSD) or received via international and regional partner organizations such as the Organization for Economic Co-operation and Development (OECD), the Food and Agriculture Organization of the United Nations (FAO), the International Trade Centre (ITC), the Caribbean Community (CARICOM) Secretariat, the Common Market of Eastern and Southern Africa (COMESA), the Economic Community of West African States (ECOWAS) and the UN regional commissions such as the Economic Commission for Latin America and the Caribbean (ECLAC) and the Economic and Social Commission for Western Asia (ESCWA). Data for the European Union (EU-27) is received from the Statistical Office of the European Communities (Eurostat). All data published in the country profiles is available on UN Comtrade (<http://comtrade.un.org/>). Modifications to the received data are only made in the case the provided data is obviously incomplete (in particular in the case of unreported oil exports). Quantity information that is missing or does not comply with the World Customs Organization's recommendations for the quantity unit is estimated (and flagged on UN Comtrade accordingly). For data processed before June 2009 some quantity information that were identified as 'extreme' – meaning far outside a pre-defined 'normal' range were replaced on UN Comtrade with estimates. In this publication some quantity information (in table 3 and 5) is not shown as deemed appropriate. The estimation of quantities is either based on the country's own data or uses so called standard unit values which are derived from the available information for all countries of the previous year. The

country tables and graphs contain data as available on UN Comtrade by end of May 2011.

9. The totals of imports and exports presented in table A on the one hand and table D and the country profiles on the other hand are not necessarily identical as IFS and UN Comtrade are based on different data collection systems with different aims, procedures, timetable and sources for update and maintenance. Nevertheless, discrepancies are in general minor and usually do not affect the overall information provided in these tables. A systematic comparison of the figures from both sources (which includes the description of known and relevant conceptual differences) is available at <http://unstats.un.org/unsd/trade/imts/annual%20totals.htm>. Overall, the discrepancy in the world total or world aggregate of exports in table A and table D is around 0.6 percent or less for all years shown, which is minor, given the differences between the two sources.

10. Currency conversion: For data in this publication, conversion of values from national currencies into United States dollars is done by means of currency conversion factors based on official exchange rates. Values in currencies subject to fluctuation are converted into United States dollars using weighted average exchange rates specially calculated for this purpose. The weighted average exchange rate for a given currency for a given year is the component monthly factors, furnished by the International Monetary Fund in its IFS publication, weighted by the value of the relevant trade in each month; a monthly factor is the exchange rate (or the simple average rate) in effect during that month. These factors are applied to total imports and exports and to the trade in individual commodities with individual countries. The conversion factors applied to the data presented in table A are published quarterly in the *UN Monthly Bulletin of Statistics* (<http://unstats.un.org/unsd/mbs/default.aspx>) and are also available at: <http://unstats.un.org/unsd/trade/imts/analyticaltradetables.htm>. For data published on UN Comtrade the applied conversion factors are available in a country's metadata on UN Comtrade.

11. Classification: Essentially all countries follow the recommendation to report their detailed merchandise trade data according to the Harmonized Commodity Description and Coding System (HS) (see paragraph 5). In order to provide comparable time series data on UN Comtrade for all countries, the data reported in the latest HS classification is converted into earlier versions of the HS and to corresponding or earlier versions of the Standard International Trade Classification (SITC).⁸ Beginning 2007 many countries (or areas) started to compile their trade data according to the 2007 edition of the HS classification⁹ and following the past practices the United Nations Statistics Division (UNSD) developed and implemented the required conversion tables. - The commodities in this publication are mostly presented according to the one-digit sections of SITC, Rev.3¹⁰ as the SITC sections provide a limited set of economically

⁸ Detailed information on the data conversions used for UN Comtrade can be found on the website of the United Nations Statistics Division at:

<http://unstats.un.org/unsd/trade/conversions/HS%20Correlation%20and%20Conversion%20tables.htm>.

⁹ See World Customs Organization, Harmonized Commodity Description and Coding System, Fourth Edition (2007), Brussels 2005.

¹⁰ Standard International Trade Classification, Revision 3, Statistical Papers, Series M No.34/Rev.3, (United Nations publication, Sales No. E.86.XVII.12). SITC, Revision 4 was accepted by the United Nations Statistical Commission at its thirty-seventh session in March 2006 (see Official Records of the Economic and Social Council, 2006, Supplement No. 4, (E/CN.3/2006/32), chapter III, para. 26 (b)). Yet it will require several years until a time series of data according to SITC, Revision 4 will be sufficiently long for publication.

meaningful main categories. In addition, data according to SITC, Rev.3 is available for long time series. In two tables commodities are presented in terms of four-digit headings of the HS, often according to the 2007 version of HS but in many cases also in earlier HS versions.¹¹ The HS headings provide a meaningful description of traded commodities at the detailed (but not too detailed) level and also allow the presentation of quantity information.

12. Period: Generally, data refer to calendar years; however, for those countries which report according to some other reference year, the data are presented in the year which covers the majority of the reference year used by the country. Concerning the data on UN Comtrade the only country for which data is not available by calendar year is Nepal for which the data refers to the fiscal year from mid of July of the previous to mid of July of the current year.

13. Country nomenclature: The naming of countries (or areas) in this publication follows in general the *United Nations Standard Country or Area Codes for Statistical Use*.¹² The names and composition of countries as reporter are changing over time. Also, countries rarely follow the identical nomenclature in the recording of partner information. For example where former geographical entities commonly referred to in national statistics have changed, countries may introduce the corresponding changes in their statistics at different times. In this publication wherever possible parts of the world have been designated by the names they currently bear and the trading partner attribution has been standardized. The following information is relevant for the data presented in this publication:

1. In this publication the data published under the heading China exclude those for Taiwan Province. Figures representing the trade with Taiwan Province, which may have been reported by any reporting country or area, are included in the grouping Asia. For statistical purposes, the data for China do not include those for Hong Kong Special Administrative Region and Macao Special Administrative Region.

2. Beginning 1 January 1997, the overseas departments of France were included in the statistical territory of France for the purposes of international trade statistics. Values on this basis have been provided by France for 1996 also, and values are published on that basis in this publication.

3. Beginning 1 January 1999, Belgium and Luxembourg provide their international trade statistics separately.

4. Beginning 1 January 2000, Botswana, Lesotho, Namibia, South Africa and Swaziland provide their international trade statistics separately. For periods prior to 1 January 2000, unless otherwise indicated, data are shown for the Southern African Customs Union.

¹¹ World Customs Organization, Harmonized Commodity Description and Coding System, Third Edition (2002) (HS 2002); World Customs Organization, Harmonized Commodity Description and Coding System, Second Edition (1996) (HS 1996); World Customs Organization, Harmonized Commodity Description and Coding System (1992) (HS 1992).

¹² Standard Country or Area Codes for Statistical Use, Series M No. 49, Rev.4, (United Nations publication, Sales No. M.98.XVII.9). The latest information is available online at: <http://unstats.un.org/unsd/methods/m49/m49.htm>.

5. On 4 February 2003, the official name of the Federal Republic of Yugoslavia has been changed to Serbia and Montenegro. Data provided for Yugoslavia prior to 1 January 1992 refer to the Socialist Federal Republic of Yugoslavia which was composed of six republics. Data referring to the years 1992 and later are attributed to Bosnia and Herzegovina, Croatia, Serbia and Montenegro, Slovenia and the Former Yugoslav Republic of Macedonia.

6. On 3 June 2006, Serbia and Montenegro formally dissolved into two independent countries: Montenegro and Serbia.

14. Regional groupings: This publication uses the regional groupings of the Millennium Development Goal (MDG) Indicator Database which are shown below (for their composition see table A and <http://unstats.un.org/unsd/mdg/default.aspx>). The category 'Other' applies only to the presentation of data by trading partner and consists of Antarctica, Bunkers, Free Zones, 'Special Categories' (confidential partner) and Areas nes.:

- World
- Developed Countries
 - Asia-Pacific
 - Europe
 - North America
- South-eastern Europe
- Commonwealth of Independent States
 - CIS Europe
 - CIS Asia
- Northern Africa
- Sub-Saharan Africa
- Latin America & the Caribbean
 - Caribbean
 - Latin America
- Eastern Asia
- Southern Asia
- South-eastern Asia
- Western Asia
- Oceania
- Other

15. Aggregations: All regional aggregations are calculated as the sum of their components. This also includes the regional and world totals presented in table A (in bold) which up to the 2007 edition of this yearbook and in the tables currently published in the *United Nations Monthly Bulletin of Statistics* are calculated by subtracting re-exports from the imports and exports.

16. Additional country groupings: The composition of the additional country groupings which are used in world table A is as follows:

ANCOM-Andean Common Market
Bolivia (Plurinational State of), Colombia, Ecuador, Peru and Venezuela (Bolivarian Republic of)

APEC-Asian-Pacific Economic Co-operation

Australia, Brunei Darussalam, Canada, Chile, China, Hong Kong Special Administrative Region of China, Indonesia, Japan, Malaysia, Mexico, New Zealand, Papua New Guinea, Peru, Philippines, Republic of Korea, Russian Federation, Singapore, Taiwan Province of China, Thailand, United States of America and Viet Nam

ASEAN-Association of South-East Asian Nations

Brunei Darussalam, Cambodia, Indonesia, Lao People's Democratic Republic, Malaysia, Myanmar, Philippines, Singapore, Thailand and Viet Nam

CACM-Central American Common Market

Costa Rica, El Salvador, Guatemala, Honduras and Nicaragua

CARICOM-Caribbean Community and Common Market

Antigua and Barbuda, Bahamas (member of the Community only), Barbados, Belize, Dominica, Grenada, Guyana, Haiti, Jamaica, Montserrat, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Suriname, Trinidad and Tobago

COMESA-Common Market for Eastern and Southern Africa

Burundi, Comoros, Democratic Republic of the Congo, Djibouti, Egypt, Eritrea, Ethiopia, Kenya, Libyan Arab Jamahiriya, Madagascar, Malawi, Mauritius, Rwanda, Seychelles, Sudan, Swaziland, Uganda, Zambia and Zimbabwe

ECOWAS - Economic Community of West African States

Benin, Burkina Faso, Cape Verde, Cote d'Ivoire, Gambia, Ghana, Guinea, Guinea-Bissau, Liberia, Mali, Niger, Nigeria, Senegal, Sierra Leone and Togo

EFTA - European Free Trade Association

Iceland, Liechtenstein, Norway and Switzerland

EMCCA – Economic and Monetary Community of Central Africa

Cameroon, Central African Republic, Chad, Congo, Equatorial Guinea and Gabon

EU-27 - European Union 27

Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Spain, Slovakia, Slovenia, Sweden and United Kingdom.

EU-25 - European Union 25

Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain, Sweden and United Kingdom (EU15) plus Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, and Cyprus

LAIA - Latin American Integration Association (formerly Latin American Free Trade Association)

Argentina, Bolivia (Plurinational State of), Brazil, Chile, Colombia, Cuba, Ecuador, Mexico, Paraguay, Peru, Uruguay and Venezuela (Bolivarian Republic of)

LDC - Least developed countries

Afghanistan, Angola, Bangladesh, Benin, Bhutan, Burkina Faso, Burundi, Cambodia, Central African Republic, Chad, Comoros, Democratic Republic of the Congo, Djibouti, Equatorial Guinea, Eritrea, Ethiopia, Gambia, Guinea, Guinea-Bissau, Haiti, Kiribati, Lao People's Democratic Republic, Lesotho, Liberia, Madagascar, Malawi, Maldives, Mali, Mauritania, Mozambique, Myanmar, Nepal, Niger, Rwanda, Samoa, Sao Tome and Principe, Senegal, Sierra Leone, Solomon Islands, Somalia, Sudan, Timor-Leste, Togo, Tuvalu, Uganda, United Republic of Tanzania, Vanuatu, Yemen and Zambia

MERCOSUR-Mercado Comun Sud-Americano

Argentina, Brazil, Paraguay and Uruguay

NAFTA-Northern American Free Trade Area

Canada, Mexico and United States of America

OECD-Organization for Economic Cooperation and Development
Australia, Austria, Belgium, Canada, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Japan, Luxembourg, Mexico, Netherlands, New Zealand, Norway, Poland, Portugal, Republic of Korea, Slovakia, Spain, Sweden, Switzerland, Turkey, United Kingdom and United States of America

OPEC-Organization of Petroleum Exporting Countries
Algeria, Angola, Ecuador, Iran (Islamic Republic of), Iraq, Kuwait, Libyan Arab Jamahiriya, Nigeria, Qatar, Saudi Arabia, United Arab Emirates and Venezuela (Bolivarian Republic of).

Description of world trade tables of part 1 (Tables A and D)

17. Total imports and exports by regions and countries or areas in U.S. dollars (Table A): The total value of world trade reached U.S. dollars 14.9 trillion in 2010, measured in terms of exports valued FOB at the border of the exporting country. This is an increase of 20 percent compared with the previous year during which trade dropped by 23 percent. Table A provides a breakdown of this figure by country (or area) and also shows imports and the trade balance. For example, the biggest exporter in 2010 with exports of U.S. dollar 1,578 billion was China, followed by the United States with U.S. dollar 1,278 billion and Germany with U.S. dollar 1,271 billion. The United States was the biggest importer with imports of U.S. dollar 1,968 billion in 2010 which resulted in a trade deficit of U.S. dollar 690 billion, while Germany and China recorded trade surpluses of U.S. dollar 203 billion and 184 billion respectively.

18. World exports by provenance and destination in U.S. dollars (Table D): This table provides a breakdown of the world exports by regions and countries according to their provenance and destination, for the total of trade but also detailed by individual SITC sections or groupings of sections (the same list as for Table 1 and 2 applies – see para. 22 below). For example, the table shows that in 2010 developed economies of Asia-Pacific, Europe and North America were the destination of 56% of world exports (U.S. dollar 8.3 trillion) and the origin of 54% of world exports (8.0 trillion).¹³

19. For the general note and footnotes, see the end of the tables. A slightly different version of Table A containing quarterly and monthly data is published on a monthly basis as table 34 in the *United Nations Monthly Bulletin of Statistics* (MBS).¹⁴ Updated, although different versions of Table D, are published as table 40, 41 and 42 in the July, September and November editions of the MBS.

Description of country tables and graphs of part 2

20. Part 2 contains detailed data (the country profile) for individual countries or areas. Given the economic importance of the European Union (EU), separate pages have been added for the external trade of the EU (with its 27 members) as a whole. These pages are given as a memorandum item after the country pages.

¹³ These percentages or shares of world trade are measured based on the trade between countries (or areas) which includes the trade of the countries within one region.

¹⁴ The difference between table A in this publication and table 34 in the MBS relates to the calculation of regional aggregations (see paragraph 15).

21. Not all countries have data up to 2010 and not all countries have data for imports and exports for all years. The publication of a country (or area) in part 2 requires that data for at least up to the year 2006 is available. Depending on the availability of data the following tables and graphs usually appear for each country or area:

22. Exports and Imports by SITC sections (Table 1 and Table 2): These tables show the structure of exports and imports in 2010 (or the latest available year) by SITC sections in terms of value, share of the total, growth in respect to the previous year and annual average growth for the last four years which is calculated as the geometric mean. The description of the SITC sections used in the tables is provided below:¹⁵

SITC sections	Description
0+1	Food, beverages and tobacco
2+4	Crude materials (excluding fuels), oils, fats
3	Mineral fuels, lubricants and related materials
5	Chemicals and related products, n.e.s
6	Manufactured goods classified chiefly by material
7	Machinery and transport equipment
8	Miscellaneous manufactured articles
9	Commodities and transactions not classified elsewhere in SITC

23. Top 10 export and import commodities (Table 3 and Table 5): These tables present the top 10 commodities in terms of 4-digit HS headings for exports and imports, respectively, using the aggregate of trade values for the last three reporting years as available. For countries which reported the last three years of data in HS 2007 the data in these tables is following HS 2007. For most other countries the data in these tables is presented in HS 2002 with data for some years converted from HS 2007 into HS 2002 as required (see paragraph 11). For a few countries the table contains data according to the HS 1996 or even HS 1992. For the convenience of users the last column shows the SITC group (3 digits) that corresponds to the HS heading. The SITC group is identified based on the correlation and conversion tables between HS and SITC, Rev 3. The conversion tables are available on the website of UNSD at <http://unstats.un.org/unsd/trade/methodology%20imts.htm>.

24. For those commodities and those years, the tables contain trade values and unit values. Unit values are expressed in US\$ per indicator of unit (kg, unit, Megawatt-hours (Mwh), pair, litre, carat etc.). The calculation of unit values on the heading level requires the availability of value and quantity information for all of the underlying detailed data (6-digit subheadings). In some cases the quantity information for some sub-headings was estimated (see paragraph 8) and the unit value for the heading appears in italics.

25. Exports by principal countries and SITC sections (Table 4): This table presents the top 10 partners for exports of the latest available year. For each country in the top 10, the table reports

¹⁵ For the purpose of presentation, the section 0 ("Food and live animals") and section 1 ("Beverages and tobacco") have been aggregated into 0+1 named "Food, beverages and tobacco" and section 2 ("Crude materials, inedible, except fuels") and section 4 ("Animal and vegetable soils, fats and waxes") have been aggregated into 2+4 named "Crude materials (excluding fuels), oils, fats".

the value of exports to that country and the structure of those exports according to SITC sections. For the definition of SITC sections used in this table, see paragraph 22 above.

26. Total imports, exports and trade balance (Graph 1): This graph presents the evolution of imports, exports and trade balance over the last fifteen years.

27. Trade balance by MDG Regions (Graph 2): This graph presents for the most recent year for which information on exports and imports is available the trade balance by regions according to the regions used in the Millennium Development Goal (MDG) Indicator Database (see paragraph 14 above).

28. Partner concentration of trade (Graph 3): This graph shows the partner concentration of imports and exports for the latest available year for the top 25 partners which usually account for a very large share of exports or imports in most countries. On the horizontal axis from the center to the right are the cumulative percent of exports and from the center to the left the cumulative percent of imports. On the vertical axis is the cumulative number of partners ranked by total value of exports and imports in a decreasing order.

29. Graph 3 shows as additional information the Herfindahl-Hirschman (HH) Index for imports and exports, which is a measure of concentration. In the case of exports (imports), the HH index is the sum of squares of the percentages of the partner's share of total exports (imports):

$$HH\ Index = \sum_{i=1}^n \left(\frac{X_i}{X} \right)^2$$

30. N is the number of trading partners for exports (imports) and X_i is the value of exports (imports) to partner country i and X is the total value of exports (imports). The lower the HH index, the lower the partner concentration, and vice versa. If there is only one trading partner the HH index would equal 1.¹⁶

¹⁶ Users might wish to define a specific limit of the HH index to indicate low concentration and a limit to indicate high concentration. Yet, for its application in the measurement of partner concentration in international merchandise trade statistics no such boundaries are known to be established.

Abbreviations and Explanation of symbols

Names of some countries (or areas) or groups of countries (or areas) and of some commodities or groups of commodities have been abbreviated. Exact titles of countries or commodities can be found in various editions of the following publications referred to in the introduction (see paragraphs 11 and 13):

- (i) Standard Country or Area Codes for Statistical Use
- (ii) Standard International Trade Classification (SITC)
- (iii) Harmonized Commodity Description and Coding System (HS)

In addition, the following abbreviations and symbols are used in this publication:

Not available	(na)
Not available	blank
Not available
Not applicable	—
Not applicable
Magnitude of less than half the unit used	0 or 0.0
Thousand	thsd
Million	mln
Billion	bln
Weight (kilograms)	kg
Megawatt-hours	Mwh
Average	Avg.
Not elsewhere specified	nes
U.S. dollar	US\$
Imports	Imp
Exports	Exp
Balance	Bal
General trade system	G
Special trade system	S
Cost, insurance and freight	CIF
Free on board	FOB

Disclaimer

The tables, graphs and text contained in part 2 of this publication are provided only for illustration and despite all efforts might contain errors. When using this data users are advised to verify the latest information on UN Comtrade which is the source of this data.

UN Comtrade Subscription information

UN Comtrade is (with the exception of table A) the source of the data in this Volume I of the 2010 ITSY. UN Comtrade is available at <http://comtrade.un.org/>. All data can be viewed and up to 50,000 records per query can be downloaded for free. The use of additional features requires a subscription – for rates and subscription go to <https://unp.un.org/comtrade.aspx>.

Total imports and exports by regions and countries or areas (Table A)

Imports CIF, exports FOB and balance: million U.S. dollars

Importations et exportations totales par régions et pays ou zones (Tableau A)

Importations CIF, exportations FOB, et balance: en millions de dollars E.-U.

General note:

Table A is based on data as available at the end of May 2011. An updated version of this table will be published in Volume II of the 2010 ITSY which will be produced later this year. The totals of imports and exports presented in world trade table A and D are not necessarily identical as table A is mainly based on data of the IMF's International Financial Statistics (IFS) which is a different data collection system with different aims, procedures, timetable and sources for update and maintenance than UN Comtrade on which table D is based (see the introduction for details). Nevertheless, discrepancies between both tables are in general minor and usually do not affect the overall information provided. A systematic comparison of the figures from both sources (which includes the description of known and relevant conceptual differences) is available at <http://unstats.un.org/unsd/trade/imts/annual%20totals.htm>. Overall, the discrepancies in the world total or world aggregate of exports in table A and table D is around 0.6 percent or less for all years shown, which is minor, given the differences between the two sources. Column "G/S" indicates the trade system: G = General Trade System; S = Special Trade System. For further information on sources and presentation of table A as well as for a brief table description please see the introduction, paragraphs 6 - 16 and paragraph 17.

Remarque générale:

Tableau A est basé sur les données telles que disponible en fin Mai 2011. Une version antérieure de ce tableau est publiée dans le volume I de l'annuaire 2010 ITSY qui a été produit plus tôt cette année. Les importations et exportations totales présentées dans les tableaux A et D ne sont pas nécessairement identiques du fait que le tableau A est basé principalement sur les données des Statistiques Financières Internationales (IFS) du FMI qui est un différent système de collecte des données avec des objectifs, des procédures, un calendrier et des sources de mise à jour et de maintenance différents de ceux de UN Comtrade sur lequel le tableau D est basé (voir l'introduction pour les détails). Toutefois, les écarts entre les deux tableaux sont en général mineurs et n'affectent pas substantiellement l'information fournie. Une comparaison systématique des données de ces deux sources (incluant une description des différences conceptuelles pertinentes connues) est disponible à <http://unstats.un.org/unsd/trade/imts/annual%20totals.htm>. En général, la différence entre les totaux des exportations mondiales présentés dans les tableaux A et D est inférieure à 0.6 pour cent pour chacune des années publiées, ce qui est mineur étant donné les différences entre les deux sources.

La colonne "G/S" indique le système commercial : G=Système du Commerce Général ; S= Système du Commerce Spécial. Pour plus d'information sur les sources et la présentation du tableau A ainsi qu'une brève description, veuillez vous référer aux paragraphes 6-16 et 17 de l'introduction.

- 1 This classification is intended for statistical convenience and does not, necessarily, express a judgement about the stage reached by a particular country in the development process.
- 2 Developed Economies of America, Europe, and the Asia-Pacific region.
- 3 Imports FOB.
- 4 Including the trade of the U.S. Virgin Islands and Puerto Rico but excluding shipments of merchandise between the United States and its other possessions (Guam and American Samoa). Data include imports and exports of non-monetary gold.
- 5 Beginning 2006, data for Serbia and Montenegro is reported separately.
- 6 Prior to 2008, special trade.
- 7 Imports exclude petroleum imported without stated value. Exports cover domestic exports.
- 8 Exports include gold.
- 9 Trade statistics exclude certain oil and chemical products.
- 10 Export and import values exclude trade in the processing zone.
- 11 Trade data include maquiladoras and exclude goods from customs-bonded warehouses. Total exports include revaluation and exports of silver.
- 12 Exports include petroleum products.
- 13 Excluding military goods, fissionable materials, bunkers, ships, and aircraft.
- 14 Year ending 20 March of the year stated.

- 1 Cette classification est utilisée pour plus de commodité dans la présentation des statistiques et n'implique pas nécessairement un jugement quant au stade de développement auquel est parvenu un pays donné.
- 2 Économies développées de l'Amérique, de l'Europe, et de la région Asie-Pacifique.
- 3 Importations FOB.
- 4 Y compris le commerce des Îles Vierges américaines et de Porto Rico mais non compris les échanges de marchandise, entre les États-Unis et leurs autres possessions (Guam et Samoa américaines). Les données comprennent les importations et exportations d'or non-monnaire.
- 5 Depuis début 2006, les données relatives à la Serbie et au Montenegro sont déclarées séparément.
- 6 Avant 2008, commerce spécial.
- 7 Non compris le pétrole brute dont la valeur des importations ne sont pas stipulée. Les exportations sont les exportations d'intérieur.
- 8 Les exportations comprennent l'or.
- 9 Les statistiques commerciales font exclusion de certains produits pétroliers et chimiques.
- 10 Les valeurs à l'exportation et à l'importation excluent le commerce de la zone de transformation.
- 11 Les statistiques du commerce extérieur comprennent maquiladoras et ne comprennent pas les marchandises provenant des entrepôts en douane. Les exportations comprennent la réévaluation et les données sur les exportations d'argent.
- 12 Exportations comprennent produits pétroliers.
- 13 À l'exclusion des marchandises militaires, des matières fissibles, des soutes, des bateaux, et de l'avion.
- 14 Année finissant le 20 mars de l'année indiquée.

Total imports and exports by regions and countries or areas (Table A)

Imports CIF, exports FOB and balance: million U.S. dollars

Importations et exportations totales par régions et pays ou zones (Tableau A)

Importations CIF, exportations FOB et balance: en millions de dollars E.-U.

World exports by provenance and destination (Table D) Exportations mondiales en provenance et de destination (Tableau D)

General note:

Table D is based on data of UN Comtrade at the end of May 2011. An updated and more detailed version of this table will be published in Volume II of the 2010 ITSY which will be produced later this year. The totals of imports and exports presented in table A and D are not necessarily identical as table A is mainly based on the data of the IMF's International Financial Statistics (IFS) which is a different data collection system with different aims, procedures, timetable and sources for update and maintenance than UN Comtrade (see the introduction for details). Nevertheless, discrepancies between both tables are in general minor and usually do not affect the overall information provided. A systematic comparison of the figures from both sources (which includes the description of known and relevant conceptual differences) is available at <http://unstats.un.org/unsd/trade/imits/annual%20totals.htm>. Overall, the discrepancies in the world total or world aggregate of exports in table A and table D is around 0.6 percent or less for all years shown, which is minor, given the differences between the two sources. For further information on sources and presentation of table D as well as for a brief table description please see the introduction, paragraphs 6 - 16 and paragraph 18.

Footnotes:

- 1 Exports for which country of destination is not available are included in the totals for the 'World' and in region "Others" (see footnote number 3 for further explanation)
- 2 This classification is intended for statistical convenience and does not, necessarily, express a judgment about the stage reached by a particular country in the development process.
- 3 The region "Others" as destination for exports contains the following trading partners: Antarctica, bunkers, free zones, confidential and not elsewhere specified countries.
- 4 2010 data excludes trading partner Belarus.

Remarque générale:

Tableau D est basé sur les données telles que disponible en fin Mai 2011. Une version antérieure de ce tableau est publiée dans le volume I de l'annuaire 2010 ITSY qui a été produit plus tôt cette année. Les importations et exportations totales présentées dans les tableaux A et D ne sont pas nécessairement identiques du fait que le tableau A est basé principalement sur les données des Statistiques Financières Internationales (IFS) du FMI qui est un différent système de collecte des données avec des objectifs, des procédures, un calendrier et des sources de mise à jour et de maintenance différents de ceux de UN Comtrade sur lequel le tableau D est basé (voir l'introduction pour les détails). Toutefois, les écarts entre les deux tableaux sont en général mineurs et n'affectent pas substantiellement l'information fournie. Une comparaison systématique des données de ces deux sources (incluant une description des différences conceptuelles pertinentes connues) est disponible à <http://unstats.un.org/unsd/trade/imits/annual%20totals.htm>. En général, la différence entre les totaux des exportations mondiales présentés dans les tableaux A et D est inférieure à 0.6 pour cent pour chacune des années publiées, ce qui est mineur étant donné les différences entre les deux sources. Pour plus d'information sur les sources et la présentation du tableau D ainsi qu'une brève description, veuillez vous référer aux paragraphes 6-16 et 18 de l'introduction.

- 1 Exportations dont les pays de destination n'est pas disponible sont incluses dans les totaux pour le 'Monde' et dans la région "les autres" (voir note n° 3 pour plus d'explications)
- 2 Cette classification est utilisée pour plus de commodité dans la présentation des statistiques et n'implique pas nécessairement un jugement quant au stade de développement auquel est parvenu un pays donné.
- 3 La région "Autres" comme destination des exportations comprend les partenaires commerciaux suivants: Antarctique, combustibles de soute, zones franches, partenaires confidentiels ou non spécifiés ailleurs
- 4 Données de 2010 exclut partenaire commercial du Bélarus.

2010
INTERNATIONAL TRADE
STATISTICS YEARBOOK

VOLUME I
TRADE BY COUNTRY

PART 2 – COUNTRY TRADE PROFILES

174 Countries (or areas)

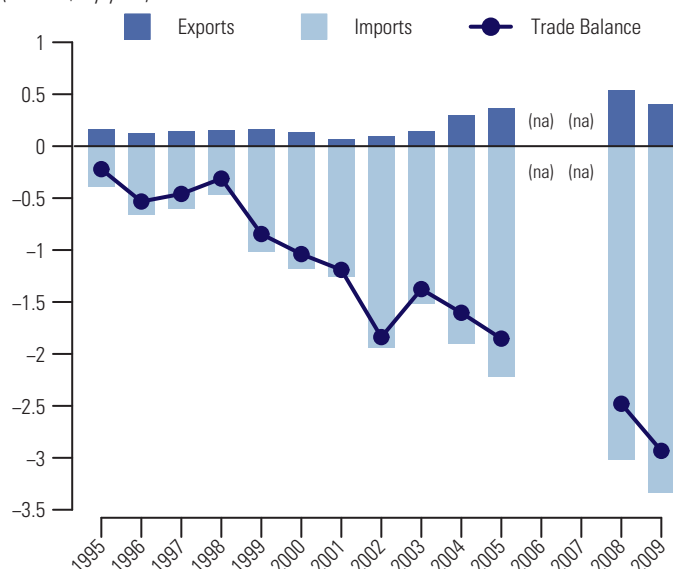

European Union (EU-27)

Overview:

From 2005 to 2009, the value of exports of Afghanistan increased on average by 2.5 percent each year despite a drop of 25.3 percent in 2009 and amounted to 403.4 mln US\$ (see table 1 and graph 1). During the same period, imports increased on average by 10.7 percent each year and amounted to 3.3 bln US\$ (see table 2 and graph 1). This resulted in a trade deficit of 2.9 bln US\$ in 2009 (see graph 1). By MDG regions, large deficits were recorded with the Commonwealth of Independent States (-1.5 bln US\$) and Eastern Asia (-415.9 mln US\$). Trade was also in deficit with Developed Asia-Pacific (-337.3 mln US\$) and Southern Asia (-283.1 mln US\$) (see graph 2). Afghanistan's imports were more diversified across partners than exports: 8 (respectively 4) major partners accounted for 80 percent of imports (respectively exports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2009, Afghanistan's exports were composed of 51.1 percent of food, live animals, beverages and tobacco (SITC sections 0+1) and 19.6 percent of commodities and transactions not classified elsewhere (SITC section 9) (see table 1). Top partners for exports were Pakistan, India and Iran (see table 4). In 2009, Afghanistan's top products for exports were other nuts, fresh or dried (HS code 0802), carpets and other textile floor coverings, knotted (HS code 5701) and grapes, fresh or dried (HS code 0806) (see table 3).

Imports Profile:

In 2009, Afghanistan's imports were composed of 41.2 percent of commodities and transactions not classified elsewhere (SITC section 9), 23.6 percent of mineral fuels, lubricants and related materials (SITC section 3) and 17.0 percent of food, live animals, beverages and tobacco (SITC sections 0+1) (see table 2). Top imported products for the year were peat (including peat litter) (HS code 2703), wheat or meslin flour (HS code 1101) and braids in the piece; ornamental trimmings (HS code 5808) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 1.4 bln US\$ in 2008, the value of Albania's exports dropped by 19.7 percent in 2009 to reach its 2007 level of 1.1 bln US\$ but bounced back in 2010 by 42.5 percent to amount to 1.5 bln US\$ (see table 1 and graph 1). Imports showed a less strong increase of 1.2 percent and amounted to 4.6 bln US\$ in 2010 (see table 2 and graph 1). This resulted in a trade deficit of 3.1 bln US\$ for 2010, compared to 3.5 bln US\$ for the previous year (see graph 1). Trade with Developed Europe accounted for a large part of the 2010 deficit (-1.9 bln US\$) (see graph 2). The trade balance also recorded significant deficits with South-eastern Europe (-288.9 mln US\$) and Eastern Asia (-235.9 mln US\$) among others. Compared to imports, exports were concentrated among a few partners: 6 major partners accounted for 80 percent of exports in 2010 compared to 16 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, miscellaneous manufactured articles (SITC section 8) was the largest commodity group for exports and represented 37.0 percent of exported goods (see table 1). In addition to Italy, other major partners for exports in 2010 included Serbia and Turkey (see table 4). Over the last three years, main commodities for exports were petroleum oils, crude (HS code 2709), parts of footwear (HS code 6406) and men's or boys' suits, ensembles, jackets, blazers, trousers (HS code 6203) (see table 3).

Imports Profile:

In 2010, the majority of imported goods were manufactured goods classified chiefly by material (SITC section 6) and machinery and transport equipment (SITC section 7). They accounted respectively for 24.2 and 19.0 percent of imports (see table 2). Other major commodity groups included food, live animals, beverages and tobacco (SITC sections 0+1) and mineral fuels, lubricants and related materials (SITC section 3). Top products for imports were petroleum oils, other than crude (HS code 2710), electrical energy (HS code 2716) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 79.3 bln US\$ in 2008, the value of Algeria's exports dropped by 43.0 percent in 2009 and amounted to 45.2 bln US\$ (see table 1 and graph 1). Imports showed an overall positive growth over the last five years with an average annual growth of 17.8 percent and amounted to 39.3 bln US\$ in 2009 (see table 2 and graph 1). This resulted in a trade surplus of 5.9 bln US\$ in 2009, down from 39.8 bln US\$ in 2008 (see graph 1). Two MDG regions accounted for this surplus: Developed North America (+10.4 bln US\$) and Developed Europe (+2.4 bln US\$) (see graph 2). Compared to imports, exports were less diversified among partners: in 2009, 9 major partners accounted for 80 percent of exports (compared to 17 major partners for imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2009, Algeria's exports were almost exclusively (98.3 percent) mineral fuels, lubricants and related materials (SITC section 3) (see table 1). Exports of mineral fuels, lubricants and related materials (SITC section 3) dropped by 42.9 percent and amounted to 44.4 bln US\$ in 2009. USA, Italy and Spain, the top three markets for exports in 2009 accounted for 47.5 percent of exports (see table 4). Main products were petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), petroleum gases and other gaseous hydrocarbons (HS code 2711) and petroleum oils, other than crude (HS code 2710) (see table 3).

Imports Profile:

In 2009, machinery and transport equipment (SITC section 7) accounted for 41.2 percent of imported goods (see table 2). Other major commodity groups were manufactured goods classified chiefly by material (SITC section 6) and food, live animals, beverages and tobacco (SITC sections 0+1), respectively with 25.1 percent and 14.8 percent of imports. From 2007 to 2009, top imported products were wheat and meslin (HS code 1001), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and other bars and rods of iron or non-alloy steel (HS code 7214) (see table 5).

Overview:

In 2004, Andorra's exports amounted to 123.2 mln US\$ and imports neared to 1.8 bln US\$ resulting in a trade deficit of 1.6 bln US\$ (see graph 1). This deficit is largely accounted for by trade with Developed Europe (-1.4 bln US\$) (see graph 2). Trade also recorded deficits of 83.6 mln US\$ with Developed Asia-Pacific and 64.4 mln US\$ with Eastern Asia. In 2006, exports were concentrated among a few partners: 2 major partners accounted for 80 percent of exports (see graph 3). In addition, Spain, the top partner for Andorra's exports, was the destination of 69.6 percent of exported goods (see table 4).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

From 2002 to 2006, Andorra's exports increased on average by 23.9 percent each year and amounted to 150.5 mln US\$ in 2006 (see table 1). Three commodity groups accounted for a large part of exports: machinery and transport equipment (SITC section 7), food, live animals, beverages and tobacco (SITC sections 0+1) and miscellaneous manufactured articles (SITC section 8) accounted respectively for 33.8, 33.1 and 18.6 percent of exports. In 2006, exports of food, live animals, beverages and tobacco (SITC sections 0+1) and miscellaneous manufactured articles (SITC section 8) increased respectively by 21.0 and 18.6 percent while exports of machinery and transport equipment (SITC section 7) dropped by 10.2 percent. Major partners for exports included Spain, France and Germany (see table 4). From 2004 to 2006, top exported products included motor cars and other motor vehicles principally designed for the transport (HS code 8703), transmission apparatus for radio-telephony, radio-broadcasting (HS code 8525) and other sugars, including pure lactose, glucose and fructose (HS code 1702) (see table 3).

Imports Profile:

In 2004, Andorra's imports were composed of 29.8 percent of machinery and transport equipment (SITC section 7), 26.1 percent of miscellaneous manufactured articles (SITC section 8) and 17.8 percent of food, live animals, beverages and tobacco (SITC sections 0+1) (see table 2). From 2002 to 2004, major products for imports included motor cars and other motor vehicles principally designed for the transport (HS code 8703), transmission apparatus for radio-telephony, radio-broadcasting (HS code 8525) and petroleum oils, other than crude (HS code 2710) (see table 5).

Overview:

From 2004 to 2008, Anguilla's exports increased on average by 18.9 percent each year and amounted to 11.5 mln US\$ in 2008 (see table 1). Imports increased on average by 27.6 percent each year and reached 271.7 mln US\$ (see table 2). This resulted in a trade deficit of 260.3 mln US\$ (see graph 1). By MDG regions, trade with Developed North America accounted for a large part of this deficit (-165.2 mln US\$) (see graph 2). Significant deficits were also recorded with Latin America and the Caribbean (-69.3 mln US\$) and Developed Europe (-16.3 mln US\$). Anguilla's trade was highly concentrated among a few partners: in 2008, 3 major partners accounted for 80 percent of exports and imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Mln US\$ by year)

Exports Profile:

In 2008, food, live animals, beverages and tobacco (SITC sections 0+1) accounted for 41.5 percent of exported goods (see table 1). Commodities and transactions not classified elsewhere (SITC section 9) and machinery and transport equipment (SITC section 7) accounted respectively for 21.4 and 19.7 percent of exports. Guyana, the major partner for exports, was the destination of 38.3 percent of exports in 2008 (see table 4). Other major markets included Netherlands Antilles and USA. From 2006 to 2008, top exported products were liqueur, spirits and undenatured ethyl alcohol <80% (HS code 2208), solid cane or beet sugar and chemically pure sucrose (HS code 1701) and motor vehicles for transport of persons (except buses) (HS code 8703) (see table 3).

Imports Profile:

In 2008, commodities and transactions not classified elsewhere (SITC section 9) accounted for 27.0 percent of imports (see table 2). Other major commodity groups included manufactured goods classified chiefly by material (SITC section 6) and machinery and transport equipment (SITC section 7), respectively with 18.3 and 16.7 percent of imports. From 2006 to 2008, top imported products included oils petroleum, bituminous, distillates, except crude (HS code 2710), motor vehicles for transport of persons (except buses) (HS code 8703) and aluminium structures, parts nes, for construction (HS code 7610) (see table 5).

Overview:

In 2007, Antigua and Barbuda's exports amounted to 98.6 mln US\$ (see table 1). Imports dropped 14.6 percent and amounted to 573.1 mln US\$ resulting in a trade deficit of 474.4 mln US\$ (see table 2 and graph 1). By MDG regions, trade recorded a deficit amounting to 323.4 mln US\$ with Developed North America (see graph 2). Other deficits were also recorded with Developed Europe (-69.3 mln US\$), Latin America and the Caribbean (-33.1 mln US\$) and Developed Asia-Pacific (-25.9 mln US\$). Antigua and Barbuda's trade was relatively concentrated among a few partners: in 2007, 7 major partners accounted for 80 percent of either exports or imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Mln US\$ by year)

Exports Profile:

In 2007, the majority of exported goods were mineral fuels, lubricants and related materials (SITC section 3), exclusively non crude petroleum oils (see table 1). They accounted for 57.6 percent of exports. Other major commodity groups included machinery and transport equipment (SITC section 7), manufactured goods classified chiefly by material (SITC section 6) and miscellaneous manufactured articles (SITC section 8) respectively with 20.0, 9.5 and 8.6 percent of exports. In 2007, major destinations for exports included Netherlands Antilles, USA and Barbados (see table 4). From 2005 to 2007, top three exported products were oils petroleum, bituminous, distillates, except crude (HS code 2710), yachts, pleasure, sports vessels, rowing boats, canoes (HS code 8903) and radio, radio-telephony receivers (HS code 8527) (see table 3).

Imports Profile:

In 2007, Antigua and Barbuda's imports were composed of 28.5 percent of machinery and transport equipment (SITC section 7) and 19.8 percent of food, live animals, beverages and tobacco (SITC sections 0+1) (see table 2). Imports of miscellaneous manufactured articles (SITC section 8) increased 98.7 percent and represented 18.6 percent of imported goods in 2007. From 2005 to 2007, top imported products included oils petroleum, bituminous, distillates, except crude (HS code 2710), motor vehicles for transport of persons (except buses) (HS code 8703) and waters, non-alcoholic sweetened or flavoured beverages (HS code 2202) (see table 5).

Overview:

From 2005 to 2009, Argentina's exports increased on average by 8.5 percent each year despite a decline of 20.5 percent in 2009 and amounted to 55.7 bln US\$ (see table 1 and graph 1). During the same period, imports also increased on average by 8.9 percent each year to 40.3 bln US\$ (see table 2 and graph 1). This resulted in a trade surplus amounting to 15.4 bln US\$ in 2009 (see graph 1). Trade recorded surpluses with most MDG regions (see graph 2). The largest surplus was recorded with Latin America and the Caribbean (+8.0 bln US\$). Significant surpluses were recorded with Developed Europe (+4.0 bln US\$) and Western Asia (+1.7 bln US\$) among others. Trade with Eastern Asia and Developed North America recorded deficits amounting respectively to 1.8 and 1.5 bln US\$. Compared to imports, exports were diversified among partners: 26 major partners accounted for 80 percent of exports compared to 13 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2009, food, live animals, beverages and tobacco (SITC sections 0+1) accounted for 38.2 percent of exports (see table 1). Other major commodity groups included inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) and machinery and transport equipment (SITC section 7) respectively with 14.9 and 14.4 percent of exports. Brazil, Chile and USA were the top markets for exports (see table 4). From 2007 to 2009, top exported products were oil-cake and other solid residues (HS code 2304), soya-bean oil and its fractions (HS code 1507) and soya beans, whether or not broken (HS code 1201) (see table 3).

Imports Profile:

Machinery and transport equipment (SITC section 7) accounted for 46.5 percent of imported goods in 2009 (see table 2). Other major commodity groups included chemicals and related products, n.e.s. (SITC section 5) and manufactured goods classified chiefly by material (SITC section 6), respectively with 18.7 and 13.5 percent of imports. From 2007 to 2009, top imported products were motor cars and other motor vehicles principally designed for the transport (HS code 8703), parts and accessories of the motor vehicles of headings 87.01 to 87.05 (HS code 8708) and petroleum oils, other than crude (HS code 2710) (see table 5).

Overview:

After several years of continuous growth marked by a peak in 2007, the value of Armenia's exports dropped by 35.2 percent to 684.0 mln US\$ in 2009 but bounced back in 2010 by 47.9 percent to 1.0 bln US\$ (see table 1 and graph 1). Imports increased by 19.1 percent to 3.8 bln US\$ in 2010 (see table 2 and graph 1). The trade deficit increased from 2.5 bln US\$ in 2009 to 2.8 bln US\$ in 2010 (see graph 1). Trade was in deficit with all MDG regions (see graph 2). The largest deficit was recorded with the Commonwealth of Independent States and amounted to 946.0 mln US\$. Trade with Developed Europe and Eastern Asia recorded deficits of 479.3 and 448.2 mln US\$ respectively. Compared to exports, imports were diversified across partners: 18 major partners accounted for 80 percent of imports compared to 9 major partners for exports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2010, manufactured goods classified chiefly by material (SITC section 6) was the largest commodity group for exports (see table 1) and accounted for 41.8 percent of exports. Exports of this commodity group increased by 37.2 percent and significantly contributed to the increase of 47.9 percent in total exports for the year. Other major commodity groups included inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) and food, live animals, beverages and tobacco (SITC sections 0+1) respectively with 26.2 and 15.5 percent of exports. In addition to Russian Federation, other major markets for exports in 2010 included Bulgaria and Germany (see table 4). The majority of exports to Russian Federation were in food, live animals, beverages and tobacco (SITC sections 0+1) with 68.7 percent. Over the last three years, top products for exports included ferro-alloys (HS code 7202), copper ores and concentrates (HS code 2603) and alcohol of a strength by volume of less than 80 % vol (HS code 2208) (see table 3).

Imports Profile:

Armenia's imports were composed of 22.2 percent of machinery and transport equipment (SITC section 7), 19.2 percent of manufactured goods classified chiefly by material (SITC section 6) and 17.5 percent of mineral fuels, lubricants and related materials (SITC section 3) (see table 2). Over the last three years, the three main products for imports were petroleum oils, other than crude (HS code 2710), petroleum gases and other gaseous hydrocarbons (HS code 2711) and diamonds, whether or not worked, but not mounted or set (HS code 7102) (see table 5).

Overview:

From 2006 to 2010, Aruba's exports increased on average by 3.4 percent each year despite a drop of 9.6 percent in 2010 and amounted to 124.5 mln US\$ (see table 1 and graph 1). During the same period, imports decreased on average by 0.9 percent each year to 1002.9 mln US\$ (see table 2). The trade deficit dropped from 955.8 mln US\$ in 2009 to 878.4 mln US\$ in 2010 (see graph 1). By MDG regions, the largest deficit was recorded with Developed North America and amounted to 504.8 mln US\$ in 2010 (see graph 2). Other major deficits were recorded with Developed Europe (-216.1 mln US\$) and Latin America and the Caribbean (-82.7 mln US\$). In 2010, Aruba's trade was highly concentrated among a few partners. The top 5 partners (respectively top 8 partners) accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, food, live animals, beverages and tobacco (SITC sections 0+1) was the largest commodity group for exports and represented 82.3 percent of exported goods (see table 1). The three largest markets for exported goods were Colombia, Panama and Netherlands Antilles (see table 4). Exports to these countries were chiefly food, live animals, beverages and tobacco (SITC sections 0+1). The top three exported products from 2008 to 2010 were alcohol of a strength by volume of less than 80 % vol (HS code 2208), cigars, cheroots, cigarillos and cigarettes (HS code 2402) and alcohol of a strength by volume of 80% vol or higher (HS code 2207) (see table 3).

Imports Profile:

In 2010, Aruba's imports were composed of 33.6 percent of food, live animals, beverages and tobacco (SITC sections 0+1), 22.9 percent of miscellaneous manufactured articles (SITC section 8) and 19.9 percent of machinery and transport equipment (SITC section 7) (see table 2). From 2008 to 2010, top imported products were alcohol of a strength by volume of less than 80% vol (HS code 2208), cigars, cheroots, cigarillos and cigarettes (HS code 2402) and articles of jewellery and parts thereof, of precious metal (HS code 7113) (see table 5).

Overview:

From 2006 to 2010, Australia's exports increased on average by 13.8 percent each year and amounted to 206.7 bln US\$ in 2010, surpassing its previous level in 2008 after a significant decline in 2009 (see table 1 and graph 1). Imports increased on average by 9.2 percent each year and reached 188.7 bln US\$ (see table 2 and graph 1). This resulted in a trade surplus of 18.0 bln US\$ (see graph 1). By MDG regions, trade with Eastern Asia recorded a surplus of 35.1 bln US\$ in 2010 (see graph 2). Major trade surpluses were also recorded with Developed Asia-Pacific (+22.6 bln US\$) and Southern Asia (+13.8 bln US\$). Deficits were recorded with Developed Europe (-20.0 bln US\$), South-eastern Asia (-17.1 bln US\$) and Developed North America (-13.2 bln US\$). In 2009, Australia's trade was diversified across partners: respectively 11 and 16 major partners accounted for 80 percent of exports and imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

Inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) was the largest commodity group for exports with 32.4 percent of total exports (see table 1). Mineral fuels, lubricants and related materials (SITC section 3) accounted for 28.9 percent and commodities and transactions not classified elsewhere (SITC section 9) accounted for 11.1 percent. China, the top market for Australia's exports, was the destination for 25.3 percent of exports in 2010 (see table 4). Other major partners for exports were Japan and Republic of Korea. Over the last three years, main exported products were coal; briquettes, ovoids and similar solid fuels manufactured from coal (HS code 2701), iron ores and concentrates, including roasted iron pyrites (HS code 2601) and gold (including gold plated with platinum) (HS code 7108) (see table 3).

Imports Profile:

Machinery and transport equipment (SITC section 7) accounted for a large share of imported goods and represented 39.2 percent of total imports in 2010 (see table 2). Other major commodity groups included mineral fuels, lubricants and related materials (SITC section 3) and miscellaneous manufactured articles (SITC section 8). They represented respectively 13.7 and 13.0 percent of imports. In addition to petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), other major products for imports over the last three years included motor cars and other motor vehicles principally designed for the transport (HS code 8703) and petroleum oils, other than crude (HS code 2710) (see table 5).

Overview:

After several years of continuous growth, the value of the Austria's exports dropped by 23.7 percent in 2009 and amounted to 131.4 bln US\$ (see table 1 and graph 1). Imports showed a similar development with a decline of 22.1 percent in 2009 to 136.4 bln US\$ (see table 2 and graph 1). This resulted in a trade deficit of 5.0 bln US\$ in 2009 (see graph 1). Trade with Developed Europe and Eastern Asia recorded deficits respectively of 8.9 and 3.2 bln US\$ in 2009 (see graph 2). Major trade surpluses were recorded with South-eastern Europe and Developed North America (2.5 bln US\$ each). Trade was relatively diversified across partners: in 2009, 17 major partners accounted for 80 percent of exports (see graph 3). However, Germany, the top partner for Austria's exports, was the destination for 31.1 percent of exports (see table 4).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2009, Austria's exports were composed largely of machinery and transport equipment (SITC section 7) and manufactured goods classified chiefly by material (SITC section 6) (see table 1). They represented respectively 37.5 and 21.4 percent of total exports. In addition to Germany, other major markets for exports included Italy and Switzerland (see table 4). Over the last three years, top export commodities were motor cars and other motor vehicles principally designed for the transport (HS code 8703), medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) and parts and accessories of the motor vehicles of headings 87.01 to 87.05 (HS code 8708) (see table 3).

Imports Profile:

By commodity groups, Austria's imports profile in 2009 was similar to the profile for exports: machinery and transport equipment (SITC section 7) accounted for the largest share (32.9 percent) followed by manufactured goods classified chiefly by material (SITC section 6) and miscellaneous manufactured articles (SITC section 8) each with 15.2 percent of total imports (see table 2). Over the last three years, top imported goods were motor cars and other motor vehicles principally designed for the transport (HS code 8703), petroleum oils, other than crude (HS code 2710) and petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 47.8 bln US\$ in 2008, the value of the exports of Azerbaijan contracted sharply by 69.2 percent in 2009 but increased again in 2010 by 44.9 percent to amount to 21.3 bln US\$ (see table 1 and graph 1). The development on the imports side is less pronounced with an increase by 7.8 percent in 2010 to 6.6 bln US\$ (see table 2 and graph 1). The trade surplus went up from 8.6 bln US\$ in 2009 to 14.7 bln US\$ in 2010 (see graph 1). By MDG regions, the largest surplus was recorded with Developed Europe (+8.9 bln US\$) (see graph 2). Other major surpluses were recorded with South-eastern Asia (+2.0 bln US\$) and Developed North America (+1.8 bln US\$). In 2010, imports were more diversified across partners than exports: 15 major partners accounted for 80 percent of imports (compared to 11 major partners for exports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2010, Azerbaijan's exports were almost exclusively (94.5 percent) mineral fuels, lubricants and related materials (SITC section 3) (see table 1). Their exports increased on average by 39.0 percent each year since 2006. Italy, France and Israel were the top three markets for exports in 2010 and accounted for 50.0 percent of exports (see table 4). Main exported products were petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), petroleum oils, other than crude (HS code 2710) and petroleum gases and other gaseous hydrocarbons (HS code 2711) (see table 3).

Imports Profile:

Machinery and transport equipment (SITC section 7) represented nearly half of imported goods (40.7 percent) in 2010 (see table 2). Other major commodity groups included manufactured goods classified chiefly by material (SITC section 6) and food, live animals, beverages and tobacco (SITC sections 0+1) respectively with 21.6 and 17.1 percent of imports. Over the last three years, top imported products were motor cars and other motor vehicles principally designed for the transport (HS code 8703), wheat and meslin (HS code 1001) and cigars, cheroots, cigarillos and cigarettes (HS code 2402) (see table 5).

Overview:

From 2005 to 2009, Bahamas' exports increased on average by 21.2 percent each year and amounted to 584.9 mln US\$ (see table 1). During the same period, imports increased on average by 1.3 percent each year to 2.7 bln US\$ (see table 2). The trade balance recorded a deficit of 2.1 bln US\$ (see graph 1). This deficit was largely accounted for by trade with Developed North America which recorded a deficit of 2.0 bln US\$ (see graph 2). Trade also recorded a deficit of 150.7 mln US\$ with Latin America and the Caribbean. Bahamas' trade was concentrated with few partners: in 2009, 1 single partner accounted for more than 80 percent of imported goods compared to 3 partners for exports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2009, chemicals and related products, n.e.s. (SITC section 5) accounted for 43.0 percent of exported goods (see table 1). Other major commodity groups included mineral fuels, lubricants and related materials (SITC section 3) and machinery and transport equipment (SITC section 7), respectively with 19.2 and 12.7 percent of exported goods. In addition to USA, other major partners for exports included the Netherlands and Canada (see table 4). From 2007 to 2009, top exported commodities included petroleum oils, other than crude (HS code 2710), polymers of styrene, in primary forms (HS code 3903) and heterocyclic compounds with nitrogen hetero-atom(s) only (HS code 2933) (see table 3).

Imports Profile:

Imports were composed of 20.6 percent of mineral fuels, lubricants and related materials (SITC section 3), 19.6 percent of machinery and transport equipment (SITC section 7) and 18.0 percent of food, live animals, beverages and tobacco (SITC sections 0+1) (see table 2). In addition to petroleum oils, other than crude (HS code 2710), other major imported products from 2007 to 2009 were motor cars and other motor vehicles principally designed for the transport (HS code 8703) and other furniture and parts thereof (HS code 9403) (see table 5).

Overview:

Bahrain's trade data for 2010 excluded exports and imports of petroleum oils. Exports amounted to 4.6 bln US\$ in 2010 and imports to 10.1 bln US\$ (see tables 1 and 2). In 2010, trade recorded a deficit of 5.6 bln US\$ (see graph 1). Large deficits were recorded with Latin America and the Caribbean (-1.9 bln US\$), Developed Europe (-1.7 bln US\$) and Eastern Asia (-1.4 bln US\$) (see graph 2). Bahrain's trade was diversified across partners: respectively 13 and 14 major partners accounted for 80 percent of exports and imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

With the exclusion of petroleum oils exports in the 2010 data, manufactured goods classified chiefly by material (SITC section 6) accounted for a large share of Bahrain's exports during the year (46.4 percent) (see table 1). Major trading partners included Saudi Arabia, Qatar and India (see table 4). In 2010, major commodities for exports included iron ores and concentrates, including roasted iron pyrites (HS code 2601), aluminium bars, rods and profiles (HS code 7604) and aluminum plates, sheets and strip, of a thickness exceeding 0.2 mm (HS code 7606) (see table 3).

Imports Profile:

With the exclusion of petroleum oils imports in the 2010 data, major commodity groups included machinery and transport equipment (SITC section 7), inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) and manufactured goods classified chiefly by material (SITC section 6): they accounted respectively for 35.4, 23.7 and 13.2 percent of imported goods. In 2010, top products for imports were iron ores and concentrates, including roasted iron pyrites (HS code 2601), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and artificial corundum, whether or not chemically defined (HS code 2818) (see table 5).

Overview:

From 2003 to 2007, exports of Bangladesh increased on average by 19.7 percent each year and amounted to 13.1 bln US\$ (see table 1). During the same period, imports increased on average by 14.8 percent each year to 17.6 bln US\$ (see table 2). The trade balance recorded a deficit amounting to 4.5 bln US\$ compared to 3.7 bln US\$ in 2003 (see graph 1). Trade recorded surpluses with Developed Europe (+4.9 bln US\$) and Developed North America (+2.8 bln US\$) (see graph 2). Significant deficits were recorded with Eastern Asia (-3.6 bln US\$), South-eastern Asia (-2.4 bln US\$) and Southern Asia (-2.0 bln US\$) among others. Trade, especially imports was diversified across partners: in 2007, 11 (respectively 18) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2007, miscellaneous manufactured articles (SITC section 8) accounted for 73.8 percent of Bangladesh's exports (see table 1). Other major commodity groups for exports were manufactured goods classified chiefly by material (SITC section 6) and food, live animals, beverages and tobacco (SITC sections 0+1) respectively with 10.7 and 6.5 percent of exported goods. Major partners for exports were USA, Germany and United Kingdom (see table 4). From 2005 to 2007, top exported products included men's or boys' suits, ensembles, jackets, blazers, trousers (HS code 6203), t-shirts, singlets and other vests, knitted or crocheted (HS code 6109) and jerseys, pullovers, cardigans, waist-coats and similar articles (HS code 6110) (see table 3).

Imports Profile:

In 2007, Bangladesh's imports were composed of 23.1 percent of machinery and transport equipment (SITC section 7), 19.4 percent of inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) and 16.8 percent of manufactured goods classified chiefly by material (SITC section 6) (see table 2). From 2005 to 2007, top imported products included petroleum oils, other than crude (HS code 2710), cotton, not carded or combed (HS code 5201) and palm oil and its fractions (HS code 1511) (see table 5).

Overview:

Since 2006, Barbados' exports decreased on average by 8.2 percent each year to 313.7 mln US\$ in 2010 (see table 1 and graph 1). During the same period, imports decreased on average by 7.4 percent each year and amounted to 1.2 bln US\$ (see table 2 and graph 1). The trade deficit dropped from 1.2 bln US\$ in 2006 to 0.9 bln US\$ in 2010 (see graph 1). By MDG regions, large deficits were recorded with Developed North America (-491.3 mln US\$) and Developed Europe (131.9 mln US\$) (see graph 2). Trade was relatively diversified across partners: 11 and 12 major partners accounted for 80 percent respectively of exports and imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2010, exports were composed of 28.6 percent of chemicals and related products, n.e.s. (SITC section 5), 28.1 percent of food, live animals, beverages and tobacco (SITC sections 0+1) and 20.7 percent of miscellaneous manufactured articles (SITC section 8) (see table 1). The three largest markets for exported goods were USA, United Kingdom and Trinidad and Tobago (see table 4). From 2008 to 2010, top exported goods included medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004), alcohol of a strength by volume of less than 80 % vol (HS code 2208) and petroleum oils, other than crude (HS code 2710) (see table 3).

Imports Profile:

In 2010, imports of machinery and transport equipment (SITC section 7) decreased by 2.0 percent and accounted for 24.1 percent of imported goods (see table 2). Imports of food, live animals, beverages and tobacco (SITC sections 0+1), on the other hand, increased by 8.6 percent and represented 23.4 percent of imported goods. From 2008 to 2010, top imported products included petroleum oils, other than crude (HS code 2710), medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 32.9 bln US\$ in 2008, the value of the exports of Belarus contracted sharply in 2009 (by 35.3 percent) but bounced back in 2010 by 18.5 percent to amount to 25.2 bln US\$ (see table 1 and graph 1). Imports showed a similar development with an increase by 22.1 percent to 34.9 bln US\$ in 2010 (see table 2 and graph 1). This resulted in a trade deficit of 9.6 bln US\$ in 2010 (see graph 1). This deficit is reflected largely in trade with two MDG regions: Commonwealth of Independent States (-7.0 bln US\$) and Eastern Asia (-1.3 bln US\$) (see graph 2). Trade, however, recorded small surpluses with Southern Asia (+338.1 mln US\$) and South-eastern Asia (+86.0 mln US\$) among others. In 2010, trade, especially imports, was concentrated among a few partners: 8 major partners accounted for 80 percent of imports (compared to 11 major partners for exports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2010, mineral fuels, lubricants and related materials (SITC section 3) was the largest commodity group for exports with 28.1 percent of total exports (see table 1). Other major commodity groups were machinery and transport equipment (SITC section 7) and manufactured goods classified chiefly by material (SITC section 6), respectively with 17.2 and 15.0 percent of exports. The Russian Federation was the top market for Belarus' exports (see table 4). Other major partners for exports were the Netherlands and Ukraine. Over the last three years, top exported products were petroleum oils, other than crude (HS code 2710), mineral or chemical fertilisers, potassic (HS code 3104) and tractors (other than tractors of heading 87.09) (HS code 8701) (see table 3).

Imports Profile:

Similar to exports, mineral fuels, lubricants and related materials (SITC section 3), machinery and transport equipment (SITC section 7) and manufactured goods classified chiefly by material (SITC section 6) were the three largest commodity groups for imports in 2010 (see table 2). They accounted respectively for 34.5, 19.4 and 15.1 percent of imports. In addition to petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), other major products for imports over the last three years included petroleum gases and other gaseous hydrocarbons (HS code 2711) and petroleum oils, other than crude (HS code 2710) (see table 5).

Table 5: Top 10 import commodities 2008 to 2010

Overview:

After several years of continuous growth marked by a peak of 477.2 bln US\$ in 2008, the value of the exports of Belgium contracted sharply in 2009 but bounced back in 2010 by 11.1 percent to amount to 411.1 bln US\$, still well below its 2008 level (see table 1 and graph 1). Imports showed a similar development with an increase of 10.9 percent to 390.1 bln US\$ in 2010. This resulted in a trade surplus of 21.0 bln US\$, slightly higher than the 2009 surplus of 18.2 bln US\$ (see graph 1). This surplus was accounted for largely by trade with Developed Europe: trade with this region recorded a surplus of 27.1 bln US\$ (see graph 2). Large deficits were recorded with Eastern Asia (-6.6 bln US\$), South-eastern Asia (-4.4 bln US\$) and Developed Asia-Pacific (-3.9 bln US\$). In 2010, both exports and imports were diversified across partners: 16 major partners accounted for 80 percent of exports and 14 partners accounted for 80 percent of imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

Chemicals and related products, n.e.s. (SITC section 5), machinery and transport equipment (SITC section 7) and manufactured goods classified chiefly by material (SITC section 6) accounted respectively for 30.5, 20.3 and 17.5 percent of exports in 2010 (see table 1). Germany, France and the Netherlands were the top three partners for exports (see table 4). They accounted jointly for nearly half of exported goods in 2010 (47.1 percent). Over the last three years, the main products for exports were medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and petroleum oils, other than crude (HS code 2710) (see table 3).

Imports Profile:

By commodity groups, Belgium's imports and exports have similar profiles. Chemicals and related products, n.e.s. (SITC section 5), machinery and transport equipment (SITC section 7) and manufactured goods classified chiefly by material (SITC section 6) accounted respectively for 25.4, 23.2 and 14.7 percent of total imports in 2010. The three main products for imports over the last three years were medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709) (see table 5).

Overview:

From 2004 to 2008, Belize's exports increased on average by 8.7 percent each year and amounted to 295.1 mln US\$ in 2008 (see table 1). During the same period, imports increased on average by 12.9 percent each year to 836.5 mln US\$ in 2008 (see table 2). This resulted in a trade deficit of 541.4 mln US\$ in 2008 (see graph 1). By MDG regions, the trade balance recorded a surplus amounting to 29.0 mln US\$ with Developed Europe (see graph 2). Large deficits were recorded with Latin America and the Caribbean (-307.3 mln US\$) and Developed North America (-159.2 mln US\$). Both imports and exports were concentrated among a few partners: 3 (respectively 7) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Mln US\$ by year)

**Exports Profile:**

In 2008, food, live animals, beverages and tobacco (SITC sections 0+1) accounted for the majority of exported goods representing 57.3 percent of total exports (see table 1). Exports of mineral fuels, lubricants and related materials (SITC section 3) increased by 64.0 percent and represented 40.3 percent of exports. Top partners for exports in 2008 were the USA, the United Kingdom and Costa Rica (see table 4). Exports to the United Kingdom were exclusively food, live animals, beverages and tobacco (SITC sections 0+1) while exports to Costa Rica were exclusively mineral fuels, lubricants and related materials (SITC section 3). Top products for exports from 2006 to 2008 included petroleum oils, crude (HS code 2709), fruit juices (including grape must) and vegetable juices (HS code 2009) and cane or beet sugar and pure sucrose, in solid form (HS code 1701) (see table 3).

Imports Profile:

In 2008, Belize's imports were composed of 22.4 percent of commodities and transactions not classified elsewhere (SITC section 9), 21.0 percent of machinery and transport equipment (SITC section 7) and 16.2 percent of mineral fuels, lubricants and related materials (SITC section 3). From 2006 to 2008, major products for imports were petroleum oils, other than crude (HS code 2710), motor vehicles for the transport of goods (HS code 8704) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) (see table 5).

Overview:

From 2002 to 2006, exports of Benin decreased on average by 1.8 percent each year and amounted to 224.6 mln US\$ (see table 1 and graph 1). During the same period, imports increased on average by 8.5 percent each year and reached over 1.0 bln US\$ resulting in a trade deficit of 778.7 mln US\$ (see table 2 and graph 1). Two MDG regions accounted for a large share of this deficit: Developed Europe (-390.2 mln US\$) and Sub-Saharan Africa (-188.1 mln US\$) (see graph 2). In 2006, trade was diversified across partners: 14 major partners accounted for 80 percent of exports and 17 major partners accounted for 80 percent of imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2006, exports of inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) dropped by 36.3 percent and accounted for 53.4 percent of exported goods (see table 1). Exports of food, live animals, beverages and tobacco (SITC sections 0+1) increased by 21.7 percent and accounted for 29.4 percent of exported goods. China, Nigeria and India were the three major partners for exports in 2006 (see table 4). Exports to China were almost exclusively inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) while 80.5 percent of exports to India were food, live animals, beverages and tobacco (SITC sections 0+1). From 2004 to 2006, top exported products were cotton, not carded or combed (HS code 5201), cigars, cigarettes etc, tobacco or tobacco substitute (HS code 2402) and coconuts, Brazil nuts and cashew nuts, fresh or dried (HS code 0801) (see table 3)

Imports Profile:

In 2006, Benin's imports were composed of 27.5 percent of food, live animals, beverages and tobacco (SITC sections 0+1), 21.6 percent of mineral fuels, lubricants and related materials (SITC section 3) and 16.9 percent of manufactured goods classified chiefly by material (SITC section 6) (see table 2). From 2004 to 2006, top imported products included oils petroleum, bituminous, distillates, except crude (HS code 2710), rice (HS code 1006) and electrical energy (HS code 2716) (see table 5).

Overview:

After two years of continuous growth marked by a peak of 674.5 mln US\$ in 2007, the value of Bhutan's exports dropped in 2008 and 2009 to reach 495.8 mln US\$ (see table 1 and graph 1). Imports recorded a peak of 543.3 mln US\$ in 2008 before dropping by 2.6 percent in 2009 to 529.4 mln US\$ (see table 2 and graph 1). The trade balance recorded a deficit of 33.6 mln US\$ in 2009 (see graph 1) with Developed Europe accounting for the majority of the deficit (see graph 2). Trade was also in deficit with South-eastern Asia (-31.6 mln US\$) and Developed Asia-Pacific (-12.0 mln US\$). A trade surplus of 58.9 mln US\$ was recorded with Southern Asia. Trade was concentrated among a few partners: in 2009, 1 major partner accounted for 80 percent of exports compared to 2 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Mln US\$ by year)

Exports Profile:

In 2009, Bhutan's exports were composed largely of mineral fuels, lubricants and related materials (SITC section 3) and manufactured goods classified chiefly by material (SITC section 6) (see table 1). They represented, respectively, 42.5 and 37.1 percent of total exports. India was the destination of 93.5 percent of Bhutan's exports (see table 4). In addition to India, other major markets for exports included Bangladesh and China, Hong Kong SAR (see table 4). From 2007 to 2009, top exported commodities were electrical energy (HS code 2716), ginger, saffron, turmeric (curcuma), thyme and other spices (HS code 0910) and ferro-alloys (HS code 7202) (see table 3).

Imports Profile:

In 2009, imports of machinery and transport equipment (SITC section 7) represented 30.2 percent of imported goods (see table 2). Other major commodity groups included manufactured goods classified chiefly by material (SITC section 6) and mineral fuels, lubricants and related materials (SITC section 3) respectively with 20.3 and 17.5 percent of imports. From 2007 to 2009, top imported products were petroleum oils, other than crude (HS code 2710), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and copper wire (HS code 7408) (see table 5).

Bolivia (Plurinational State of)

Imports: CIF, by origin

Exports: FOB, by last known destination

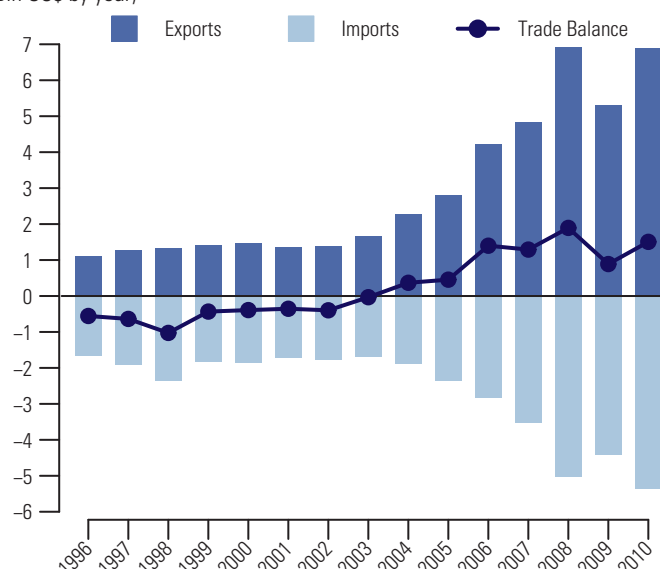

Trade System: Special

Overview:

From 2006 to 2010, the Plurinational State of Bolivia's exports increased on average by 12.9 percent each year and amounted to 6.9 bln US\$ in 2010, reaching its previous level of 2008 after a significant decline in 2009 (see table 1). Imports increased on average by 17.4 percent each year and reached 5.4 bln US\$ (see table 2). This resulted in a trade surplus of 1.5 bln US\$ in 2010 (see graph 1). Trade with Latin America and the Caribbean accounted for a large part of this surplus (+1.1 bln US\$) (see graph 2). Trade also recorded surpluses with Developed Europe (+329.7 mln US\$) and Developed Asia-Pacific (+213.8 mln US\$). Trade was relatively concentrated among a few partners: 8 (respectively 9) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

Mineral fuels, lubricants and related materials (SITC section 3), inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) and food, live animals, beverages and tobacco (SITC sections 0+1) accounted respectively for 43.3, 33.3 and 9.7 percent of exports in 2010 (see table 1). Brazil was the top partner for Bolivia's exports. Other major partners included USA and Argentina (see table 4). From 2008 to 2010, the top three commodities for exports were petroleum gases and other gaseous hydrocarbons (HS code 2711), zinc ores and concentrates (HS code 2608) and precious metal ores and concentrates (HS code 2616) (see table 3).

Imports Profile:

In 2010, imports of machinery and transport equipment (SITC section 7) represented 34.1 percent of imported goods (see table 2). Other major commodity groups included manufactured goods classified chiefly by material (SITC section 6) and chemicals and related products, n.e.s. (SITC section 5) respectively with 19.4 and 17.7 percent of imports. From 2008 to 2010, top imported products were petroleum oils, other than crude (HS code 2710), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and motor vehicles for the transport of goods (HS code 8704) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 5.0 bln US\$ in 2008, the value of exports of Bosnia and Herzegovina dropped by 21.3 percent in 2009 and amounted to 4.0 bln US\$ but bounced back in 2010 by 21.5 percent to amount to 4.8 bln US\$ (see table 1 and graph 1). Imports also showed an increase of 10.3 percent in 2010 and amounted to 9.2 bln US\$ (see table 2 and graph 1). The trade deficit remained at 4.4 bln US\$ (see graph 1). By MDG regions, the largest deficit was recorded with Developed Europe (-2.2 bln US\$) (see graph 2). Significant deficits were also recorded with Commonwealth of Independent States (-803.9 mln US\$), Eastern Asia (-501.1 mln US\$) and Developed North America (-322.9 mln US\$). Compared to imports, exports were concentrated among partners: in 2010, 9 major partners accounted for 80 percent of exports compared to 13 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

Exports of manufactured goods classified chiefly by material (SITC section 6) accounted for 24.8 percent of exported goods in 2010 (see table 1). Other major commodity groups included miscellaneous manufactured articles (SITC section 8) and mineral fuels, lubricants and related materials (SITC section 3) respectively with 20.8 and 15.1 percent of exports. Top partners for exports were Germany, Croatia and Serbia (see table 4). Over the last three years, top products for exports were electrical energy (HS code 2716), unwrought aluminium (HS code 7601) and seats (other than those of heading 94.02) (HS code 9401) (see table 3).

Imports Profile:

In 2010, manufactured goods classified chiefly by material (SITC section 6) and mineral fuels, lubricants and related materials (SITC section 3) accounted respectively for 19.6 and 19.3 percent of imports (see table 2). Other major commodity groups for imports included machinery and transport equipment (SITC section 7) and food, live animals, beverages and tobacco (SITC sections 0+1). From 2008 to 2010, top imported goods were petroleum oils, other than crude (HS code 2710), petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 5.1 bln US\$ in 2007, the value of exports of Botswana contracted sharply in 2009 (by 30.2 percent) but bounced back in 2010 by 35.8 percent to amount to 4.7 bln US\$ (see table 1 and graph 1). During the same period, imports increased on average by 19.6 percent and amounted to 5.7 bln US\$ (see table 2 and graph 1). In 2010, the trade balance recorded a deficit of 963.6 mln US\$ (see graph 1). Trade recorded a surplus of 2.6 bln US\$ with Developed Europe and a deficit of 3.4 bln US\$ with Sub-Saharan Africa (see graph 2). Botswana's trade was highly concentrated among a few partners: in 2010, 4 (respectively 2) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, exports of manufactured goods classified chiefly by material (SITC section 6) represented 69.1 percent of exported goods (see table 1). The United Kingdom, the top partner for exports, accounted for 55.5 percent of exported goods. Other major markets for exports were South Africa and Norway (see table 4). From 2008 to 2010, top exported products were diamonds, not mounted or set (HS code 7102), nickel matte, interim products of nickel metallurgy (HS code 7501) and copper ores and concentrates (HS code 2603) (see table 3).

Imports Profile:

In 2010, manufactured goods classified chiefly by material (SITC section 6) and machinery and transport equipment (SITC section 7) each represented 26.4 percent of imported goods (see table 2). Other major commodity groups included mineral fuels, lubricants and related materials (SITC section 3) and food, live animals, beverages and tobacco (SITC sections 0+1) respectively with 14.6 and 11.8 percent of imports. From 2008 to 2010, top imported products were oils petroleum, bituminous, distillates, except crude (HS code 2710), diamonds, not mounted or set (HS code 7102) and motor vehicles for transport of persons (except buses) (HS code 8703) (see table 5).

Overview:

From 2006 to 2010, Brazil's exports increased on average by 10.0 percent each year and amounted to 201.9 bln US\$ in 2010, following a significant decline in 2009 and surpassing its previous level of 2008 (see table 1 and graph 1). Imports increased on average by 18.8 percent each year and reached 181.6 bln US\$ (see table 2 and graph 1). This resulted in a trade surplus of 20.3 bln US\$ in 2010 (see graph 1). The trade balance recorded a surplus amounting to 16.5 bln US\$ with Latin America and the Caribbean and 4.2 bln US\$ with Western Asia (see graph 2). A deficit of 8.2 bln US\$ was recorded with Developed North America. Brazil's trade was highly diversified across partners: in 2010, 21 major partners accounted for 80 percent of imports and 25 major partners accounted for less than 80 percent of exports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2010, inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) accounted for 26.9 percent of exports (see table 1). Other major commodity groups included food, live animals, beverages and tobacco (SITC sections 0+1) and machinery and transport equipment (SITC section 7): they accounted respectively for 23.8 and 16.6 percent of exports. China, USA and Argentina were the three largest markets for exports (see table 4). The majority of exports to China (75.0 percent) were inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4). Over the last three years, main commodities for exports included iron ores and concentrates (HS code 2601), petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709) and soya beans, whether or not broken (HS code 1201) (see table 3).

Imports Profile:

In 2010, imports of machinery and transport equipment (SITC section 7) represented 39.6 percent of imported goods (see table 2). Other major commodity groups for imports were chemicals and related products, n.e.s. (SITC section 5) and mineral fuels, lubricants and related materials (SITC section 3) respectively with 17.8 and 16.5 percent of imports. The top three commodities for imports over the last three years were petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), petroleum oils, other than crude (HS code 2710) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) (see table 5).

Overview:

From 2002 to 2006, exports of Brunei Darussalam increased on average by 21.0 percent each year and amounted to 7.6 bln US\$ (see table 1 and graph 1). During the same period, imports increased on average by 2.8 percent each year and amounted to 1.7 bln US\$ resulting in a trade surplus of almost 6.0 bln US\$, compared to 3.6 bln US\$ in 2004 (see table 2 and graph 1). Trade with Developed Asia-Pacific recorded a surplus amounting to 3.2 bln US\$ (see graph 2). Large surpluses were recorded with Eastern Asia (+1.1 bln US\$) and South-eastern Asia (+1.1 bln US\$). In 2006, trade was concentrated among a few partners: 5 (respectively 8) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

Mineral fuels, lubricants and related materials (SITC section 3) accounted for 96.3 percent of exported goods (see table 1). From 2002 to 2006, their exports increased on average by 23.7 percent each year. Major markets for exported goods included Japan, Indonesia and Republic of Korea (see table 4). The top exported commodities in 2006, petroleum oils, oils from bituminous minerals, crude (HS code 2709) and petroleum gases and other gaseous hydrocarbons (HS code 2711), accounted respectively for 67.3 and 29.0 percent of exports. Other major commodities for exports were t-shirts, singlets and other vests, knitted or crocheted (HS code 6109) (see table 3).

Imports Profile:

In 2006, imports of Brunei Darussalam were composed of 35.1 percent of machinery and transport equipment (SITC section 7), 24.2 percent of manufactured goods classified chiefly by material (SITC section 6) and 16.6 percent of food, live animals, beverages and tobacco (SITC sections 0+1) (see table 2). Top imported products in 2006 included motor vehicles for transport of persons (except buses) (HS code 8703), parts of aircraft, spacecraft, etc. (HS code 8803) and medicaments, therapeutic, prophylactic use, in dosage (HS code 3004) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 22.5 bln US\$ in 2008, the value of the exports of Bulgaria dropped in 2009 (by 26.6 percent) but increased again in 2010 by 24.9 percent to amount to 20.6 bln US\$, still well below its 2008 level (see table 1 and graph 1). Imports showed a less pronounced development with an increase by 8.7 percent to 25.4 bln US\$ in 2010 (see table 2 and graph 1). The trade deficit decreased from 6.8 bln US\$ in 2009 to 4.8 bln US\$ in 2010 (see graph 1). By MDG regions, large deficits were recorded with Commonwealth of Independent States (-4.2 bln US\$) and Developed Europe (-2.1 bln US\$) (see graph 2). Trade balance recorded a surplus with South-eastern Europe (851.6 mln US\$). Bulgaria's trade was diversified across partners: in 2010, 21 (respectively 16) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2010, exports were composed of 23.0 percent of manufactured goods classified chiefly by material (SITC section 6), 16.5 percent of machinery and transport equipment (SITC section 7) and 14.4 percent of miscellaneous manufactured articles (SITC section 8) (see table 1). Top partners for exports were Germany, Italy and Romania (see table 4). From 2008 to 2010, Bulgaria's top products for exports were petroleum oils, other than crude (HS code 2710), refined copper and copper alloys, unwrought (HS code 7403) and unrefined copper; copper anodes for electrolytic refining (HS code 7402) (see table 3).

Imports Profile:

In 2010, Bulgaria's imports were composed of 22.2 percent of mineral fuels, lubricants and related materials (SITC section 3), 22.0 percent of machinery and transport equipment (SITC section 7) and 16.5 percent of manufactured goods classified chiefly by material (SITC section 6) (see table 2). From 2008 to 2010, top imported products were petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), petroleum gases and other gaseous hydrocarbons (HS code 2711) and petroleum oils, other than crude (HS code 2710) (see table 5).

Overview:

In 2010, exports of Burkina Faso went up by 61.9 percent to amount to 1.3 bln US\$ (see table 1). This is largely due to an increase of 132.7 percent in commodities and transactions not classified elsewhere (SITC section 9) which is essentially exports of gold (including gold plated with platinum) (see tables 1 and 3). Imports increased by 9.5 percent and amounted to 2.0 bln US\$ (see table 2). The trade balance recorded a deficit of 0.8 bln US\$ in 2010, compared to a deficit of 1.1 bln US\$ in 2009 (see graph 1). Trade was in deficit with all MDG regions except Developed Europe (+311.9 mln US\$) (see graph 2). Large deficits were recorded with Sub-Saharan Africa (-379.4 mln US\$), Eastern Asia (-227.7 mln US\$) and Developed North America (-125.4 mln US\$) among others. In 2010, Burkina Faso's trade was concentrated among a few partners: 4 major partners accounted for 80 percent of exports compared to 21 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, majority of Burkina Faso's exports were of commodities and transactions not classified elsewhere (SITC section 9) and inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4), representing 68.6 and 23.9 percent of exports respectively (see table 1). Major destinations for exports were Switzerland, South Africa and Singapore (see table 4). In 2010, gold (including gold plated with platinum) (HS code 7108) accounted for 68.6 percent of exported goods (see table 3). Other major products for exports were cotton, not carded or combed (HS code 5201) and other oil seeds and oleaginous fruits (HS code 1207).

Imports Profile:

In 2010, imports were composed of 22.9 percent of machinery and transport equipment (SITC section 7), 22.0 percent of mineral fuels, lubricants and related materials (SITC section 3) and 18.7 percent of manufactured goods classified chiefly by material (SITC section 6) (see table 2). Top imported products over the period from 2008 to 2010 included petroleum oils, other than crude (HS code 2710), medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) and rice (HS code 1006) (see table 5).

Overview:

After three years of continuously decreasing exports, Burundi's exports increased by 144.0 percent and amounted to 275.5 mln US\$ in 2010 while imports increased by 141.5 percent to 832.5 mln US\$ (see tables 1, 2 and graph 1). The trade balance recorded a deficit of 557.0 mln US\$ in 2010, compared to 231.9 mln US\$ in 2009. By MDG regions, deficits were recorded with Sub-Saharan Africa (-200.2 mln US\$), Eastern Asia (-99.3 mln US\$) and Developed Asia-Pacific (-77.9 mln US\$) (see graph 2). A surplus of 7.3 mln US\$ was recorded with South-eastern Asia. Compared to exports, imports were diversified across partners: in 2010, 11 major partners accounted for 80 percent of imports compared to 7 major partners for exports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Mln US\$ by year)

**Exports Profile:**

In 2010, food, live animals, beverages and tobacco (SITC sections 0+1) was the largest commodity group for exports with 72.3 percent of total exports (see table 1). Other major commodity groups were commodities and transactions not classified elsewhere in the SITC (SITC section 9) and inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4), respectively with 11.2 and 9.1 percent of exports. Exports to Switzerland and United Kingdom, the top markets, were almost exclusively food, live animals, beverages and tobacco (SITC sections 0+1) (see table 4). From 2008 to 2010, the top three commodities for exports were coffee, whether or not roasted or decaffeinated (HS code 0901), gold (including gold plated with platinum) (HS code 7108) and tea, whether or not flavoured (HS code 0902) (see table 3).

Imports Profile:

Burundi's imports in 2010 were composed of 30.0 percent of machinery and transport equipment (SITC section 7), 26.4 percent of manufactured goods classified chiefly by material (SITC section 6) and 17.1 percent of chemicals and related products (SITC section 5) (see table 2). Over the last three years, the top three imported products were medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004), portland cement, aluminous cement, slag cement (HS code 2523) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) (see table 5).

Overview:

From 2004 to 2008, Cambodia's exports increased on average by 11.7 percent each year and amounted to 4.4 bln US\$ (see table 1 and graph 1). During the same period, imports increased on average by 21.0 percent each year to 4.4 bln US\$ (see table 2 and graph 1). The trade balance recorded a deficit amounting to 58.5 mln US\$, compared to a surplus of 734.8 mln US\$ in 2004 (see graph 1). Large surpluses were recorded with Developed North America (+2.0 bln US\$) and Developed Europe (+0.7 bln US\$) (see graph 2). Significant deficits were recorded with South-eastern Asia (-1.4 bln US\$) and Eastern Asia (-1.3 bln US\$). In 2008, trade was concentrated among a few partners: 6 (respectively 7) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

Miscellaneous manufactured articles (SITC section 8) accounted for 92.1 percent of Cambodia's exports in 2008 (see table 1). The USA, the top partner for Cambodia's exports, was the destination of 45.2 percent of exported goods (see table 4). Other major export partners were China, Hong Kong SAR and Canada (see table 4). Top exported products in 2008 included unused postage, revenue or similar stamps of current or new issue (HS code 4907), jerseys, pullovers, cardigans, waist-coats and similar articles (HS code 6110) and women's or girl's suits, ensembles, jackets, blazers, dresses, skirts (HS code 6104) (see table 3).

Imports Profile:

Manufactured goods classified chiefly by material (SITC section 6) accounted for 43.2 percent of imported goods in 2008 (see table 2). Other major commodity groups for imports were machinery and transport equipment (SITC section 7) and miscellaneous manufactured articles (SITC section 8) respectively with 24.4 and 8.7 percent of imports. Top imported products in 2008 included other knitted or crocheted fabric (HS code 6006), other woven fabric of synthetic staple fibres (HS code 5515) and petroleum oils, other than crude (HS code 2710) (see table 5).

Overview:

From 2002 to 2006, exports of Cameroon increased on average by 18.6 percent each year and amounted to 3.6 bln US\$ (see table 1 and graph 1). During the same period, imports increased on average by 14.0 percent each year and amounted to 3.2 bln US\$ (see table 2 and graph 1). In 2006 only, exports increased by 46.5 percent. The trade balance changed from a deficit of 58.8 mln US\$ in 2002 to a surplus of 426.0 mln US\$ in 2006 (see graph 1). By MDG regions, trade recorded a surplus of 1.6 bln US\$ with Developed Europe and a deficit of 816.1 mln US\$ with Sub-Saharan Africa (see graph 2). In 2006, exports were concentrated among a few partners while imports were diversified: 8 major partners accounted for 80 percent of exports compared to 17 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2006, exports of mineral fuels, lubricants and related materials (SITC section 3) increased by 81.9 percent and accounted for 61.6 percent of exported goods (see table 1). Exports of inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) increased by 73.6 percent to account for 16.7 percent of total exports. Food, live animals, beverages and tobacco (SITC sections 0+1) was another major commodity group accounting for 12.0 percent of exports. Spain, Italy and France were the three major exports markets (see table 4). From 2004 to 2006, top exported products included petroleum oils, oils from bituminous minerals, crude (HS code 2709), oils petroleum, bituminous, distillates, except crude (HS code 2710) and cocoa beans, whole or broken, raw or roasted (HS code 1801) (see table 3).

Imports Profile:

In 2006, imports were composed of 32.1 percent of mineral fuels, lubricants and related materials (SITC section 3), 17.1 percent of machinery and transport equipment (SITC section 7) and 16.7 percent of food, live animals, beverages and tobacco (SITC sections 0+1) (see table 2). From 2004 to 2006, top imported products were petroleum oils, oils from bituminous minerals, crude (HS code 2709), rice (HS code 1006) and medicaments, therapeutic, prophylactic use, in dosage (HS code 3004) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 455.6 bln US\$ in 2008, the value of Canada's exports dropped sharply by 30.8 percent in 2009 but bounced back in 2010 by 22.4 percent to amount to 385.8 bln US\$, still well below its 2008 level (see table 1 and graph 1). Imports showed a similar development with an increase of 21.9 percent to 391.3 bln US\$ in 2010 (see table 2 and graph 1). This resulted in a trade deficit of 5.4 bln US\$, slightly lower than the 2009 deficit of 5.8 bln US\$ (see graph 1). This deficit came largely from trade with Eastern Asia (-34.0 bln US\$), Latin America and the Caribbean (-24.8 bln US\$) and Developed Europe (-14.7 bln US\$) (see graph 2). The trade balance also recorded a surplus of 87.9 bln US\$ with Developed North America. In 2010, 3 (respectively 10) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, Canada's exports were composed of 26.2 percent of machinery and transport equipment (SITC section 7) and 23.7 percent of mineral fuels, lubricants and related materials (SITC section 3) (see table 1). In addition to USA, other major partners for exports in 2010 included United Kingdom and China (see table 4). Over the last three years, Canada's major commodities for exports included petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and petroleum gases and other gaseous hydrocarbons (HS code 2711) (see table 3).

Imports Profile:

Machinery and transport equipment (SITC section 7) also accounted for a large part of Canada's imports. In 2010, it represented 41.1 percent of imported goods (see table 2). Other major commodity groups were miscellaneous manufactured articles (SITC section 8) and manufactured goods classified chiefly by material (SITC section 6), both representing 12.3 percent of imports. Top products for imports were petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and parts and accessories of the motor vehicles of headings 87.01 to 87.05 (HS code 8708) (see table 5).

Overview:

In 2010, exports of Cape Verde increased by 32.4 percent to 46.6 mln US\$ (see table 1). During the same period, imports increased by 8.9 percent to 730.8 mln US\$ (see table 2). This resulted in a trade deficit of 684.2 mln US\$ in 2010, higher than the deficit of 635.9 mln US\$ in 2009 (see graph 1). By MDG regions, trade with Developed Europe alone accounted for a large part of this deficit (-530.1 mln US\$) (see graph 2). Significant deficits were also recorded with Latin America and the Caribbean and Eastern Asia (-45.0 mln US\$ and -32.7 mln US\$ respectively). Trade was concentrated among a few partners: in 2010, 2 (respectively 8) major partners accounted for 80 percent of exports (respectively imports) (see graph 3). See footnote*.

Graph 1: Total imports, exports and trade balance

(Mln US\$ by year)

**Exports Profile:**

Food, live animals, beverages and tobacco (SITC sections 0+1) accounted for 81.5 percent of exports in 2010 (see table 1). Other major commodity groups included miscellaneous manufactured articles (SITC section 8) with 17.5 percent of exports. Major markets for exports included Spain, Portugal and Brazil (see table 4). Exports to Spain were almost exclusively food, live animals, beverages and tobacco (SITC sections 0+1). From 2008 to 2010, top products for exports were fish, frozen, excluding fish fillets and other fish meat of heading 03.04 (HS code 0303), prepared or preserved fish; caviar (HS code 1604) and parts of footwear (HS code 6406) (see table 3).

Imports Profile:

In 2010, imports of machinery and transport equipment (SITC section 7) accounted for 27.8 percent of imported goods (see table 2). Other major commodity groups for imports included food, live animals, beverages and tobacco (SITC sections 0+1) and manufactured goods classified chiefly by material (SITC section 6) respectively with 26.1 and 17.2 percent of imports. Over the last three years, top imported products included petroleum oils, other than crude (HS code 2710), portland cement, aluminous cement, slag cement (HS code 2523) and rice (HS code 1006) (see table 5).

Central African Republic

Imports: CIF, by origin

Exports: FOB, by last known destination

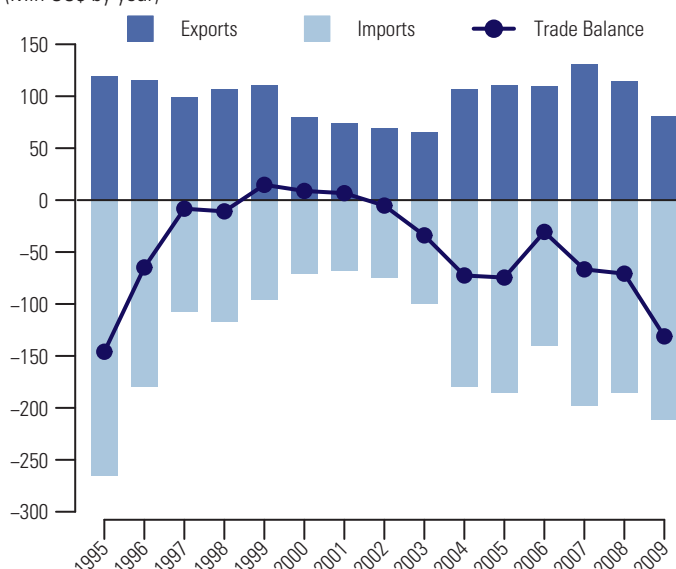

Trade System: Special

Overview:

From 2005 to 2009, exports of Central African Republic decreased on average by 7.7 percent each year. It experienced a significant drop of 29.5 percent in 2009 and amounted to 80.5 mln US\$ (see table 1 and graph 1). During the same period, imports increased on average by 3.4 percent each year to 211.7 mln US\$ (see table 2 and graph 1). The trade balance recorded a deficit of 131.2 mln US\$ compared to a deficit of 70.8 mln US\$ in 2008 (see graph 1). Trade with almost all MDG regions were in deficit, with Sub-Saharan Africa recording a deficit amounting to 33.9 mln US\$ (see graph 2). In 2009, trade was concentrated among a few partners: 4 (respectively 12) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Mln US\$ by year)

Exports Profile:

In 2009, exports of inedible crude materials (excluding fuels), animal and vegetable oils, fats, waxes (SITC sections 2+4) dropped by 24.3 percent and accounted for 93.3 percent of exported goods (see table 1). Exports of miscellaneous manufactured articles (SITC section 8) increased by 531.9 percent and represented 1.5 percent of exports. Belgium, China and France were the top three markets for exports in 2009 (see table 4). Inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) represented all exports to China and the majority of exports to Belgium and France. From 2007 to 2009, top exported products included diamonds, whether or not worked, but not mounted or set (HS code 7102), wood in the rough, whether or not stripped of bark or sapwood (HS code 4403) and wood sawn or chipped lengthwise, sliced or peeled (HS code 4407) (see table 3). They accounted respectively for 61.8, 20.4 and 10.5 percent of exports in 2009.

Imports Profile:

Imports were composed of 35.9 percent of food, live animals, beverages and tobacco (SITC sections 0+1), 22.0 percent of machinery and transport equipment (SITC section 7) and 14.6 percent of chemicals and related products, n.e.s. (SITC section 5) (see table 2). From 2007 to 2009, top imported products included medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004), diamonds, whether or not worked, but not mounted or set (HS code 7102) and wheat or meslin flour (HS code 1101) (see table 5).

Overview:

From 2005 to 2009, Chile's exports increased on average by 6.8 percent each year, despite a significant drop of 19.2 percent in 2009, and amounted to 53.7 bln US\$ (see table 1). During the same period, imports also increased on average by 6.7 percent each year but dropped by 31.5 percent in 2009 to 42.4 bln US\$ (see table 2). Nevertheless, trade showed a surplus of 11.3 bln US\$ in 2009 (see graph 1). Surpluses with Eastern Asia, Developed Asia-Pacific and Developed Europe amounted respectively to 10.1, 3.8 and 2.8 bln US\$ in 2009 (see graph 2). The trade balance showed deficits with Latin America and the Caribbean (-3.8 bln US\$) and Developed North America (-537.3 mln US\$). Chile's trade was diversified across partners: in 2009, 15 major partners accounted for 80 percent of exports compared to 13 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2009, manufactured goods classified chiefly by material (SITC section 6) and inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) represented, respectively, 39.5 and 28.0 percent of total exported goods (see table 1). Top markets for exports included China, USA and Japan (see table 4). From 2007 to 2009, top products for exports included refined copper and copper alloys, unwrought (HS code 7403), copper ores and concentrates (HS code 2603) and unrefined copper; copper anodes for electrolytic refining (HS code 7402) (see table 3).

Imports Profile:

In 2009, machinery and transport equipment (SITC section 7) and mineral fuels, lubricants and related materials (SITC section 3) accounted, respectively, for 30.6 and 21.4 percent of total imported goods. From 2007 to 2009, top products for imports included petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), petroleum oils, other than crude (HS code 2710) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 1,430.7 bln US\$ in 2008, the value of China's exports dropped in 2009 (by 16.0 percent) but bounced back in 2010 by 31.3 percent to amount to 1,578.2 bln US\$, well above the 2008 level (see table 1 and graph 1). Imports showed a similar development with an increase by 38.6 percent to 1,394.2 bln US\$ in 2010. The trade surplus dropped from 196.1 bln US\$ in 2009 to 184.0 bln US\$ in 2010 (see graph 1). Two MDG regions accounted for a large part of this surplus: Developed North America (+188.7 bln US\$) and Developed Europe (+125.9 bln US\$) (see graph 2). Trade recorded significant deficits with Developed Asia-Pacific (-89.9 bln US\$) and Eastern Asia (-54.3 bln US\$). China's trade was diversified across partners: in 2010, 24 (respectively 21) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

Machinery and transport equipment (SITC section 7) accounted for nearly half of exported goods (49.5 percent) in 2010 (see table 1). Other major commodity groups included miscellaneous manufactured articles (SITC section 8) and manufactured goods classified chiefly by material (SITC section 6): they accounted, respectively, for 23.9 and 15.8 percent of exports. Major markets for exported goods were the United States, China, Hong Kong SAR and Japan (see table 4). From 2008 to 2010, top exported commodities were automatic data processing machines and units thereof (HS code 8471), electrical apparatus for line telephony or line telegraphy (HS code 8517) and reception apparatus for television (HS code 8528) (see table 3).

Imports Profile:

In 2010, China's imports were composed of 39.4 percent of machinery and transport equipment (SITC section 7) (see table 2). Other major commodity groups included inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) and mineral fuels, lubricants and related materials (SITC section 3): they accounted, respectively, for 15.8 and 13.5 percent of exports. From 2008 to 2010, top imported products were electronic integrated circuits (HS code 8542), petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709) and iron ores and concentrates, including roasted iron pyrites (HS code 2601) (see table 5).

China, Hong Kong SAR

Imports: CIF, by origin

Exports: FOB, by last known destination

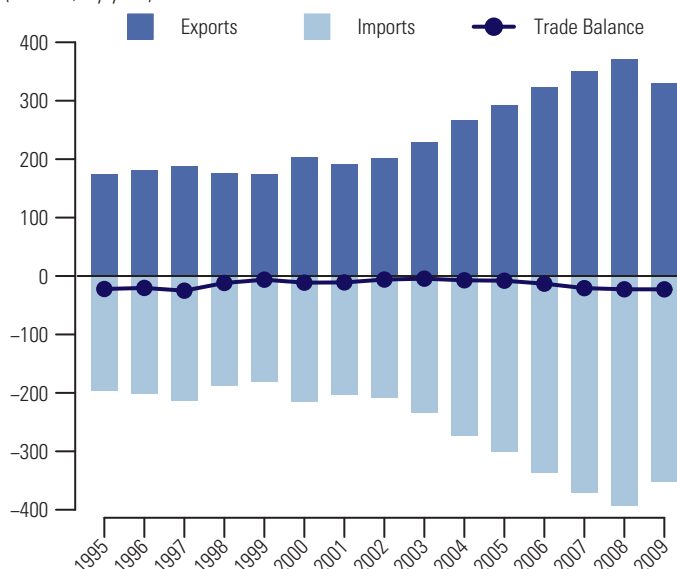

Trade System: General

Overview:

After several years of continuous growth marked by a peak of 370.2 bln US\$ in 2008, the value of the exports of China, Hong Kong SAR dropped by 11.0 percent in 2009 and amounted to 329.4 bln US\$ (see table 1 and graph 1). Imports showed a similar development with a decline of 10.4 percent in 2009 to 352.2 bln US\$ (see table 2 and graph 1). This resulted in a trade deficit of 22.8 bln US\$ in 2009 (see graph 1). By MDG regions, trade recorded surpluses with Developed North America (+21.4 bln US\$) and Developed Europe (+15.9 bln US\$) (see graph 2). The trade balance was in deficit with Eastern Asia (-24.5 bln US\$), South-eastern Asia (-20.8 bln US\$) and Developed Asia-Pacific (-15.6 bln US\$). In 2009, both imports and exports were concentrated among partners: 9 (respectively 8) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2009, exports of China, Hong Kong SAR were largely various kinds of manufactured goods: machinery and transport equipment (SITC section 7) accounted for more than half of exported goods (55.9 percent) and miscellaneous manufactured articles (SITC section 8) accounted for 23.7 percent (see table 1). In addition to China, other major markets for exports were USA and Japan (see table 4). From 2007 to 2009, top exported commodities included electronic integrated circuits (HS code 8542), electrical apparatus for line telephony or line telegraphy (HS code 8517) and parts and accessories for use with machines of heading 84.69 to 84.72 (HS code 8473) (see table 3).

Imports Profile:

By SITC sections, imports and exports had similar profiles in 2009: machinery and transport equipment (SITC section 7) accounted for more than a half of imported goods in 2009 (54.6 percent) followed by miscellaneous manufactured articles (SITC section 8) and manufactured goods classified chiefly by material (SITC section 6), respectively with 18.9 and 11.5 percent (see table 2). The three main goods for imports over the last three years were electronic integrated circuits (HS code 8542), electrical apparatus for line telephony or line telegraphy (HS code 8517) and parts and accessories for use with machines of heading 84.69 to 84.72 (HS code 8473) (see table 5).

Overview:

In 2010, the value of the exports of China, Macao SAR continued to drop by 9.5 percent to 869.8 mln US\$ (see table 1). The trend over the last five years showed an average annual decline of 23.6 percent in exports, while imports registered an average annual growth of 1.8 percent (see tables 1 and 2 and graph 1). In 2010, imports increased by 18.5 percent to 5.6 bln US\$. This resulted in a trade deficit of 4.8 bln US\$ in 2010, slightly higher than the 2009 deficit of 3.8 bln US\$ (see graph 1). By MDG regions, deficit with Eastern Asia alone amounted to 2.2 bln US\$ (see graph 2). Significant trade deficits were also recorded with Developed Europe (-1.6 bln US\$) and Developed Asia-Pacific (-0.5 bln US\$). Trade, especially exports, was highly concentrated among a few partners: 4 major partners accounted for 80 percent of exports compared to 9 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

For a large part of exports in 2010, no commodity detail has been provided. Therefore, commodities and transactions not classified elsewhere (SITC section 9) accounted for the overwhelming majority of exports (69.5 percent). Other major commodity groups included miscellaneous manufactured articles (SITC section 8) and machinery and transport equipment (SITC section 7): they accounted respectively for 17.3 and 7.1 percent of exports. In addition to China, Hong Kong SAR, other major markets for exports in 2010 included China and USA (see table 4). Exports to USA were almost exclusively miscellaneous manufactured articles (SITC section 8). Major exported commodities over the last three years were jerseys, pullovers, cardigans, waist-coats and similar articles (HS code 6110), women's or girls' suits, ensembles, jackets, blazers, dresses, skirts (HS code 6204) and petroleum oils, other than crude (HS code 2710) (see table 3).

Imports Profile:

In 2010, imports of miscellaneous manufactured articles (SITC section 8), machinery and transport equipment (SITC section 7) and food, live animals, beverages and tobacco (SITC sections 0+1) represented respectively 31.6, 21.7 and 16.6 percent of imported goods (see table 2). Top imported products included petroleum oils, other than crude (HS code 2710), articles of jewellery and parts thereof, of precious metal (HS code 7113) and electrical apparatus for line telephony or line telegraphy (HS code 8517) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 37.6 bln US\$ in 2008, the value of Colombia's exports dropped by 12.7 percent in 2009 but bounced back in 2010 by 21.2 percent to amount to 39.8 bln US\$ (see table 1 and graph 1). Imports showed a similar development with an increase of 23.7 percent to 40.7 bln US\$ in 2010 (see table 2 and graph 1). This resulted in a trade deficit of 863.0 mln US\$, higher than the 44.7 mln US\$ deficit in 2009 (see graph 1). By MDG regions, the trade balance recorded surpluses with Developed North America (+6.3 bln US\$) and Sub-Saharan Africa (+280.3 mln US\$) (see graph 2). The trade balance recorded a deficit with Eastern Asia amounting to 4.3 bln US\$. In 2010, trade was diversified across partners: 15 major partners accounted for 80 percent of exports and 14 for imports (see graph 3). USA was the top partner with 43.1 percent of Colombia's exports (see table 4).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, mineral fuels, lubricants and related materials (SITC section 3) accounted for 56.7 percent of exported goods (see table 1). Other major commodity groups included food, live animals, beverages and tobacco (SITC sections 0+1) and manufactured goods classified chiefly by material (SITC section 6), which accounted for 10.8 and 8.4 percent of exports, respectively. In 2010, exports to the USA, the top partner, were largely mineral fuels, lubricants and related materials (SITC section 3) (70.4 percent). Other major partners included China and Ecuador. Petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), the top product for exports over the last three years, accounted for 33.6 percent of exports in 2010. Other major products for exports included coal; briquettes, ovoids and similar solid fuels manufactured from coal (HS code 2701) and petroleum oils, other than crude (HS code 2710) (see table 3).

Imports Profile:

In 2010, machinery and transport equipment (SITC section 7) accounted for 40.0 percent of total imports in 2010 followed by chemicals and related products, n.e.s. (SITC section 5) and manufactured goods classified chiefly by material (SITC section 6) respectively with 18.3 and 15.7 percent (see table 2). Top products for imports over the last three years were other aircraft (for example, helicopters, aeroplanes); spacecraft (HS code 8802), motor cars and other motor vehicles principally designed for the transport (HS code 8703), and petroleum oils, other than crude (HS code 2710) (see table 5).

Overview:

From 2005 to 2009, Comoros' exports increased on average by 35.4 percent each year, amounting to 12.6 mln US\$ in 2009 (see table 1 and graph 1). Imports increased on average by 20.8 percent each year, and reached 181.5 mln US\$ in 2009 (see table 2 and graph 1). This resulted in a trade deficit of 168.9 mln US\$ in 2009 compared to the 81.4 mln US\$ deficit in 2005 (see graph 1). Deficit with Western Asia alone amounted to 57.0 mln US\$ (see graph 2). Trade also recorded significant deficits with Developed Europe (-35.2 mln US\$) and Southern Asia (-32.1 mln US\$). Trade, especially exports were highly concentrated among partners: 5 partners accounted for nearly 80 percent of exports and 7 major partners accounted for 80 percent of imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Mln US\$ by year)

**Exports Profile:**

In 2009, Comoros' exports were composed of 72.7 percent of food, live animals, beverages and tobacco (SITC sections 0+1) and 19.0 percent of chemicals and related products, n.e.s. (SITC section 5) (see table 1). Major destinations for exports in 2009 included France, Singapore and Netherlands (see table 4). Exports to Singapore and Netherlands were exclusively food, live animals, beverages and tobacco (SITC sections 0+1). From 2007 to 2009, major products for exports were cloves (whole fruit, cloves and stems) (HS code 0907), essential oils, resinoids and terpenic by-products (HS code 3301) and vanilla beans (HS code 0905)(see table 3).

Overview:

In 2008, exports of Cook Islands amounted to 4.1 mln US\$ (see table 1 and graph 1). In 2007, imports reached 103.2 mln US\$ (see table 2 and graph 1). The trade balance recorded a deficit of 76.0 mln US\$ in 2005 (see graph 1). In 2008, exports were concentrated among a few partners: 3 major partners accounted for 80 percent of exported goods (see graph 3).

Graph 1: Total imports, exports and trade balance

(Mln US\$ by year)

**Exports Profile:**

In 2008, commodities and transactions not classified elsewhere (SITC section 9) accounted for a large part of exported goods: they represented 48.1 percent of total exports (see table 1). Manufactured goods classified chiefly by material (SITC section 6) and food, live animals, beverages and tobacco (SITC sections 0+1) accounted for 27.2 and 22.8 percent of exports respectively. Japan, China and New Zealand were the top partners for exported goods (see table 4). In 2008, top exported products were pearls, natural or cultured (HS code 7101), fruit and vegetable juices, not fermented or spirited (HS code 2009) and live fish (HS code 0301) (see table 3).

Table 1: Exports by SITC sections

Imports Profile:

In 2007, imports were composed of 40.6 percent of commodities and transactions not classified elsewhere (SITC section 9) (see table 2). Other top commodity groups included mineral fuels, lubricants and related materials (SITC section 3) and food, live animals, beverages and tobacco (SITC sections 0+1), which represented respectively 18.8 and 15.0 percent of total imports. Top imported products in 2007 were oils petroleum, bituminous, distillates, except crude (HS code 2710), motor vehicles for transport of persons (except buses) (HS code 8703) and motor vehicles for the transport of goods (HS code 8704) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 9.7 bln US\$ in 2008, the value of the exports of Costa Rica dropped in 2009 but increased again in 2010 by 2.4 percent to amount to 9.0 bln US\$, still below its 2008 level (see table 1 and graph 1). Imports showed a pronounced development with an increase by 20.5 percent to 13.9 bln US\$ in 2010. This resulted in a trade deficit of 4.9 bln US\$, much higher than the 2009 deficit of 2.7 bln US\$ (see graph 1). By MDG regions, large deficits were recorded with Developed North America (-3.1 bln US\$), Latin America and the Caribbean (-0.7 bln US\$) and Eastern Asia (-0.5 bln US\$) (see graph 2). Trade was relatively diversified across partners: 12 major partners accounted for 80 percent of both exports and imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, exports of food, live animals, beverages and tobacco (SITC sections 0+1) accounted for 32.8 percent of exported goods (see table 1). Other major commodity groups included machinery and transport equipment (SITC section 7) and miscellaneous manufactured articles (SITC section 8) respectively with 27.1 and 17.1 percent of exports in 2010. Major partners for exports were USA, Netherlands and China, Hong Kong SAR (see table 4). Exports to China, Hong Kong SAR were almost exclusively machinery and transport equipment (SITC section 7): they accounted for 95.9 percent of exports. Over the last three years, top products for exports were parts and accessories for use with machines of heading 84.69 to 84.72 (HS code 8473), electronic integrated circuits (HS code 8542) and instruments and appliances used in medical, surgical, dental or veterinary (HS code 9018) (see table 3).

Imports Profile:

In 2010, machinery and transport equipment (SITC section 7) accounted for 33.6 percent of imported goods (see table 2). Other major commodity groups included manufactured goods classified chiefly by material (SITC section 6) and chemicals and related products, n.e.s. (SITC section 5) respectively with 16.0 and 15.2 percent. From 2008 to 2010, top imported products were petroleum oils, other than crude (HS code 2710), electronic integrated circuits (HS code 8542) and medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) (see table 5).

Overview:

Since 2005, exports of Côte d'Ivoire increased on average by 9.1 percent each year and amounted to 10.3 bln US\$ in 2009 (see table 1 and graph 1). During the same period, imports increased on average by 4.4 percent each year to 7.0 bln US\$ (see table 2 and graph 1). The trade balance recorded a surplus of 3.3 bln US\$ in 2009 compared to 1.4 bln US\$ in 2005 (see graph 1). Trade with Developed Europe recorded a surplus amounting to 3.1 bln US\$ in 2009 (see graph 2). Trade was also in surplus with Sub-Saharan Africa (+1.1 bln US\$) and Developed North America (+0.7 bln US\$). Deficits were recorded with Eastern Asia (-0.5 bln US\$) and South-eastern Asia (-0.4 bln US\$) among others. Côte d'Ivoire's trade was diversified across partners: in 2009, 18 major partners accounted for 80 percent of both exports and imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2009, exports were composed of 45.7 percent of food, live animals, beverages and tobacco (SITC sections 0+1), 29.4 percent of mineral fuels, lubricants and related materials (SITC section 3) and 7.4 percent of inedible crude materials (excluding fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) (see table 1). Major markets for exported goods were Netherlands, France and USA (see table 4). Top exported products over the last three years included cocoa beans, whole or broken, raw or roasted (HS code 1801), petroleum oils, other than crude (HS code 2710) and petroleum oils, crude (HS code 2709) (see table 3).

Imports Profile:

In 2009, imports of mineral fuels, lubricants and related materials (SITC section 3) decreased by 38.2 percent and accounted for 25.0 percent of imported goods (see table 2). Other major commodity groups for imports included food, live animals, beverages and tobacco (SITC sections 0+1) and machinery and transport equipment (SITC section 7): they accounted respectively for 22.8 and 20.7 percent of imports. Top imported products over the last three years were petroleum oils, crude (HS code 2709), rice (HS code 1006) and fish, frozen, excluding fish fillets (HS code 0303) (see table 5).

Overview:

From 2006 to 2010, Croatia's exports increased on average by 3.3 percent each year to reach 11.8 bln US\$ despite contracting sharply in 2009 by 25.7 percent (see table 1 and graph 1). Imports, on the other hand, continued to decrease by 5.4 percent to reach 20.1 bln US\$ in 2010 even after a significant drop of 31.0 percent in 2009 (see table 2 and graph 1). This resulted in a trade deficit of 8.2 bln US\$ in 2010, compared to 10.7 bln US\$ in 2009 (see graph 1). This deficit came largely from trade with Developed Europe (-5.0 bln US\$) (see graph 2). Trade was also in deficit with Commonwealth of Independent States (-2.0 bln US\$) and Eastern Asia (-1.7 bln US\$). Trade, however, recorded a surplus of less than 1.0 bln US\$ with South-Eastern Europe. By partners, trade was diversified: in 2010, 21 major partners accounted for 80 percent of exports and 18 for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, machinery and transport equipment (SITC section 7), the largest commodity group, accounted for 31.7 percent of exports followed by manufactured goods classified chiefly by material (SITC section 6) and miscellaneous manufactured articles (SITC section 8) respectively with 14.1 and 12.6 percent (see table 1). Three major partners for exports in 2010 were Italy, Bosnia Herzegovina and Germany (see table 4). Over the last three years, top products for exports included petroleum oils, other than crude (HS code 2710), cruise ships, excursion boats, ferry-boats, cargo ships, barges (HS code 8901) and electrical transformers, static converters (HS code 8504) (see table 3).

Imports Profile:

In 2010, machinery and transport equipment (SITC section 7) accounted for 25.7 percent of total imports followed by mineral fuels, lubricants and related materials (SITC section 3) and manufactured goods classified chiefly by material (SITC section 6) respectively with 18.8 and 18.0 percent (see table 2). Three major products for imports over the last three years were petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and petroleum oils, other than crude (HS code 2710) (see table 5).

Overview:

From 2002 to 2006, Cuba's exports increased on average by 20.3 percent each year and amounted to 3.0 bln US\$ (see table 1 and graph 1). During the same period, imports increased on average by 24.9 percent each year and amounted to 10.2 bln US\$ resulting in a trade deficit of 7.2 bln US\$ (see table 2 and graph 1). Large deficits were recorded with Developed Europe (-2 bln US\$), Eastern Asia (-1.5 bln US\$) and Developed North America (-0.8 bln US\$) (see graph 2). Trade, especially exports, was concentrated among a few partners: 4 major partners accounted for 80 percent of exports compared to 9 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2006, exports were composed of 62.8 percent of commodities and transactions not classified elsewhere (SITC section 9), 10.5 percent of food, live animals, beverages and tobacco (SITC sections 0+1) and 10.2 percent of chemicals and related products, n.e.s. (SITC section 5) (see table 1). The Bolivarian Republic of Venezuela, Spain and the Russian Federation were the three major destinations for exported goods (see table 4). Exports to Spain were largely food, live animals, beverages and tobacco (SITC sections 0+1). From 2004 to 2006, top exported products were nickel mattes, nickel oxide sinters and other intermediate products (HS code 7501), cigars, cheroots, cigarillos and cigarettes (HS code 2402) and medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) (see table 3).

Imports Profile:

In 2006, imports were composed of 36.7 percent of commodities and transactions not classified elsewhere (SITC section 9), 27.3 percent of machinery and transport equipment (SITC section 7) and 10.7 percent of food, live animals, beverages and tobacco (SITC sections 0+1) (see table 2). From 2004 to 2006, top imported products included petroleum oils, other than crude (HS code 2710), petroleum oils, crude (HS code 2709) and electric generating sets and rotary converters (HS code 8502) (see table 5).

Overview:

From 2006 to 2010, exports of Cyprus increased on average by 1.7 percent each year and amounted to 1.5 bln US\$ in 2010 (see table 1). Imports increased on average by 5.0 percent each year and reached 8.6 bln US\$ in 2010 (see table 2). This resulted in a trade deficit of 7.1 bln US\$ in 2010, slightly higher than the 2009 deficit of 6.6 bln US\$ (see graph 1). Although trade was in deficit with almost all MDG regions, this deficit reflected largely trade with Developed Europe (-5.2 bln US\$) (see graph 2). Trade was also in deficit with Western Asia (-0.6 bln US\$) and Eastern Asia (-0.5 bln US\$). In 2010, exports were well diversified across partners: 22 major partners accounted for 80 percent of exports (compared to 15 major partners for imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, the major exports of Cyprus were chemicals and related products, n.e.s. (SITC section 5), food, live animals, beverages and tobacco (SITC sections 0+1) and machinery and transport equipment (SITC section 7), respectively with 23.4, 22.5 and 17.1 percent of exports (see table 1). Major partners for exports included Greece, Germany and the United Kingdom (see table 4). A large share of exported goods, (almost exclusively mineral fuels, lubricants and related materials (SITC section 3)) was reported to be supplied to foreign vessels and aircrafts and the partner was unknown. In addition to petroleum oils, other than crude (HS code 2710), other major exported products over the last three years included medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) and diodes, transistors and similar semiconductor devices (HS code 8541) (see table 3).

Imports Profile:

In 2010, imports of Cyprus were composed of 25.3 percent of machinery and transport equipment (SITC section 7), 20.3 percent of mineral fuels, lubricants and related materials (SITC section 3) and 14.3 percent of food, live animals, beverages and tobacco (SITC sections 0+1) (see table 2). In addition to petroleum oils, other than crude (HS code 2710), other major products for imports over the last three years included motor cars and other motor vehicles principally designed for the transport (HS code 8703) and medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 146.1 bln US\$ in 2008, the value of the exports of Czech Republic contracted sharply in 2009 (by 22.7 percent) but bounced back in 2010 by 17.1 percent to amount to 132.1 bln US\$, still well below its 2008 level (see table 1 and graph 1). Imports showed a similar development with an increase of 19.9 percent to 125.7 bln US\$ in 2010 (see table 2 and graph 1). The trade balance recorded a surplus of 6.5 bln US\$ (see graph 1). By MDG regions, trade recorded a surplus of 30.4 bln US\$ with Developed Europe (see graph 2). Significant deficits were recorded with Eastern Asia (-16.9 bln US\$), Commonwealth of Independent States (-4.4 bln US\$) and South-eastern Asia (-3.9 bln US\$). Both imports and exports were diversified across partners: in 2010, 13 (respectively 15) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, machinery and transport equipment (SITC section 7) accounted for more than half (53.4 percent) of total exports (see table 1). Other major commodity groups included manufactured goods classified chiefly by material (SITC section 6) and miscellaneous manufactured articles (SITC section 8) respectively with 16.8 and 10.7 percent. The main partners for exports in 2010 were Germany, Slovakia and Poland (see table 4). From 2008 to 2010, top exported products were motor cars and other motor vehicles principally designed for the transport (HS code 8703), parts and accessories of the motor vehicles of headings 87.01 to 87.05 (HS code 8708) and automatic data processing machines and units thereof (HS code 8471) (see table 3).

Imports Profile:

Similar to exports, machinery and transport equipment (SITC section 7) accounted for a large share of imports: 42.4 percent (see table 2). Other major commodity groups included manufactured goods classified chiefly by material (SITC section 6) and chemicals and related products, n.e.s. (SITC section 5), accounting respectively for 17.1 and 10.1 percent. From 2008 to 2010, top imported products were parts and accessories of the motor vehicles of headings 87.01 to 87.05 (HS code 8708), petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709) and automatic data processing machines and units thereof (HS code 8471) (see table 5).

Overview:

Since 2006, the value of the exports of Denmark increased on average by 1.4 percent each year and amounted to 96.8 bln US\$ in 2010 (see table 1 and graph 1). Imports, on the other hand, decreased on average by 0.2 percent each year to reach 84.5 bln US\$ in 2010 (see table 2 and graph 1). The trade balance registered a surplus of 12.3 bln US\$ in 2010 compared to 10.9 bln US\$ in 2009 (see graph 1). By MDG regions, trade surpluses with Developed North America, Developed Asia-Pacific and Western Asia amounted respectively to 3.3, 1.7 and 1.1 bln US\$ in 2010 (see graph 2). A deficit of 3.1 bln US\$ was recorded in trade with Eastern Asia. In 2010, trade was diversified across partners: respectively 16 and 15 major partners accounted for 80 percent of exports and imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, exports were composed of 24.9 percent of machinery and transport equipment (SITC section 7), 17.7 percent of food, live animals, beverages and tobacco (SITC sections 0+1) and 15.7 percent of miscellaneous manufactured articles (SITC section 8) (see table 1). Top partners for exports were Germany, Sweden and the United Kingdom (see table 4). By commodities, top exported products over the last three years included petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) and meat of swine, fresh, chilled or frozen (HS code 0203) (see table 3).

Imports Profile:

Machinery and transport equipment (SITC section 7) accounted for 31.4 percent of imports in 2010 (see table 2). Other major commodity groups included miscellaneous manufactured articles (SITC section 8) and manufactured goods classified chiefly by material (SITC section 6) respectively with 16.8 percent and 14.3 percent of imports. Over the last three years, top products for imports were petroleum oils, other than crude (HS code 2710), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) (see table 5).

Overview:

From 2004 to 2008, Dominica's exports dropped on average by 0.8 percent each year and amounted to 40.0 mln US\$ in 2008 (see table 1 and graph 1). During the same period, imports increased on average by 12.5 percent to 232.4 mln US\$ (see table 2 and graph 1). The trade balance recorded a deficit of 192.4 mln US\$ (see graph 1). Two MDG regions accounted for a large part of this deficit: Developed North America (-97.4 mln US\$) and Latin America and the Caribbean (-65.3 mln US\$) (see graph 2). By partner, trade was relatively concentrated: in 2008, 8 (respectively 9) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Mln US\$ by year)

Exports Profile:

In 2008, chemicals and related products, n.e.s. (SITC section 5) accounted for 44.3 percent of total exports (see table 1). Other major commodity groups included food, live animals, beverages and tobacco (SITC sections 0+1) and inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) respectively with 39.0 and 13.6 percent of exports. Jamaica, Antigua and Barbuda and France were the major destinations for exports (see table 4). Exports to Jamaica were almost exclusively chemicals and related products, n.e.s. (SITC section 5) while exports to Antigua and Barbuda and France were largely food, live animals, beverages and tobacco (SITC sections 0+1). From 2006 to 2008, top exported products included soap; organic surface-active products (HS code 3401), bananas, including plantains (HS code 0803) and preparations for oral or dental hygiene (HS code 3306) (see table 3).

Imports Profile:

Dominica's imports were composed of 24.2 percent of machinery and transport equipment (SITC section 7) and 18.7 percent of food, live animals, beverages and tobacco (SITC sections 0+1) (see table 2). In addition to petroleum oils, other than crude (HS code 2710), other major imported products were meat and edible offal, of the poultry of heading 01.05 (HS code 0207) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) (see table 5).

Dominican Republic

Imports: FOB, by origin

Exports: FOB, by last known destination

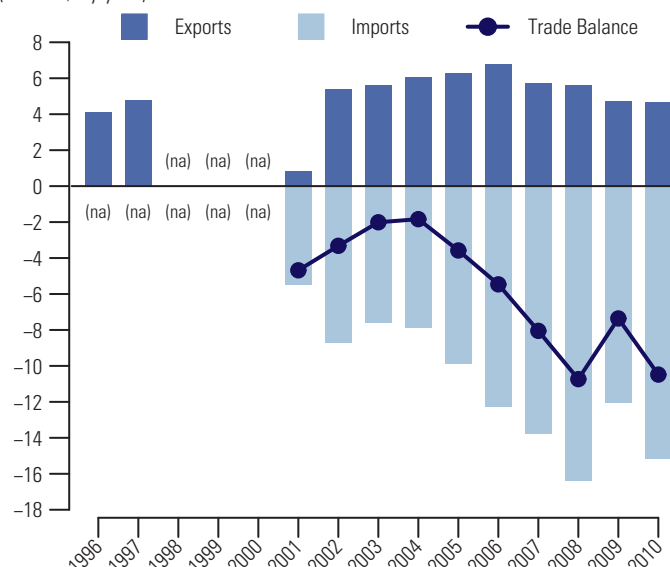

Trade System: General

Overview:

Over the last five years, the development of the exports of Dominican Republic is marked by a peak of 6.8 bln US\$ in 2006 followed by a continuous drop to 4.7 bln US\$ in 2010 (see table 1 and graph 1). This represented an average annual decrease of 8.9 percent since 2006 (see table 1). Imports showed a continuous growth marked by a peak of 16.4 bln US\$ in 2008 before dropping in 2009 (by 26.3 percent) and then bouncing back in 2010 by 25.8 percent to amount to 15.2 bln US\$ (see table 2 and graph 1). The trade balance recorded a deficit of 10.5 bln US\$ in 2010 compared to 7.4 bln US\$ in 2009 (see graph 1). Trade with Latin America & the Caribbean, Developed North America and Eastern Asia recorded deficits respectively of 3.8, 3.3 and 1.6 bln US\$ in 2010 (see graph 2). Imports were more diversified across partners than exports in 2010: 12 major partners accounted for 80 percent of imports (compared to 5 major partners for exports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2010, the Dominican Republic's exports were composed largely of miscellaneous manufactured articles (SITC section 8) and food, live animals, beverages and tobacco (SITC sections 0+1) (see table 1). They represented respectively 37.3 and 25.8 percent of total exports. USA was the top destination for Dominican Republic's exports with 58.7 percent of total exports. Other major markets for exports included Haiti and China (see table 4). Over the last three years, top export commodities were instruments and appliances used in medical, surgical, dental or veterinary (HS code 9018), cigars, cheroots, cigarillos and cigarettes (HS code 2402) and articles of jewellery and parts thereof, of precious metal (HS code 7113) (see table 3).

Imports Profile:

Mineral fuels, lubricants and related materials (SITC section 3) accounted for 24.5 percent of imports in 2010 (see table 2). Other major commodity groups included machinery and transport equipment (SITC section 7) and manufactured goods classified chiefly by material (SITC section 6) respectively with 23.4 percent and 17.3 percent of imports. Over the last three years, top products for imports were petroleum oils, other than crude (HS code 2710), petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709) and petroleum gases and other gaseous hydrocarbons (HS code 2711) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 18.5 bln US\$ in 2008, the value of Ecuador's exports dropped by 25.9 percent in 2009 and amounted to 13.7 bln US\$, below its 2007 level (see table 1 and graph 1). Imports showed a similar development although less pronounced with a decline by 19.2 percent in 2009 to 15.1 bln US\$ (see table 2 and graph 1). The trade balance registered a deficit of 1.4 bln US\$ in 2009 (see graph 1). Trade with Developed North America recorded a surplus amounting to 1.9 bln US\$ in 2009 (see graph 2). Significant deficits were recorded with Eastern Asia (-2.3 bln US\$) and Developed Asia-Pacific (-0.6 bln US\$). Trade was relatively diversified across partners: in 2009, 9 (respectively 12) major partners accounted for 80 percent of exports (respectively imports) (see graph 3). However, the USA, the top partner for Ecuador's exports, accounted for 33.4 percent of exported goods in 2009 (see table 4).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

Ecuador's exports were dominated by mineral fuels, lubricants and related materials (SITC section 3) and food, live animals, beverages and tobacco (SITC sections 0+1) with 50.7 percent and 34.0 percent of total exports respectively (see table 1). The majority of exports to the USA, the top partner, were mineral fuels, lubricants and related materials (SITC section 3) (see table 4). Other major destinations for Ecuador's exports were Panama and Peru. From 2007 to 2009, the three major exported commodities were petroleum oils, crude (HS code 2709), bananas, including plantains (HS code 0803) and petroleum oils, other than crude (HS code 2710) (see table 3).

Imports Profile:

Machinery and transport equipment (SITC section 7), the top commodity group for imports, accounted for 33.0 percent of imported goods in 2009 (see table 2). Other major commodity groups for imports included mineral fuels, lubricants and related materials (SITC section 3) and chemicals and related products, n.e.s. (SITC section 5) respectively with 17.7 and 16.2 percent of imports. From 2007 to 2009, top products for imports were petroleum oils, other than crude (HS code 2710), oils and other products of high temperature coal tar (HS code 2707) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) (see table 5).

Overview:

From 2006 to 2010, Egypt's exports increased on average by 17.7 percent each year to reach 26.3 bln US\$ in 2010 despite a slight decline in 2009 (see table 1 and graph 1). During the same period, imports increased on average by 26.7 percent each year, and reached 53.0 bln US\$ in 2010 (see table 2 and graph 1). This resulted in a trade deficit of 26.7 bln US\$ (see graph 1). The largest deficit was recorded with Developed Europe (-9.1 bln US\$) (see graph 2). Deficits with Eastern Asia, Developed North America and the Commonwealth of Independent States amounted respectively to 5.9, 3.7 and 3.4 bln US\$. In 2010, trade was highly diversified across partners: 27 major partners (respectively 24) accounted for 80 percent of exports (respectively imports) (see graph 3). See footnote*.

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

Mineral fuels, lubricants and related materials (SITC section 3) accounted for 28.7 percent of Egypt's exports in 2010 (see table 1). Other major commodity groups included manufactured goods classified chiefly by material (SITC section 6) and food, live animals, beverages and tobacco (SITC sections 0+1) representing 20.6 and 15.6 percent of total exports. Top partners for exports in 2010 were Italy, Spain and Saudi Arabia (see table 4). Egypt's main exported commodities were petroleum products: petroleum oils, other than crude (HS code 2710), petroleum gases and other gaseous hydrocarbons (HS code 2711) and petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709) (see table 3).

Imports Profile:

In 2010, imports of machinery and transport equipment (SITC section 7) and manufactured goods classified chiefly by material (SITC section 6) accounted respectively for 24.4 and 20.5 percent of total imports (see table 2). Over the last three years, the three main products for imports were petroleum oils, other than crude (HS code 2710), wheat and meslin (HS code 1001) and petroleum gases and other gaseous hydrocarbons (HS code 2711) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 4.5 bln US\$ in 2008, the value of El Salvador's exports dropped in 2009 (by 16.5 percent), but bounced back in 2010 by 18.5 percent to amount to 4.5 bln US\$, reaching its previous level in 2008 (see table 1 and graph 1). Imports showed a similar development with an increase of 17.0 percent to 8.5 bln US\$ in 2010. This resulted in a trade deficit of 4.0 bln US\$ in 2010, slightly higher than the 2009 deficit of 3.5 bln US\$ (see graph 1). By MDG regions, trade recorded large deficits with Latin America and the Caribbean (-1.6 bln US\$), Developed North America (-0.9 bln US\$) and Eastern Asia (-0.7 bln US\$) (see graph 2). By partners, exports were more concentrated than imports: in 2010, 4 major partners accounted for 80 percent of exports (compared to 12 major partners for imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2010, major exports were composed of 45.1 percent of miscellaneous manufactured articles (SITC section 8), 20.9 percent of food, live animals, beverages and tobacco (SITC sections 0+1) and 14.6 percent of manufactured goods classified chiefly by material (SITC section 6) (see table 1). USA, Guatemala and Honduras were the three largest markets for exports and accounted jointly for 75.2 percent of exported goods in 2010 (see table 4). By commodity, top products for exports over the last three years included t-shirts, singlets and other vests, knitted or crocheted (HS code 6109), coffee, whether or not roasted or decaffeinated (HS code 0901) and electrical capacitors, fixed, variable or adjustable (pre-set) (HS code 8532) (see table 3).

Imports Profile:

The major imports in 2010 were composed of 22.3 percent of manufactured goods classified chiefly by material (SITC section 6), 16.5 percent of machinery and transport equipment (SITC section 7) and 16.2 percent of mineral fuels, lubricants and related materials (SITC section 3) (see table 2). Over the last three years, top imported products included petroleum oils, other than crude (HS code 2710), petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709) and other knitted or crocheted fabrics (HS code 6006) (see table 5).

Table 5: Top 10 import commodities 2008 to 2010

Overview:

After several years of continuous growth marked by a peak of 13.7 bln US\$ in 2008, the value of Estonia's exports dropped sharply by 23.8 percent in 2009 and amounted to 10.4 bln US\$ but bounced back in 2010 by 22.8 percent to amount to 12.8 bln US\$, still well below its 2008 level (see table 1 and graph 1). Imports showed a similar development increasing by 16.0 percent in 2010 to 13.2 bln US\$ (see table 2 and graph 1). The trade deficit amounted to 359.4 mln US\$ in 2010 compared to 914.1 mln US\$ in 2009 (see graph 1). This deficit reflected largely trade with Eastern Asia (-886.4 mln US\$) (see graph 2). Deficits with Developed Europe and Developed Asia-Pacific amounted to 565.8 and 184.6 mln US\$ in 2010 respectively. Trade with the Commonwealth of Independent States recorded a surplus of 545.6 mln US\$. Trade was relatively diversified across partners: approximately 15 major partners accounted for 80 percent of exports and imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

Machinery and transport equipment (SITC section 7), the largest commodity group for exports, accounted for 27.4 percent of exports in 2010 (see table 1). Other major commodity groups for exports included mineral fuels, lubricants and related materials (SITC section 3) and manufactured goods classified chiefly by material (SITC section 6) respectively with 15.7 and 14.8 percent of total exports in 2010. Finland, Russian Federation and Sweden were the top three markets for exports (see table 4). Over the last three years, top products for exports were petroleum oils, other than crude (HS code 2710), electrical apparatus for line telephony or line telegraphy (HS code 8517) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) (see table 3).

Imports Profile:

Machinery and transport equipment (SITC section 7) accounted for a large share of imports: 28.1 percent in 2010 (see table 2). Other major commodity groups were mineral fuels, lubricants and related materials (SITC section 3) and manufactured goods classified chiefly by material (SITC section 6) respectively with 16.6 and 16.1 percent. In addition to petroleum oils, other than crude (HS code 2710), other major products for imports over the last three years were motor cars and other motor vehicles principally designed for the transport (HS code 8703) and electrical apparatus for line telephony or line telegraphy (HS code 8517) (see table 5).

Overview:

From 2006 to 2010, Ethiopia's exports increased on average by 25.4 percent each year and amounted to 2.6 bln US\$ (see table 1 and graph 1). Imports showed a similar development with an average growth rate of 16.8 percent each year to reach 9.7 bln US\$ (see table 2 and graph 1). The trade deficit increased to 7.1 bln US\$ in 2010 compared to 6.4 bln US\$ in 2009 (see graph 1). Except for Sub-Saharan Africa (surplus of 336.6 mln US\$), trade was in deficit with all MDG regions (see graph 2). Large deficits were recorded with Eastern Asia (-2.2 bln US\$), Western Asia (-1.8 bln US\$) and Southern Asia (-0.7 bln US\$). Ethiopia's trade was diversified across partners: in 2010, 14 (respectively 16) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

Food, live animals, beverages and tobacco (SITC sections 0+1) and inedible crude materials (except fuels), animal and vegetable oils, fats and waxes accounted for a large part of Ethiopia's exports in 2010: respectively 58.3 and 23.7 percent of exported goods (see table 1). In 2010, Germany, China and Somalia were the top three partners for exports (see table 4). Food, live animals, beverages and tobacco (SITC sections 0+1) accounted respectively for 88.9 and 99.9 percent of exports to Germany and Somalia. Inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) accounted for 86.3 percent of exports to China. In addition to coffee, whether or not roasted or decaffeinated (HS code 0901), other important exported products were other oil seeds and oleaginous fruits, whether or not broken (HS code 1207) and other vegetables, fresh or chilled (HS code 0709) (see table 3).

Imports Profile:

Machinery and transport equipment (SITC section 7) and mineral fuels, lubricants and related materials (SITC section 3) accounted respectively for 35.7 and 18.5 percent of imports in 2010 (see table 2). In addition to petroleum oils, other than crude (HS code 2710), other major imported products over the period from 2008 to 2010 were electrical apparatus for line telephony or line telegraphy (HS code 8517) and wheat and meslin (HS code 1001) (see table 5).

Overview:

After several years of continuous growth, the value of the exports of Faeroe Islands dropped by 10.6 percent in 2009 and amounted to 761.7 mln US\$ (see table 1 and graph 1). Imports showed a more pronounced development with a decline by 20.7 percent in 2009 to 783.4 mln US\$ (see table 2 and graph 1). The trade deficit narrowed for the second consecutive year to 21.7 mln US\$ in 2009 (see graph 1). Deficits were recorded with Developed Europe (-76.7 mln US\$), Latin America & the Caribbean (-46.9 mln US\$) and Eastern Asia (-10.5 mln US\$) (see graph 2). However, trade recorded significant surpluses with Developed North America (+54.2 mln US\$), Commonwealth of Independent States (+36.7 mln US\$) and Sub-Saharan Africa (+32.7 mln US\$). In 2009, trade was relatively concentrated among a few partners: 11 (respectively 9) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

Food, live animals, beverages and tobacco (SITC sections 0+1) accounted for 88.0 percent of exported goods in 2009 (see table 1). Major markets for exports included United Kingdom, Denmark and France (see table 4). From 2007 to 2009, top exported products were fish fillets and other fish meat (whether or not minced) (HS code 0304), fish, fresh or chilled, excluding fish fillets (HS code 0302) and fish, dried, salted or in brine (HS code 0305) (see table 3).

Imports Profile:

In 2009, imports were composed of 29.7 percent of machinery and transport equipment (SITC section 7), 15.8 percent of food, live animals, beverages and tobacco (SITC sections 0+1) and 15.7 percent of mineral fuels, lubricants and related materials (SITC section 3) (see table 2). From 2007 to 2009, top imported products included petroleum oils, other than crude (HS code 2710), fishing vessels; factory ships and other vessels for processing (HS code 8902) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) (see table 5).

Overview:

After two years of continuous growth, the value of the exports of Fiji dropped by 31.8 percent in 2009 and amounted to 628.7 mln US\$ (see table 1 and graph 1). Imports showed a similar development with a decline by 36.5 percent in 2009 to 1,437.0 mln US\$ (see table 2 and graph 1). The trade balance registered a deficit of 808.3 mln US\$ in 2009, compared to a deficit of 1,342.0 mln US\$ in 2008 (see graph 1). Two MDG regions accounted for a large share of this deficit: Developed Asia-Pacific (-409.5 mln US\$) and South-eastern Asia (-397.4 mln US\$) (see graph 2). Trade was concentrated among a few partners: 9 major partners accounted for 80 percent of exports compared to 7 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

Food, live animals, beverages and tobacco (SITC sections 0+1) accounted for half of exports in 2009 (50.5 percent) (see table 1). Mineral fuels, lubricants and related materials (SITC section 3), in majority non crude petroleum oils, accounted for 20.2 percent of exports. In 2009, major partners for exports were Singapore, Australia and the United Kingdom (see table 4). Exports to Singapore were mainly mineral fuels, lubricants and related materials (SITC section 3) while exports to the United Kingdom were largely food, live animals, beverages and tobacco (SITC sections 0+1). From 2007 to 2009, major commodities for exports were petroleum oils, other than crude (HS code 2710), cane or beet sugar and pure sucrose, in solid form (HS code 1701) and water, including natural or artificial mineral waters (HS code 2201) (see table 3).

Imports Profile:

Mineral fuels, lubricants and related materials (SITC section 3, largely non crude petroleum oils) accounted for 25.7 percent of imports in 2009 (see table 2). Other major commodity groups included machinery and transport equipment (SITC section 7) and food, live animals, beverages and tobacco (SITC sections 0+1) respectively with 21.6 and 19.5 percent of imports. From 2007 to 2009, top products for imports were petroleum oils, other than crude (HS code 2710), wheat and meslin (HS code 1001) and parts of goods of heading 88.01 and 88.02 (HS code 8803) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 96.9 bln US\$ in 2008, the value of the exports of Finland contracted sharply by 35.1 percent in 2009 and amounted to 62.9 bln US\$ but bounced back in 2010 by 10.4 percent to amount to 69.4 bln US\$, still well below its 2008 level (see table 1 and graph 1). Imports showed a similar development with an increase of 12.2 percent in 2010 to 68.2 bln US\$ (see table 2 and graph 1). This resulted in a trade surplus of 1.2 bln US\$ in 2010 (see graph 1). By MDG regions, large surpluses were recorded with Developed North America (+2.9 bln US\$) and Western Asia (+1.5 bln US\$) (see graph 2). Trade was in deficit with Commonwealth of Independent States (-5.3 bln US\$) and Eastern Asia (-0.8 bln US\$). Trade was diversified across partners: respectively 20 and 15 major partners accounted for 80 percent of exports and imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, machinery and transport equipment (SITC section 7) was the largest commodity group for exports and represented 32.4 percent of exported goods despite its trade dropping by 11.5 percent (see table 1). Exports of manufactured goods classified chiefly by material (SITC section 6) accounted for 31.6 percent of total exports and increased by 33.4 percent. Major destinations for exports were Sweden, Germany and Russian Federation (see table 4). Over the last three years, top export commodities were electrical apparatus for line telephony or line telegraphy (HS code 8517), paper and paperboard, coated on one or both sides with kaolin (HS code 4810) and petroleum oils, other than crude (HS code 2710) (see table 3).

Imports Profile:

Similar to exports, machinery and transport equipment (SITC section 7) was the largest commodity group accounting for 28.7 percent of total imports (see table 2). Other major commodity groups included mineral fuels, lubricants and related materials (SITC section 3) and manufactured goods classified chiefly by material (SITC section 6) respectively with 18.4 and 12.3 percent of imports. Major imported products over the last three years were petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), electrical apparatus for line telephony or line telegraphy (HS code 8517) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) (see table 5).

France including Monaco

Imports: CIF, by origin

Exports: FOB, by last known destination

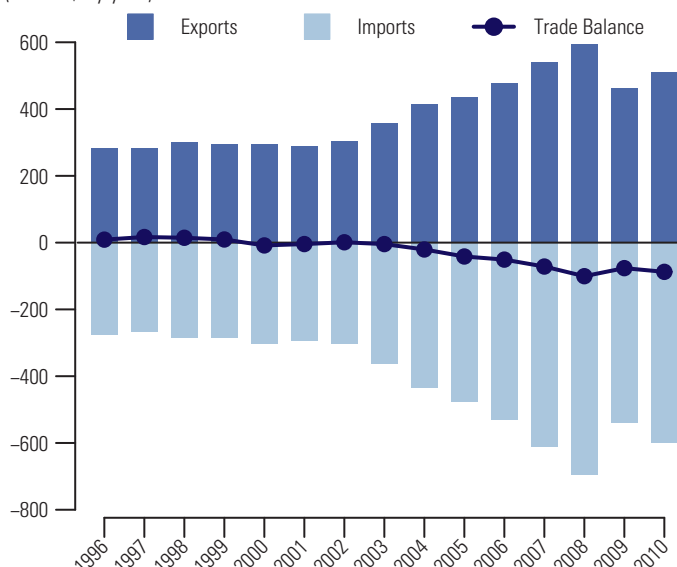

Trade System: Special

Overview:

After several years of continuous growth marked by a peak of 594.5 bln US\$ in 2008, the value of the exports of France, including Monaco contracted sharply by 21.9 percent in 2009 but bounced back in 2010 by 10.2 percent and amounted to 511.7 bln US\$, still well below its 2008 level (see table 1 and graph 1). Imports showed a similar development with an increase of 10.9 percent in 2010 to 599.2 bln US\$ (see table 2 and graph 1). This resulted in a trade deficit of 87.5 bln US\$ in 2010 (see graph 1). By MDG regions, the trade balance recorded large deficits with Developed Europe (-49.3 bln US\$) and Eastern Asia (-31.1 bln US\$) (see graph 2). By partners, 2010 trade was highly diversified: 25 major partners (respectively 21) accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

Machinery and transport equipment (SITC section 7) accounted for 39.0 percent of exports in 2010 (see table 1). Other major commodity groups included chemicals and related products, n.e.s. (SITC section 5) and manufactured goods classified chiefly by material (SITC section 6) respectively with 17.8 and 12.0 percent. In addition to Germany, other major markets for exports in 2010 were Italy and Belgium (see table 4). The major products for exports over the last three years were other aircraft (for example, helicopters, aeroplanes); spacecraft (HS code 8802), medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) (see table 3).

Imports Profile:

Machinery and transport equipment (SITC section 7) also accounted for a large share of imports: 34.1 percent in 2010 (see table 2). Other major commodity groups included miscellaneous manufactured articles (SITC section 8) and chemicals and related products, n.e.s. (SITC section 5) each representing 14.1 percent of imports in 2010. Over the last three years, petroleum oils, both crude and non crude (HS code 2709 and 2710) were, with motor cars and other motor vehicles principally designed for the transport (HS code 8703), the top products for imports (see table 5).

Overview:

From 2006 to 2010, exports of French Polynesia decreased on average by 4.8 percent each year and amounted to 153.2 mln US\$ (see table 1 and graph 1). During the same period, imports increased on average by 2.8 percent each year to 1.7 bln US\$ in 2010 after reaching a peak of 2.2 bln US\$ in 2008 (see table 2 and graph 1). This resulted in a trade deficit of 1.6 bln US\$ in 2010, compared to 2.0 bln US\$ in 2008 (see graph 1). Deficit with Developed Europe was 692.6 mln US\$ (see graph 2). Large deficits were also recorded with South-eastern Asia (-297.1 mln US\$) and Developed Asia-Pacific (-205.9 mln US\$). 2010 trade, especially exports, was very concentrated among a few partners (see graph 3): 5 major partners accounted for 80 percent of exports compared to 9 major partners for imports.

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

Exports were largely composed of manufactured goods classified chiefly by material (SITC section 6), mainly pearls, natural or cultured (see tables 1 and 3). On average, their exports dropped 6.8 percent each year since 2006 but still accounted for more than half of all exports (55.1 percent) (see table 1). China, Hong Kong SAR, the top market for exports, accounted for 30.0 percent of exported goods (see table 4). Other major markets for exports in 2010 were Japan and France. Pearls, natural or cultured (HS code 7101), the top commodity for exports over the last three years, accounted for 54.2 percent of exports in 2010 (see table 3). Other major exported products were other aircraft (for example, helicopters, aeroplanes); spacecraft (HS code 8802) and articles of natural or cultured pearls, precious or semi-precious stones (HS code 7116).

Imports Profile:

Imports were composed of 28.0 percent of machinery and transport equipment (SITC section 7), 23.1 percent of food, live animals, beverages and tobacco (SITC sections 0+1) and 13.0 percent of mineral fuels, lubricants and related materials (SITC section 3) (see table 2). Petroleum oils, other than crude (HS code 2710), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) were the top products for imports over the last three years (see table 5).

Overview:

From 2002 to 2006, exports of Gabon increased on average by 25.7 percent each year and amounted to 6.0 bln US\$ (see table 1). During the same period, imports increased on average by 23.3 percent each year to 1.7 bln US\$ (see table 2). The trade balance recorded a surplus of 4.3 bln US\$ in 2006 compared to 1.7 bln US\$ in 2002 and a deficit of 0.5 bln US\$ in 2003 (see graph 1). By MDG regions, a large surplus was recorded with Developed North America (+3.4 bln US\$) (see graph 2). Significant surpluses were recorded with Eastern Asia (+0.6 bln US\$) and South-eastern Asia (+0.4 bln US\$). Trade, especially exports was concentrated among a few partners: in 2006, 4 major partners accounted for 80 percent of exports compared to 11 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2006, exports of Gabon were largely mineral fuels, lubricants and related materials (SITC section 3): they accounted for 85.6 percent of exported goods (see table 1). Major markets for exports included USA, China and France (see table 4). Exports to USA were almost exclusively mineral fuels, lubricants and related materials (SITC section 3). The top product for exports, petroleum oils, crude (HS code 2709), accounted for 84.4 percent of exported goods (see table 3). Other major products for exports included wood in the rough, whether or not stripped of bark or sapwood (HS code 4403) and manganese ores and concentrates (HS code 2602).

Imports Profile:

In 2006, imports were composed of 42.8 percent of machinery and transport equipment (SITC section 7), 18.5 percent of manufactured goods classified chiefly by material (SITC section 6) and 15.6 percent of food, live animals, beverages and tobacco (SITC sections 0+1) (see table 2). From 2004 to 2006, top imported products included tubes, pipes and hollow profiles, seamless, of iron (other than cast iron) (HS code 7304), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) (see table 5).

Overview:

In 2009, the value of Gambia's exports increased by 383.0 percent and amounted to 66.0 mln US\$ (see table 1 and graph 1). Imports dropped by 5.7 percent to 303.9 mln US\$ (see table 2 and graph 1). The trade deficit narrowed from 308.5 mln US\$ in 2008 to 237.9 mln US\$ in 2009 (see graph 1). Trade was in deficit with all MDG regions. The largest deficit amounted to 89.5 mln US\$ and was recorded with Developed Europe (see graph 2). Deficits with Eastern Asia, South-eastern Asia and Western Asia amounted respectively to 36.5, 29.4 and 23.4 mln US\$. By partners, exports were more concentrated than imports: 6 major partners accounted for more than 80 percent of exports in 2009 (compared to 16 major partners for imports) (see graph 3). See footnote*

Graph 1: Total imports, exports and trade balance

(Mln US\$ by year)

**Exports Profile:**

Food, live animals, beverages and tobacco (SITC sections 0+1) increased on average by 57.3 percent each year since 2005 and accounted for 37.0 percent of exported goods in 2009 (see table 1). Other major commodity groups included manufactured goods classified chiefly by material (SITC section 6) and inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) respectively with 26.0 and 23.6 percent. Top markets for exports in 2009 included Senegal, Guinea and Guinea-Bissau (see table 4). Exports to Senegal and Guinea-Bissau were largely food, live animals, beverages and tobacco (SITC sections 0+1). From 2007 to 2009, top exported products included woven fabric of artificial filament, monofilament yarn (HS code 5408), ground-nut oil, fractions, not chemically modified (HS code 1508) and fish, frozen, whole (HS code 0303) (see table 3).

Imports Profile:

In 2009, imports were composed of 27.0 percent of food, live animals, beverages and tobacco (SITC sections 0+1), 20.3 percent of machinery and transport equipment (SITC section 7) and 15.5 percent of mineral fuels, lubricants and related materials (SITC section 3) (see table 2). Imports of mineral fuels, lubricants and related materials (SITC section 3) decreased by 26.3 percent and was the largest drop compared to other commodity groups. From 2007 to 2009, top imported goods were oils petroleum, bituminous, distillates, except crude (HS code 2710), motor vehicles for transport of persons (except buses) (HS code 8703) and rice (HS code 1006) (see table 5).

Overview:

From 2004 to 2008, Georgia's exports increased on average by 23.3 percent each year to reach 1.5 bln US\$ (see table 1 and graph 1). During the same period, imports increased on average by 34.6 percent each year and exceeded 6.0 bln US\$ in 2008 (see table 2 and graph 1). As a result, trade deficit widened from 1.2 bln US\$ in 2004 to 4.6 bln US\$ in 2008 (see graph 1). This deficit reflected largely trade with three MDG regions: the Commonwealth of Independent States (-1.5 bln US\$), Developed Europe (-1.3 bln US\$) and Western Asia (-1.0 bln US\$) (see graph 2). In 2008, imports were more diversified across partner than exports: 17 major partners accounted for 80 percent of imports (compared to 10 major partners for exports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

Exports of manufactured goods classified chiefly by material (SITC section 6) increased on average by 58.0 percent since 2004 and represented 26.1 percent of total exports in 2008 (see table 1). Other major commodity groups for exports were inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) and food, live animals, beverages and tobacco (SITC sections 0+1): they represented respectively 22.1 and 16.2 percent of exports. In 2008, exports of inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) increased by 25.0 percent while exports of food, live animals, beverages and tobacco (SITC sections 0+1) dropped by 17.2 percent. Turkey, Azerbaijan and Ukraine were the three largest markets for exports (see table 4). From 2006 to 2008, top exported goods were ferro-alloys (HS code 7202), ferrous waste and scrap; remelting scrap ingots of iron or steel (HS code 7204) and copper ores and concentrates (HS code 2603) (see table 3).

Imports Profile:

Georgia's imports were composed of 29.2 percent of machinery and transport equipment (SITC section 7), 18.0 percent of mineral fuels, lubricants and related materials (SITC section 3) and 16.0 percent of manufactured goods classified chiefly by material (SITC section 6) (see table 2). From 2006 to 2008, top products for imports were petroleum oils, other than crude (HS code 2710), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and petroleum gases and other gaseous hydrocarbons (HS code 2711) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 1,466.1 bln US\$ in 2008, the value of the exports of Germany contracted sharply in 2009 (by 23.1 percent) but bounced back in 2010 by 12.7 percent to amount to 1,271.1 bln US\$, still well below its 2008 level (see table 1 and graph 1). Imports showed a similar development with an increase by 13.7 percent to 1,066.8 bln US\$ in 2010 (see table 2 and graph 1). The trade surplus increased from 189.5 bln US\$ in 2009 to 204.3 bln US\$ in 2010 (see graph 1). This surplus was reflected largely by trade with Developed Europe (+160.9 bln US\$) (see graph 2). Surpluses with Western Asia and Developed North America amounted respectively to 33.7 and 31.8 bln US\$. Trade recorded a deficit of 26.5 bln US\$ with Eastern Asia. In 2010, trade was highly diversified across partners: respectively 22 and 20 major partners accounted for 80 percent of respectively exports and imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

Nearly half of Germany's exports (46 percent) were composed of machinery and transport equipment (SITC section 7) (see table 1). Other major commodity groups included chemicals and related products, n.e.s. (SITC section 5) and manufactured goods classified chiefly by material (SITC section 6) respectively with 14.7 and 13.0 percent of exports. France, USA and Netherlands were the top three destinations for Germany's exports (see table 4). Over the last three years, major products for exports included motor cars and other motor vehicles principally designed for the transport (HS code 8703), medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) and parts and accessories of the motor vehicles of headings 87.01 to 87.05 (HS code 8708) (see table 3).

Imports Profile:

In 2010, Germany's imports were composed of 34.0 percent of machinery and transport equipment (SITC section 7) and 12.6 percent each of chemicals and related products, n.e.s. (SITC section 5) and manufactured goods classified chiefly by material (SITC section 6) (see table 2). From 2008 to 2010, top products for imports were petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and petroleum gases and other gaseous hydrocarbons (HS code 2711) (see table 5).

Overview:

Since 2004, Ghana's exports increased on average by 11.7 percent each year and amounted to 3.8 bln US\$ in 2008 (see table 1 and graph 1). During the same period, imports increased on average by 20.3 percent each year to 8.5 bln US\$ (see table 2 and graph 1). The trade balance recorded a deficit of 4.7 bln US\$ in 2008 compared to 1.6 bln US\$ in 2004 (see graph 1). Except Sub-Saharan Africa (+0.3 bln US\$), trade was in deficit with all MDG regions (see graph 2). Large deficits were recorded with Developed Europe (-1.4 bln US\$), Eastern Asia (-1.2 bln US\$) and Developed North America (-0.8 bln US\$). Compared to exports, imports were diversified across partners: in 2008, 20 major partners accounted for 80 percent of imports compared to 10 major partners for exports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

Ghana's exports were dominated by two products: gold (including gold plated with platinum) (HS code 7108) and cocoa beans, whole or broken, raw or roasted (HS code 1801) (see table 3). Exports of gold increased by 17.5 percent in 2008 to reach 1.7 bln US\$, thereby accounting for 45.0 percent of total exports. Exports of cocoa beans, whole or broken, raw or roasted (HS code 1801) increased by 8.7 percent and accounted for 25.6 percent of exported goods. South Africa, the top partner for exports, accounted for 44.0 percent of exported goods (see table 4). Other major destinations for exports in 2008 included the Netherlands and India.

Imports Profile:

In 2008, machinery and transport equipment (SITC section 7) accounted for 36.4 percent of imported goods (see table 2). Other major commodity groups for imports included manufactured goods classified chiefly by material (SITC section 6), mineral fuels, lubricants and related materials (SITC section 3) and food, live animals, beverages and tobacco (SITC sections 0+1) respectively with 17.6, 13.8 and 13.4 percent of imported goods in 2008. From 2006 to 2008, the three major products for imports were petroleum oils, crude (HS code 2709), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and motor vehicles for the transport of goods (HS code 8704) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 25.5 bln US\$ in 2008 the value of exports of Greece contracted sharply in 2009 by 21.4 percent but bounced back in 2010 by 7.5 percent amounting to 21.6 bln US\$, still well below its 2008 level (see table 1 and graph 1). Imports for 2010 decreased by 5.8 percent to 63.3 bln US\$ (see table 2 and graph 1). This resulted in a trade deficit of 41.8 bln US\$ (see graph 1). With the exception of South-Eastern Europe (+1.0 bln US\$), trade was in deficit with all MDG regions (see graph 2). Deficit with Developed Europe, Commonwealth of Independent States and Eastern Asia amounted respectively to 21.1, 7.2 and 6.2 bln US\$. By partners, trade was well diversified: in 2010, 24 and 20 major partners accounted for 80 percent of exports and imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, exports were composed of 22.1 percent of food, live animals, beverages and tobacco (SITC sections 0+1) and 20.0 percent of manufactured goods classified chiefly by material (SITC section 6) (see table 1). Major markets were Germany, Italy and Cyprus (see table 4). In addition to petroleum oils, other than crude (HS code 2710), other major commodities for exports from 2008 to 2010 were medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) and fish, fresh or chilled, excluding fish fillets (HS code 0302) (see table 3).

Imports Profile:

Imports were composed of 24.2 percent of machinery and transport equipment (SITC section 7), 23.5 percent of mineral fuels, lubricants and related materials (SITC section 3) and 15.2 percent of chemicals and related products, n.e.s. (SITC section 5) (see table 2). From 2008 to 2010, the three major products for imports were petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) and cruise ships, excursion boats, ferry-boats, cargo ships, barges (HS code 8901) (see table 5).

Overview:

From 2003 to 2007, Greenland's exports dropped on average by 2.1 percent each year to 319.8 mln US\$ in 2007 (see table 1 and graph 1). During the same period, imports dropped on average by 1.6 percent each year to 432.3 mln US\$ (see table 2 and graph 1). These averages reflected drops mainly in 2007. The trade balance recorded a deficit of 112.5 mln US\$ and was essentially identical to the deficit in 2003 (see graph 1). By MDG regions, trade with Developed Europe recorded a deficit of 111.1 mln US\$ in 2007 (see graph 2). However, trade recorded a surplus of 23.5 mln US\$ with Developed North America. Trade was highly concentrated among a few partners: Denmark accounted for more than 80 percent of exported goods in 2007 (see graph 3). On the imports side, two major partners accounted for 80 percent of imports.

Graph 1: Total imports, exports and trade balance

(Mln US\$ by year)

**Exports Profile:**

Exports were driven by food, live animals, beverages and tobacco (SITC sections 0+1), largely crustaceans and fish products (see table 1). In spite of a drop by 33.0 percent in 2007, they accounted for 72.2 percent of exports. Other major commodity groups included inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) with 11.9 percent of exports. In 2007, major partners were Denmark, Canada and Iceland (see table 4). Exports to Canada were exclusively inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) while exports to Denmark and Iceland were mainly food, live animals, beverages and tobacco (SITC sections 0+1). From 2005 to 2007, the three major products for exports were crustaceans, molluscs and other aquatic invertebrates (HS code 1605), crustaceans, whether in shell or not (HS code 0306) and fish, frozen, excluding fish fillets (HS code 0303) (see table 3).

Imports Profile:

In 2007, imports were composed of 25.8 percent of machinery and transport equipment (SITC section 7), 21.1 percent of food, live animals, beverages and tobacco (SITC sections 0+1) and 16.9 percent of miscellaneous manufactured articles (SITC section 8) (see table 2). Mineral fuels, lubricants and related materials (SITC section 3), almost exclusively non crude petroleum oils, accounted for 14.2 percent. In addition to petroleum oils, other than crude (HS code 2710), other major products for imports over the period from 2005 to 2007 included parts and accessories for use with machines of heading 84.69 to 84.72 (HS code 8473) and other furniture and parts thereof (HS code 9403) (see table 5).

Overview:

From 2005 to 2008, Grenada's exports increased on average by 3.4 percent each year despite a drop of 8.6 percent in 2008 and amounted to 30.5 mln US\$ (see table 1 and graph 1). From 2005 to 2009, imports decreased on average by 4.2 percent each year to 281.8 mln US\$ with a sharp decrease in 2009 of 22.4 percent (see table 2 and graph 1). Trade recorded a deficit of 332.8 mln US\$ in 2008 (see graph 1). Two MDG regions accounted for a large part of this deficit: Latin America and the Caribbean (-144.8 mln US\$) and Developed North America (-116.4 mln US\$) (see graph 2). In 2009, imports were relatively concentrated among a few partners: 10 major partners accounted for 80 percent of imported goods (see graph 3).

Graph 1: Total imports, exports and trade balance

(Mln US\$ by year)

**Exports Profile:**

The drop of exports by 8.6 percent in 2008 was caused largely by manufactured goods: exports of machinery and transport equipment (SITC section 7) and manufactured goods classified chiefly by material (SITC section 6) dropped respectively by 37.7 and 41.8 percent and represented respectively 19.0 and 14.0 percent of exported goods (see table 1). On the contrary, exports of food, live animals, beverages and tobacco (SITC sections 0+1) increased by 23.8 percent and accounted for 58.4 percent of exports. Dominica, USA and Saint Lucia were the three largest markets for exports (see table 4). From 2006 and 2008, top exported products included wheat or meslin flour (HS code 1101), fish, frozen, whole (HS code 0303) and nutmeg, mace and cardamoms (HS code 0908) (see table 3).

Imports Profile:

In 2009, imports of food, live animals, beverages and tobacco (SITC sections 0+1) dropped by 10.6 percent and represented 23.4 percent of imports. Machinery and transport equipment (SITC section 7) and manufactured goods classified chiefly by material (SITC section 6) dropped respectively by 25.7 and 22.5 percent, representing respectively 20.3 and 17.7 percent of imports (see table 2). From 2007 to 2009, top imported products were oils petroleum, bituminous, distillates, except crude (HS code 2710), motor vehicles for transport of persons (except buses) (HS code 8703) and meat, edible offal of domestic poultry (HS code 0207) (see table 5).

Overview:

Since 2006, Guatemala's exports increased on average by 27.5 percent each year and amounted to 8.5 bln US\$ in 2010 (see table 1 and graph 1). During the same period, imports increased on average by 9.7 percent each year to reach 13.8 bln US\$ (see table 2 and graph 1). The trade balance registered a deficit of 5.4 bln US\$ in 2010 compared to 4.3 bln US\$ deficit in 2009 (see graph 1). Deficits with Developed North America, Eastern Asia and Latin America and the Caribbean amounted respectively to 1.8, 1.4 and 1.2 bln US\$ in 2010 (see graph 2). Exports were more concentrated among partners than imports: 11 major partners accounted for 80 percent of exports compared to 14 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, Guatemala's exports were composed of 39.4 percent of food, live animals, beverages and tobacco (SITC sections 0+1), 17.9 percent of miscellaneous manufactured articles (SITC section 8) and 13.3 percent of inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) (see table 1). Major destinations for 2010 were USA, El Salvador and Honduras (see table 4). Over the last three years, top exported products included coffee, whether or not roasted or decaffeinated (HS code 0901), cane or beet sugar and pure sucrose, in solid form (HS code 1701) and women's or girls' blouses, shirts and shirt-blouses, knitted or crocheted (HS code 6106) (see table 3).

Imports Profile:

In 2010, imports were composed of 21.8 percent of machinery and transport equipment (SITC section 7), 19.6 percent of manufactured goods classified chiefly by material (SITC section 6) and 18.1 percent of mineral fuels, lubricants and related materials (SITC section 3) (see table 2). Over the last three years, top imported products were petroleum oils, other than crude (HS code 2710), electrical apparatus for line telephony or line telegraphy (HS code 8517) and medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) (see table 5).

Overview:

From 2004 to 2008, Guinea's exports increased on average by 22.8 percent each year and amounted to 1.4 bln US\$ in 2008 (see table 1 and graph 1). During the same period, imports increased on average by 17.7 percent each year to 1.8 bln US\$ (see table 2 and graph 1). This resulted in a trade deficit of 404.9 mln US\$ in 2008 (see graph 1). Eastern Asia, Developed Asia-Pacific and Sub-Saharan Africa recorded deficits amounting respectively to 119.6, 119.0 and 112.7 mln US\$ (see graph 2). Trade with Commonwealth of Independent States showed a surplus of 174.1 mln US\$. By partners, imports were more diversified than exports: 16 major partners accounted for 80 percent of imports compared to 7 major partners for exports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2008, exports were composed of 54.9 percent of inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) and 32.0 percent of commodities and transactions not classified elsewhere (SITC section 9) (see table 1). Major markets were France, Switzerland and Russian Federation (see table 4). Exports to the Russian Federation were almost exclusively inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4). In addition to aluminium ores and concentrates (HS code 2606), other major commodities for exports from 2006 to 2008 were gold (including gold plated with platinum) (HS code 7108) and artificial corundum, whether or not chemically defined; (HS code 2818) (see table 3).

Imports Profile:

In 2008, mineral fuels, lubricants and related materials (SITC section 3) accounted for 33.0 percent of total imports (see table 2). Other major commodity groups included machinery and transport equipment (SITC section 7) and manufactured goods classified chiefly by material (SITC section 6) respectively with 29.3 and 12.7 percent of imports. From 2006 to 2008, top imported products included petroleum oils, other than crude (HS code 2710), rice (HS code 1006) and parts suitable for use principally with the machinery of headings 84.25 (HS code 8431) (see table 5).

Overview:

From 2006 to 2010, Guyana's exports increased on average by 13.4 percent each year and amounted to 936.7 mln US\$ in 2010 (see table 1 and graph 1). During the same period, imports increased at an average annual rate of 12.9 percent and amounted to 1.4 bln US\$ in 2010 (see table 2 and graph 1). As a result, the trade deficit amounted to 511.5 mln US\$ (see graph 1). By MDG regions, trade recorded deficits with Latin America and the Caribbean (-433.4 mln US\$), Eastern Asia (-84.0 mln US\$) and Developed North America (-75.4 mln US\$) (see graph 2). Trade was in surplus with Developed Europe (+117.8 mln US\$). Trade was relatively concentrated among a few partners: 10 major partners accounted for 80 percent of exports compared to 9 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

Food, live animals, beverages and tobacco (SITC sections 0+1) accounted for 42.9 percent of exports in 2010 (see table 1). Other major commodity groups were commodities and transactions not classified elsewhere (SITC section 9) and inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4). They accounted respectively for 26.6 and 24.5 percent of exports. Exports to Canada, one of the top markets for exports in 2010, were composed of 92.7 percent of commodities and transactions not classified elsewhere (SITC section 9) (see table 4). Other major partners were USA and United Kingdom. From 2008 to 2010, the three major products for exports were gold (including gold plated with platinum) (HS code 7108), rice (HS code 1006) and cane or beet sugar and pure sucrose, in solid form (HS code 1701) (see table 3).

Imports Profile:

In 2010, mineral fuels, lubricants and related materials (SITC section 3) accounted for 29.2 percent of total imports (see table 2). Other major commodity groups included machinery and transport equipment (SITC section 7) and food, live animals, beverages and tobacco (SITC sections 0+1), accounting respectively for 24.8 and 14.0 percent of imports. From 2008 to 2010, in addition to petroleum oils, other than crude (HS code 2710), other major imported goods were medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) and self-propelled bulldozers, angledozers, graders, levellers, scrapers (HS code 8429) (see table 5).

Overview:

Since 2005, the value of the exports of Honduras increased on average by 19.4 percent each year and amounted to 2.6 bln US\$ in 2009 (see table 1 and graph 1). Imports showed a less pronounced pattern with an average annual increase of 7.7 percent to reach 6.0 bln US\$ in 2009 (see table 2 and graph 1). This resulted in a trade deficit of 3.3 bln US\$ (see graph 1). Two MDG regions accounted for a large part of this deficit: Latin America and the Caribbean (-2.1 bln US\$) and Developed North America (-0.9 bln US\$) (see graph 2). By partners, 9 major partners accounted for 80 percent of exports compared to 11 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

Food, live animals, beverages and tobacco (SITC sections 0+1) accounted for 46.0 percent of exported goods in 2009 (see table 1). Other major commodity groups included miscellaneous manufactured articles (SITC section 8) and inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) respectively with 17.5 and 9.8 percent of exported goods. USA, the top partner, accounted for 47.7 percent of exported goods in 2009 (see table 4). Other major destinations for exports in 2009 were El Salvador and Germany. From 2007 to 2009, coffee, whether or not roasted or decaffeinated (HS code 0901), unused postage, revenue or similar stamps of current or new issue (HS code 4907) and bananas, including plantains (HS code 0803) were the three major products for exports (see table 3). They accounted respectively for 19.6, 13.9 and 6.9 percent of exported goods in 2009.

Imports Profile:

In 2009, machinery and transport equipment (SITC section 7) accounted for 21.3 percent of Honduras' imports (see table 2). Other major commodity groups included mineral fuels, lubricants and related materials (SITC section 3) and food, live animals, beverages and tobacco (SITC sections 0+1) respectively with 19.2 and 17.9 percent of imports. From 2007 to 2009, the major imported products were petroleum oils, other than crude (HS code 2710), medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) and motor vehicles for the transport of goods (HS code 8704) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 108.2 bln US\$ in 2008, Hungary's exports decreased sharply in 2009 by 23.7 percent but bounced back in 2010 by 14.7 percent to amount to 94.7 bln US\$, still well below its 2008 level (see table 1 and graph 1). Imports showed a similar development with an increase of 13.0 percent to amount to 87.4 bln US\$ in 2010 (see table 2 and graph 1). This resulted in a trade surplus of 7.3 bln US\$ for the year (see graph 1). Large trade deficits were recorded with Eastern Asia (-9.7 bln US\$) and the Commonwealth of Independent States (-2.0 bln US\$) (see graph 2). Trade recorded large surpluses with Developed Europe (+11.8 bln US\$), South-Eastern Europe (+4.8 bln US\$) and Western Asia (+2.6 bln US\$). By partner, both exports and imports were diversified: in 2010, 16 (respectively 14) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, more than half of Hungary's exports were machinery and transport equipment (SITC section 7), accounting for 57.0 percent of total exports (see table 1). Other major commodity groups included manufactured goods classified chiefly by material (SITC section 6) and chemicals and related products, n.e.s. (SITC section 5) respectively with 9.1 and 8.8 percent of exported goods. In 2010, Germany, the top partner for exports was the destination for 25.2 percent of exported goods (see table 4). Other major partners were Italy and United Kingdom. From 2008 to 2010, top exported commodities were electrical apparatus for line telephony or line telegraphy (HS code 8517), reception apparatus for television (HS code 8528) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) (see table 3).

Imports Profile:

In 2010, nearly half of Hungary's imported goods were machinery and transport equipment (SITC section 7) accounting for 45.9 percent of total imports (see table 2). Other major commodity groups included manufactured goods classified chiefly by material (SITC section 6) and mineral fuels, lubricants and related materials (SITC section 3) respectively with 12.2 and 10.6 percent of imported goods. From 2008 to 2010, top imported products were electrical apparatus for line telephony or line telegraphy (HS code 8517), petroleum gases and other gaseous hydrocarbons (HS code 2711) and parts suitable for use with the apparatus of headings 85.25 to 85.28 (HS code 8529) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 5.4 bln US\$ in 2008, Iceland's exports decreased sharply in 2009 by 24.2 percent but bounced back in 2010 by 13.4 percent to 4.6 bln US\$, still well below its 2008 level (see table 1 and graph 1). Imports exhibited a similar pattern with an increase of 8.9 percent and reached 3.9 bln US\$ in 2010 (see table 2 and graph 1). This resulted in a trade surplus of 674.5 mln US\$ (see graph 1). By MDG regions, large deficits were recorded with Latin America and the Caribbean (-491.6 mln US\$), Eastern Asia (-211.7 mln US\$) and Developed North America (-147.5 mln US\$) (see graph 2). By partners, exports were more concentrated than imports: 10 major partners accounted for 80 percent of exports compared to 15 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, manufactured goods classified chiefly by material (SITC section 6) accounted for 45.8 percent of total exports (see table 1). Other major commodity groups included food, live animals, beverages and tobacco (SITC sections 0+1) and machinery and transport equipment (SITC section 7) respectively with 39.8 and 4.9 percent of exported goods. Top markets for exports were the Netherlands, Germany and United Kingdom (see table 4). Exports to the Netherlands and Germany were largely manufactured goods classified chiefly by material (SITC section 6) while 80.7 percent of exports to the United Kingdom were food, live animals, beverages and tobacco (SITC sections 0+1). From 2008 to 2010, top products for exports were unwrought aluminium (HS code 7601), fish fillets and other fish meat (whether or not minced) (HS code 0304) and fish, dried, salted or in brine (HS code 0305) (see table 3).

Imports Profile:

Machinery and transport equipment (SITC section 7) accounted for 27.2 percent of imports in 2010 (see table 2). Other major commodity groups for imports were inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) and mineral fuels, lubricants and related materials (SITC section 3) respectively accounting for 15.7 and 13.0 percent of imports. In addition to artificial corundum, whether or not chemically defined (HS code 2818), other major imported goods over the period from 2008 to 2010 were petroleum oils, other than crude (HS code 2710) and carbon electrodes, carbon brushes, lamp carbons, battery carbons (HS code 8545) (see table 5).

Overview:

After several years of continuous growth, the value of the India's exports dropped by 2.8 percent in 2009 and amounted to 176.8 bln US\$ (see table 1 and graph 1). Imports showed a more pronounced development with a decline of 15.6 percent in 2009 to 266.4 bln US\$ (see table 2 and graph 1). This resulted in a trade deficit of 89.6 bln US\$ in 2009 (see graph 1). Trade recorded deficits with most MDG regions (see graph 2). The largest deficits were recorded with Eastern Asia (-23.8 bln US\$), Western Asia (-23.4 bln US\$) and Developed Asia-Pacific (-14.2 bln US\$). India's imports and exports were well diversified across partners: in 2009, 25 major partners accounted for 80 percent of imports and even the top 25 partners could not account for 80 percent of exports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2009, exports were composed of 24.8 percent of manufactured goods classified chiefly by material (SITC section 6), 18.0 percent of miscellaneous manufactured articles (SITC section 8) and 15.3 percent of machinery and transport equipment (SITC section 7) (see table 1). The three major partners for exports were United Arab Emirates, USA and China (see table 4). From 2007 to 2009, top exported products were petroleum oils, other than crude (HS code 2710), diamonds, whether or not worked, but not mounted or set (HS code 7102) and articles of jewellery and parts thereof, of precious metal (HS code 7113) (see table 3).

Imports Profile:

Imports were composed of 31.0 percent of mineral fuels, lubricants and related materials (SITC section 3), 21.8 percent of machinery and transport equipment (SITC section 7) and 14.2 percent of manufactured goods classified chiefly by material (SITC section 6) (see table 2). From 2007 to 2009, top imported products were petroleum oils, crude (HS code 2709), gold (including gold plated with platinum) (HS code 7108) and diamonds, whether or not worked, but not mounted or set (HS code 7102) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 137.0 bln US\$ in 2008, the value of Indonesia's exports dropped significantly by 15.0 percent in 2009 but bounced back in 2010 by 35.4 percent to 157.8 bln US\$ to surpass its 2008 level (see table 1 and graph 1). Imports showed a similar development with an increase of 40.1 percent in 2010 to 135.7 bln US\$ (see table 2 and graph 1). The trade surplus increased to 22.1 bln US\$ in 2010 compared to 19.7 bln US\$ in 2009 (see graph 1). Large surpluses were recorded with Developed Asia-Pacific and Southern Asia (both +8.6 bln US\$), Developed Europe (+6.8 bln US\$) and Developed North America (+4.5 bln US\$) (see graph 2). Trade recorded large deficits with South-eastern Asia (-5.5 bln US\$) and Western Asia (-3.1 bln US\$). Indonesia's trade was diversified across partners: 14 and 12 major partners accounted for 80 percent of exports and imports respectively (see graph 3). See footnote*.

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, exports of mineral fuels, lubricants and related materials (SITC section 3) accounted for 29.6 percent of exported goods (see table 1). Other major commodity groups included inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4), manufactured goods classified chiefly by material (SITC section 6) and machinery and transport equipment (SITC section 7) respectively with 23.4, 13.9 and 12.4 percent of exports. Japan, China and USA were the top three trading partners for exports (see table 4). Top exported products over the last three years were coal, briquettes, ovoids etc, made from coal (HS code 2701), palm oil and its fractions, not chemically modified (HS code 1511) and petroleum gases and other gaseous hydrocarbons (HS code 2711) (see table 3).

Imports Profile:

Machinery and transport equipment (SITC section 7) was the largest commodity group for imports in 2010 and accounted for 35.8 percent (see table 2). Imports of mineral fuels, lubricants and related materials (SITC section 3) accounted for 20.3 percent of imported goods. Over the last three years, oils petroleum, bituminous, distillates, except crude (HS code 2710), petroleum oils, oils from bituminous minerals, crude (HS code 2709) and aircraft, spacecraft, satellites (HS code 8802) were the three major imported product groups (see table 5).

Iran (Islamic Republic of)

Imports: CIF, by origin

Exports: FOB, by last known destination

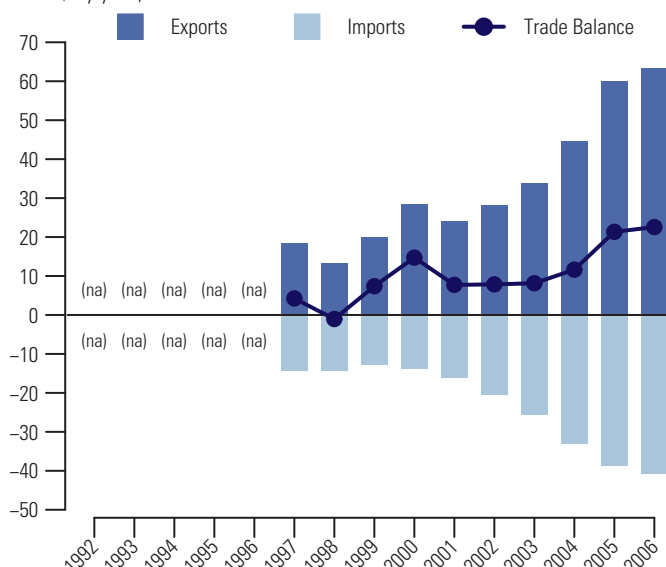

Trade System: Special

Overview:

From 2002 to 2006, exports of the Islamic Republic of Iran increased on average by 22.4 percent each year and amounted to 63.2 bln US\$ (see table 1 and graph 1). During the same period, imports increased on average by 18.9 percent and amounted to 40.7 bln US\$ (see table 2 and graph 1). The trade balance recorded a surplus amounting to 22.6 bln US\$ compared to 7.9 bln US\$ in 2002 (see graph 1). Large surpluses were recorded with Developed Europe (+16.5 bln US\$), Developed Asia-Pacific (+14.0 bln US\$), Eastern Asia (+13.1 bln US\$) and Western Asia (+4.9 bln US\$) (see graph 2). Trade was concentrated among a few partners: in 2006, 6 (respectively 3) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2006, exports of the Islamic Republic of Iran were composed of 83.3 percent of mineral fuels, lubricants and related materials (SITC section 3), largely crude petroleum oils (see table 1). Major partners were Japan, Other Asia, nes and Other Europe, nes (see table 4). From 2004 to 2006, top exported commodities included petroleum oils, crude (HS code 2709), petroleum gases and other gaseous hydrocarbons (HS code 2711) and other nuts, fresh or dried (HS code 0802) (see table 3). In 2006, petroleum oils, crude (HS code 2709) accounted for 79.4 percent of exports.

Imports Profile:

In 2006, commodities and transactions not classified elsewhere in the SITC (SITC section 9) accounted for 76.8 percent of imports of the Islamic Republic of Iran (see table 2). From 2004 to 2006, major products for imports included petroleum oils, other than crude (HS code 2710), flat-rolled products of iron or non-alloy steel (HS code 7208) and iron and non-alloy steel in ingots or other primary forms (HS code 7206) (see table 5).

Overview:

After two years of continuous growth marked by a peak of 127.1 bln US\$ in 2008, the value of the exports of Ireland dropped by 8.0 percent in 2009 but bounced back by 1.4 percent to 118.5 bln US\$ in 2010, still well below its 2008 level (see table 1 and graph 1). Imports showed a further decrease of 3.6 percent in 2010 to 60.3 bln US\$ (see table 2 and graph 1). The trade surplus increased steadily to 58.2 bln US\$ in 2010 (see graph 1). The majority of this surplus is accounted for by trade with Developed Europe (+33.6 bln US\$) and Developed North America (+19.5 bln US\$) (see graph 2). Trade with Southern Asia recorded a deficit of 281.9 mln US\$. Both exports and imports were relatively diversified across partners: 9 (respectively 12) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, exports of chemicals and related products, n.e.s. (SITC section 5) increased by 4.3 percent and continued to account for the majority of exported goods (58.5 percent) (see table 1). Exports of machinery and transport equipment (SITC section 7), the second largest commodity group, dropped by 22.8 percent and represented 12.3 percent of exports. The top three partners for exports were USA, United Kingdom and Belgium (see table 4). The majority of exports to USA and 90.2 percent of exports to Belgium were chemicals and related products, n.e.s. (SITC section 5) in 2010. Over the last three years, top exported products were medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004), heterocyclic compounds with nitrogen hetero-atom(s) only (HS code 2933) and nucleic acids and their salts (HS code 2934) (see table 3).

Imports Profile:

In 2010, imports of machinery and transport equipment (SITC section 7) dropped by 17.9 percent, but was still the largest commodity group, and accounted for 27.0 percent of imported goods (see table 2). Imports of chemicals and related products, n.e.s. (SITC section 5) and miscellaneous manufactured articles (SITC section 8) accounted respectively for 19.1 and 13.5 percent of all imports. From 2008 to 2010, top imported goods were petroleum oils, other than crude (HS code 2710), other aircraft (for example, helicopters, aeroplanes); spacecraft (HS code 8802) and parts and accessories for use with machines of heading 84.69 to 84.72 (HS code 8473) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 61.3 bln US\$ in 2008, the value of the exports of Israel dropped by 21.9 percent in 2009 and amounted to 47.9 bln US\$ (see table 1 and graph 1). Imports showed a more pronounced development with a decline of 27.3 percent in 2009 to 47.4 bln US\$ (see table 2 and graph 1). Trade balance increased from a deficit of 3.8 bln US\$ in 2008 to a surplus of 0.6 bln US\$ in 2009 (see graph 1). By MDG regions, trade with Developed North America recorded a surplus of 11.2 bln US\$ (see graph 2). However, trade recorded a deficit amounting to 8.0 bln US\$ with Developed Europe. Israel's trade was diversified across partners: in 2009, 16 (respectively 14) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2009, exports were composed of 30.7 percent of machinery and transport equipment (SITC section 7), 30.2 percent of manufactured goods classified chiefly by material (SITC section 6) and 25.0 percent of chemicals and related products, n.e.s. (SITC section 5) (see table 1). In addition to the USA, other major partners for exports in 2009 included China, Hong Kong SAR and Belgium (see table 4). Exports to these countries were in majority manufactured goods classified chiefly by material (SITC section 6). From 2007 to 2009, top commodities for exports were diamonds, whether or not worked, but not mounted or set (HS code 7102), medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) and electrical apparatus for line telephony or line telegraphy (HS code 8517) (see table 3).

Imports Profile:

Machinery and transport equipment (SITC section 7) and manufactured goods classified chiefly by material (SITC section 6) accounted respectively for 30.5 and 21.4 percent of imported goods in 2009 (see table 2). Other major commodity groups were mineral fuels, lubricants and related materials (SITC section 3) and chemicals and related products (SITC section 5), respectively with 17.0 and 11.9 percent of imports. From 2007 to 2009, top imported products were diamonds, whether or not worked, but not mounted or set (HS code 7102), petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) (see table 5).

Overview:

From 2006 to 2010, Italy's exports increased on average by 1.8 percent each year to reach 447.5 bln US\$ (see table 1 and graph 1). During the same period, imports increased on average by 2.4 percent each year to 486.6 bln US\$ in 2010, after having reached a peak in 2008 with 561.0 bln US\$ (see table 2 and graph 1). The trade balance recorded a deficit of 39.2 bln US\$ in 2010 compared to 25.4 bln US\$ in 2006 (see graph 1). Large deficits were recorded with Eastern Asia (-24.5 bln US\$), the Commonwealth of Independent States (-16.2 bln US\$) and Northern Africa (-14.9 bln US\$) (see graph 2). However, trade recorded surpluses with Developed North America (+13.3 bln US\$) and Western Asia (+8.1 bln US\$). In 2010, Italy's trade was highly diversified across partners: even the 25 major partners could not account for 80 percent of exports and 24 major partners accounted for 80 percent of imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, imports were composed of 35.5 percent of machinery and transport equipment (SITC section 7), 19.0 percent of manufactured goods classified chiefly by material (SITC section 6) and 17.1 percent of miscellaneous manufactured articles (SITC section 8) (see table 1). The top three destinations for exported goods were Germany, France and USA; they accounted jointly for nearly a third (30.4 percent) of exports in 2010 (see table 4). Over the last three years, top products for exports were petroleum oils, other than crude (HS code 2710), medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) and parts and accessories of the motor vehicles of headings 87.01 to 87.05 (HS code 8708) (see table 3).

Imports Profile:

Machinery and transport equipment (SITC section 7) accounted for 27.2 percent of imports in 2010 (see table 2). Other major commodity groups included mineral fuels, lubricants and related materials (SITC section 3) and manufactured goods classified chiefly by material (SITC section 6) respectively with 18.9 and 14.3 percent of imported goods. Major imported products were petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and petroleum gases and other gaseous hydrocarbons (HS code 2711) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 2.4 bln US\$ in 2008, the value of the exports of Jamaica contracted sharply in 2009 (by 46.0 percent) but slightly increased again in 2010 by 0.9 percent to amount to 1.3 bln US\$, still well below its 2008 level (see table 1 and graph 1). Imports showed a similar development with an increase by 3.2 percent to 5.2 bln US\$ in 2010 (see table 2 and graph 1). This resulted in a trade deficit of 3.9 bln US\$ in 2010, a bit higher than the deficit of 3.7 bln US\$ in 2009 (see graph 1). Two MDG regions accounted for a large part of this deficit: Latin America and the Caribbean (-2.0 bln US\$) and Developed North America (-1.1 bln US\$). In 2010, 6 (respectively 10) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, top commodity groups for Jamaica's exports were inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4), food, live animals, beverages and tobacco (SITC sections 0+1) and mineral fuels, lubricants and related materials (SITC section 3), accounting respectively for 41.9, 23.6 and 21.2 percent of total exports (see table 1). The three largest markets for exported goods were USA, Canada and United Kingdom (see table 4). Over the last three years, top exported products were artificial corundum, whether or not chemically defined (HS code 2818), petroleum oils, other than crude (HS code 2710) and alcohol of a strength by volume of 80% vol or higher (HS code 2207) (see table 3).

Imports Profile:

In 2010, Jamaica's imports were mostly composed of mineral fuels, lubricants and related materials (SITC section 3), food, live animals, beverages and tobacco (SITC sections 0+1) and machinery and transport equipment (SITC section 7) (see table 2). They accounted respectively for 30.3, 17.0 and 15.2 percent of imported goods. From 2008 to 2010, petroleum oils, both crude and non crude (HS code 2709 and 2710), together with medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004), were the top products for imports (see table 5).

Overview:

After several years of continuous growth marked by a peak of 781.4 bln US\$ in 2008, Japan's exports decreased sharply in 2009 by 25.7 percent but bounced back in 2010 by 32.6 percent to 769.8 bln US\$, still well below its 2008 level (see table 1 and graph 1). Imports exhibited a similar pattern with an increase of 25.5 percent and reached 692.6 bln US\$ in 2010 (see table 2 and graph 1). The trade balance recorded a surplus amounting to 77.2 bln US\$ (see graph 1). The trade balance was in surplus with Eastern Asia (+100.6 bln US\$), Developed North America (+49.8 bln US\$) and Developed Europe (+20.6 bln US\$) (see graph 2). Trade balance showed a deficit with Western Asia (-81.8 bln US\$) and Developed Asia-Pacific (-29.6 bln US\$). Japan's trade was diversified across partners: in 2008, 16 (respectively 17) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

Japan's exports were largely machinery and transport equipment (SITC section 7) (see table 1). It accounted for 59.5 percent of exports in 2010. Other major commodity groups included manufactured goods classified chiefly by material (SITC section 6) and chemicals and related products, n.e.s. (SITC section 5), accounting respectively for 13.0 and 10.2 percent of exports. China, USA and the Republic of Korea were the top three markets for exports in 2010 (see table 4). From 2008 to 2010, top exported products were motor cars and other motor vehicles principally designed for the transport (HS code 8703), electronic integrated circuits (HS code 8542) and parts and accessories of the motor vehicles of headings 87.01 to 87.05 (HS code 8708) (see table 3).

Imports Profile:

In 2010, Japan's imports were composed of 28.7 percent of mineral fuels, lubricants and related materials (SITC section 3), 23.3 percent of machinery and transport equipment (SITC section 7) and 12.2 percent of miscellaneous manufactured articles (SITC section 8) (see table 2). From 2008 to 2010, top imported products were petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), petroleum gases and other gaseous hydrocarbons (HS code 2711) and coal; briquettes, ovoids and similar solid fuels manufactured from coal (HS code 2701) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 7.8 bln US\$ in 2008, the value of the exports of Jordan dropped by 18.2 percent in 2009 but bounced back by 10.3 percent to amount to 7.0 bln US\$, still below its 2008 level (see table 1 and graph 1). Imports showed a similar development increasing by 8.4 percent in 2010 to 15.3 bln US\$ (see table 2 and graph 1). This resulted in a trade deficit of 8.2 bln US\$ in 2010 (see graph 1). By MDG regions, trade with Developed Europe, Eastern Asia and Western Asia recorded deficits amounting to 2.7, 2.3 and 2.1 bln US\$ respectively (see graph 2). In 2010, trade was diversified across partners: 19 major partners accounted for 80 percent of imports (compared to 14 major partners for exports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, exports of chemicals and related products, n.e.s. (SITC section 5), the largest commodity group, increased by 30.4 percent and accounted for 33.8 percent of exported goods (see table 1). Other major commodity groups for exports included miscellaneous manufactured articles (SITC section 8) and food, live animals, beverages and tobacco (SITC sections 0+1), representing 18.0 and 15.6 percent of exports, respectively. Iraq, USA and India were the three largest markets for exports (see table 4). Exports to USA were almost exclusively miscellaneous manufactured articles (SITC section 8) while exports to India were in majority chemicals and related products, n.e.s. (SITC section 5) (see table 4). From 2008 to 2010, top products for exports were mineral or chemical fertilisers, potassic (HS code 3104), other garments, knitted or crocheted (HS code 6114) and medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) (see table 3).

Imports Profile:

Jordan's imports were composed of 23.0 percent of machinery and transport equipment (SITC section 7), 22.1 percent of mineral fuels, lubricants and related materials (SITC section 3) and 17.2 percent of manufactured goods classified chiefly by material (SITC section 6) (see table 2). The three main imported goods over the last three years were petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and petroleum oils, other than crude (HS code 2710) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 71.2 bln US\$ in 2008, the value of the exports of Kazakhstan contracted sharply in 2009 (by 39.3 percent) but bounced back in 2010 by 32.5 percent to amount to 57.2 bln US\$, still well below its 2008 level (see table 1 and graph 1). Imports, on the other hand, continued to decrease in 2010 (by 15.4 percent) to reach 24.0 bln US\$ (see table 2 and graph 1). This resulted in a trade surplus of 33.2 bln US\$, higher than the 2009 surplus of 14.8 bln US\$ (see graph 1). This surplus is largely accounted for by trade with Developed Europe (+23.3 bln US\$) (see graph 2). However, trade recorded a deficit of 1.9 bln US\$ with the Commonwealth of Independent States. By partner, trade was relatively diversified in 2010: 15 (respectively 13) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

Since 2006, exports of mineral fuels, lubricants and related materials (SITC section 3) increased on average by 11.8 percent each year and accounted for more than two-thirds (71.7 percent) of exported goods in 2010 (see table 1). Other major commodity group for exports included manufactured goods classified chiefly by material (SITC section 6); it accounted for 13.0 percent of exports. In 2010, major destinations for exports were China, Italy and France; the combined value accounted for 42.2 percent of total exports (see table 4). Petroleum oils, crude (HS code 2709), the top export commodity accounted for 64.6 percent of exports in 2010 (see table 3). Other major products were refined ferro-alloys (HS code 7202) and copper and copper alloys, unwrought (HS code 7403).

Imports Profile:

In 2010, Kazakhstan imports were mostly composed of machinery and transport equipment (SITC section 7), manufactured goods classified chiefly by material (SITC section 6) and chemicals and related products, n.e.s. (SITC section 5) (see table 2). They accounted respectively for 40.5, 18.1 and 11.9 percent of imports. Top imported products over the last three years were petroleum oils, crude (HS code 2709), other tubes and pipes (for example, welded, riveted or similarly closed) (HS code 7305) and petroleum oils, other than crude (HS code 2710) (see table 5).

Overview:

After several years of continuous growth, the value of Kenya's exports dropped by 10.7 percent in 2009 to 4.5 bln US\$ (see table 1). Imports showed a similar development with a peak of 11.1 bln US\$ in 2008 and a drop of 8.3 percent in 2009 to amount to 10.2 bln US\$ (see table 2 and graph 1). This resulted in a trade deficit of 5.7 bln US\$ for 2009, compared to 6.1 bln US\$ for the previous year (see graph 1). Trade with Western Asia accounted for a large part of the 2009 deficit (-1.6 bln US\$) (see graph 2). The trade balance also recorded significant deficits with Eastern Asia (-1.1 bln US\$), Southern Asia (-0.9 bln US\$) and Developed Europe (-0.7 bln US\$). Trade was diversified across partners: in 2009, 19 (respectively 18) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2009, Kenya's exports were composed of 41.9 percent of food, live animals, beverages and tobacco (SITC sections 0+1), 16.0 percent of inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) and 12.3 percent of manufactured goods classified chiefly by material (SITC section 6) (see table 1). Major destinations for exports were Uganda, the United Kingdom and the United Republic of Tanzania (see table 4). The majority (64.7 percent) of exports to the United Kingdom were food, live animals, beverages and tobacco (SITC sections 0+1). From 2007 to 2009, top exported products were tea, whether or not flavoured (HS code 0902), cut flowers and flower buds of a kind suitable for bouquets (HS code 0603) and other vegetables, fresh or chilled (HS code 0709) (see table 3). They accounted respectively for 20.0, 9.4 and 3.9 percent of exported goods in 2009.

Imports Profile:

Imports of Kenya in 2009 were composed of 30.4 percent of machinery and transport equipment (SITC section 7), 21.4 percent of mineral fuels, lubricants and related materials (SITC section 3) and 13.8 percent of manufactured goods classified chiefly by material (SITC section 6) (see table 2). From 2007 to 2009, top imported products were petroleum oils, other than crude (HS code 2710), petroleum oils, crude (HS code 2709) and palm oil and its fractions (HS code 1511) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 422.0 bln US\$ in 2008, the value of the exports of the Republic of Korea dropped by 13.9 percent in 2009 and amounted to 363.5 bln US\$ (see table 1 and graph 1). Imports showed a similar development with a decline of 25.8 percent in 2009 to 323.1 bln US\$ (see table 2 and graph 1). This resulted in a trade surplus of 40.4 bln US\$ in 2009 compared to a deficit of 13.3 bln US\$ in 2008 (see graph 1). By MDG regions, trade recorded large surpluses with Eastern Asia (+50.4 bln US\$), Latin America & the Caribbean (+14.4 bln US\$) and Developed Europe (+10.5 bln US\$) (see graph 2). Trade deficits were recorded with two MDG regions: Developed Asia-Pacific (-37.2 bln US\$) and Western Asia (-35.7 bln US\$). Trade, especially exports, was well diversified across partners: in 2009, 24 (respectively 17) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

Machinery and transport equipment (SITC section 7) accounted for the majority of exported goods in 2009 with a share of 56.8 percent. Other major commodity groups for exports included manufactured goods classified chiefly by material (SITC section 6) and chemicals and related products, n.e.s. (SITC section 5) respectively with 13.2 and 10.3 percent of exports. China, USA and Japan were the three major markets for exported goods in 2009. From 2007 to 2009, top exported products included cruise ships, excursion boats, ferry-boats, cargo ships, barges (HS code 8901), electrical apparatus for line telephony or line telegraphy (HS code 8517) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) (see table 3).

Imports Profile:

In 2009, imports were composed of 30.0 percent of machinery and transport equipment (SITC section 7), 28.4 percent of mineral fuels, lubricants and related materials (SITC section 3) (in majority crude petroleum oils) and 13.4 percent of manufactured goods classified chiefly by material (SITC section 6) (see table 2). Petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), electronic integrated circuits and microassemblies (HS code 8542) and petroleum gases and other gaseous hydrocarbons (HS code 2711) were the three major imported goods from 2007 to 2009 (see table 5).

Overview:

After two years of continuous growth marked by a peak of 87.5 bln US\$ in 2008, the value of the exports of Kuwait dropped in 2009 to reach 51.9 bln US\$ (see table 1 and graph 1). Imports increased in 2008 by 16.3 percent to amount to 24.8 bln US\$ (see table 2 and graph 1). Trade balance recorded a surplus of 62.7 bln US\$ in 2008 (see graph 1). In 2008, deficit with Developed Europe amounted to 6.5 bln US\$ (see graph 2). Large deficits were also recorded with Eastern Asia (-3.8 bln US\$), Developed Asia-Pacific (-3.0 bln US\$), Developed North America (-2.6 bln US\$) and Western Asia (-1.4 bln US\$) in 2008. In 2009, exports were concentrated among partners: 90.2 percent of exported goods were classified as exports to Areas, nes (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2009, exports were composed of 90.3 percent of mineral fuels, lubricants and related materials (SITC section 3) (see table 1). Major destinations for exports in 2009 included China, the United Arab Emirates and Saudi Arabia (see table 4). From 2007 to 2009, top exported products were petroleum oils, oils from bituminous minerals, crude (HS code 2709), oils petroleum, bituminous, distillates, except crude (HS code 2710) and petroleum gases and other gaseous hydrocarbons (HS code 2711) (see table 3).

Imports Profile:

In 2008, machinery and transport equipment (SITC section 7) accounted for 40.8 percent of imported goods (see table 2). Other major commodity groups included manufactured goods classified chiefly by material (SITC section 6) and food, live animals, beverages and tobacco (SITC sections 0+1), accounting respectively for 22.1 and 14.1 percent of imports. From 2007 to 2009, top imported products were motor vehicles for transport of persons (except buses) (HS code 8703), iron and non-alloy steel in ingots or other primary forms (HS code 7206) and machinery, plant or laboratory equipment (HS code 8419) (see table 5).

Overview:

After three years of continuous growth marked by a peak of 1.6 bln US\$ in 2008, the value of the exports of Kyrgyzstan significantly dropped by 27.2 percent in 2009 but bounced back by 26.3 percent to 1.5 bln US\$ in 2010 (see table 1 and graph 1). Imports showed a similar development increasing by 8.4 percent in 2010 to 3.2 bln US\$ (see table 2 and graph 1). This resulted in a trade deficit of 1.7 bln US\$ in 2010, compared to 2.5 bln US\$ in 2008 (see graph 1). Deficit with the Commonwealth of Independent States alone amounted to 1.2 bln US\$ (see graph 2). Major deficit was also recorded with Eastern Asia (-687.0 mln US\$). Trade was concentrated among a few partners: in 2010, 5 (respectively 7) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, 56.4 percent of exports were reported as commodities and transactions not classified elsewhere (SITC section 9) (see table 1). Other major commodity groups for exports included food, live animals, beverages and tobacco (SITC sections 0+1) and miscellaneous manufactured articles (SITC section 8), respectively with 12.8 and 9.5 percent of exported goods. Major destinations for exports were Switzerland, United Arab Emirates and Russian Federation (see table 4). Exports to Switzerland were almost exclusively commodities and transactions not classified elsewhere (SITC section 9). Over the last three years, top products for exports were gold (including gold plated with platinum) (HS code 7108), women's or girls' suits, ensembles, jackets, blazers, dresses, skirts (HS code 6204) and electrical energy (HS code 2716) (see table 3).

Imports Profile:

In 2010, imports were composed of 26.5 percent of mineral fuels, lubricants and related materials (SITC section 3), 21.5 percent of machinery and transport equipment (SITC section 7) and 15.4 percent of food, live animals, beverages and tobacco (SITC sections 0+1). In addition to petroleum oils, other than crude (HS code 2710), other major imported goods over the last three years were medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) and petroleum gases and other gaseous hydrocarbons (HS code 2711) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 9.3 bln US\$ in 2008, the value of the exports of Latvia dropped by 22.7 percent in 2009 and amounted to 7.2 bln US\$ (see table 1 and graph 1). Imports showed a more pronounced development with a decline of 40.8 percent in 2009 to 9.3 bln US\$ (see table 2 and graph 1). The trade deficit narrowed from 6.5 bln US\$ in 2008 to 2.2 bln US\$ in 2009 (see graph 1). Deficit with Developed Europe (-1.9 bln US\$) accounted for a large share of the overall trade deficit (see graph 2). Significant deficits were also recorded with Commonwealth of Independent States (-0.5 bln US\$) and Eastern Asia (-0.2 bln US\$). Latvia's trade was relatively diversified across partners: 14 major partners (respectively 13) accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2009, exports were composed of 21.2 percent of manufactured goods classified chiefly by material (SITC section 6) and 20.5 percent of machinery and transport equipment (SITC section 7) (see table 1). Exports of food, live animals, beverages and tobacco (SITC sections 0+1) dropped by 14.2 percent to account for 16.2 percent of exported goods. Top markets for exports were Lithuania, Estonia and Russian Federation (see table 4). Over the last three years, top commodities for exports included wood sawn or chipped lengthwise, sliced or peeled (HS code 4407), other bars and rods of iron or non-alloy steel (HS code 7214) and medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) (see table 3).

Imports Profile:

In 2009, imports of most commodity groups dropped (see table 2). Imports of machinery and transport equipment (SITC section 7) and mineral fuels, lubricants and related materials (SITC section 3) dropped respectively by 56.7 percent and 34.1 percent and accounted for 20.2 and 16.4 percent of total. From 2007 to 2009, top imported products were petroleum oils, other than crude (HS code 2710), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and petroleum gases and other gaseous hydrocarbons (HS code 2711) (see table 5).

Overview:

From 2005 to 2009, Lebanon's exports increased on average by 16.7 percent each year and amounted to 3.5 bln US\$ in 2009 (see table 1 and graph 1). During the same period, imports increased on average by 14.9 percent each year to 16.2 bln US\$ (see table 2 and graph 1). Trade balance recorded a deficit of 12.7 bln US\$ in 2009 compared to 7.4 bln US\$ in 2005 (see graph 1). Trade was in deficit with nearly all MDG regions (see graph 2). In 2009, deficit with Developed Europe alone was 5.2 bln US\$. Major deficits were also recorded with Developed North America and Eastern Asia (-1.8 bln US\$ for both). Lebanon's trade was well diversified across partners: in 2009, 18 major partners accounted for 80 percent of exports compared to 21 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2009, major commodity groups for export include commodities and transactions not classified elsewhere (SITC section 9), manufactured goods classified chiefly by material (SITC section 6) and machinery and transport equipment (SITC section 7), accounting respectively for 24.4, 18.6 and 15.9 percent of exports (see table 1). Switzerland, United Arab Emirates and Iraq were the three major markets for exported goods in 2009 (see table 4). Exports to Switzerland were largely commodities and transactions not classified elsewhere in the SITC (SITC section 9). From 2007 to 2009, the top three exported products were gold (including gold plated with platinum) (HS code 7108), ferrous waste and scrap; remelting scrap ingots of iron or steel (HS code 7204) and mineral or chemical fertilisers, phosphatic (HS code 3103) (see table 3).

Imports Profile:

In 2009, Lebanon's imports were composed of 26.7 percent of machinery and transport equipment (SITC section 7), 19.9 percent of mineral fuels, lubricants and related materials (SITC section 3) and 14.6 percent of manufactured goods classified chiefly by material (SITC section 6) (see table 2). From 2007 to 2009, the three major imported products were petroleum oils, other than crude (HS code 2710), motor cars and other motor vehicles principally designed for the transport (HS code 8703), medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 23.8 bln US\$ in 2008, the value of the exports of Lithuania contracted sharply in 2009 by 30.6 percent but bounced back by 26.2 percent to 20.8 bln US\$ in 2010 (see table 1 and graph 1). Imports showed a similar development with an increase of 27.5 percent in 2010 to 23.4 bln US\$ (see table 2 and graph 1). The trade deficit increased from 1.8 bln US\$ in 2009 to 2.6 bln US\$ in 2010 (see graph 1). Commonwealth of Independent States accounted for a large share of this deficit: 2.8 bln US\$ (see graph 2). Trade was relatively diversified across partners: 14 (respectively 11) major partners accounted for 80 percent of exports (respectively imports) in 2009 (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, exports of mineral fuels, lubricants and related materials (SITC section 3), largely non crude petroleum oils, increased by 38.2 percent and accounted for 23.4 percent of exported goods (see table 1). Other major commodity groups for exports included machinery and transport equipment (SITC section 7) and food, live animals, beverages and tobacco (SITC sections 0+1) and respectively with 17.7 and 16.4 percent of exported goods. Russian Federation, Germany and Latvia were the top three destinations for exports (see table 4). Over the last three years, petroleum oils, other than crude (HS code 2710), other furniture and parts thereof (HS code 9403) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) were the top three products for exports (see table 3).

Imports Profile:

Imports of mineral fuels, lubricants and related materials (SITC section 3), machinery and transport equipment (SITC section 7) and chemicals and related products, n.e.s. (SITC section 5) accounted for 32.0, 19.4 and 13.4 percent of imported goods, respectively. From 2008 to 2010, top imported products were: petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), petroleum gases and other gaseous hydrocarbons (HS code 2711) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 17.7 bln US\$ in 2008, the value of the exports of Luxembourg contracted sharply in 2009 (by 27.6 percent) but bounced back in 2010 by 8.6 percent to amount to 13.9 bln US\$, still well below its 2008 level (see table 1 and graph 1). Imports showed a similar development with an increase by 9.8 percent to 20.5 bln US\$ in 2010 (see table 2 and graph 1). This resulted in a trade deficit of 6.6 bln US\$ in 2010, slightly higher than the 2009 deficit of 5.9 bln US\$ (see graph 1). This deficit came largely from trade with Developed Europe (-6.4 bln US\$) (see graph 2). Trade, however, recorded small surpluses with Western Asia (+224.3 mln US\$) and Commonwealth of Independent States (+215.7 mln US\$) among others. Compared to imports, exports were diversified across partners: 11 major partners accounted for 80 percent of exports compared to 7 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2010, exports were composed of 45.6 percent of manufactured goods classified chiefly by material (SITC section 6) and 22.6 percent of machinery and transport equipment (SITC section 7) (see table 1). The three largest markets for exported goods were Germany, France and Belgium (see table 4). From 2008 to 2010, the top three commodities for exports were angles, shapes and sections of iron or non-alloy steel (HS code 7216), sheet piling of iron or steel (HS code 7301) and flat-rolled products of iron or non-alloy steel (HS code 7210) (see table 3).

Imports Profile:

In 2010, machinery and transport equipment (SITC section 7) and manufactured goods classified chiefly by material (SITC section 6) accounted respectively for 29.4 and 16.8 percent of imported goods (see table 2). From 2008 to 2010, top imported goods were petroleum oils, other than crude (HS code 2710), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and ferrous waste and scrap; remelting scrap ingots of iron or steel (HS code 7204) (see table 5).

Overview:

After three years of continuous increase marked by a peak of 1.7 bln US\$ in 2008, the value of Madagascar's exports dropped by 34.3 percent in 2009 and amounted to 1.1 bln US\$ (see table 1 and graph 1). Imports showed a less pronounced development with a drop by 18.0 percent in 2009 to 3.2 bln US\$ (see table 2 and graph 1). This resulted in a trade deficit of 2.1 bln US\$ (see graph 1). Large deficits were recorded with South-eastern Asia (-711.8 mln US\$), Eastern Asia (-473.5 mln US\$) and Sub-Saharan Africa (-282.5 mln US\$) (see graph 2). In 2009, exports were concentrated among a few partners while imports were diversified: 10 major partners accounted for 80 percent of exports compared to 15 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

Madagascar's exports were composed largely of miscellaneous manufactured articles (SITC section 8). In 2009, its exports dropped by half and represented 43.3 percent of total exports (see table 1). Other major commodity groups for exports were food, live animals, beverages and tobacco (SITC sections 0+1) and manufactured goods classified chiefly by material (SITC section 6), respectively with 26.2 and 8.8 percent of exports. France, USA and Germany were the three largest markets for exports (see table 4). Over the last three years, top exported products were jerseys, pullovers, cardigans, waist-coats and similar articles (HS code 6110), men's or boys' suits, ensembles, jackets, blazers, trousers (HS code 6203) and women's or girls' suits, ensembles, jackets, blazers, dresses, skirts (HS code 6204) (see table 3).

Imports Profile:

In 2009, manufactured goods classified chiefly by material (SITC section 6) and machinery and transport equipment (SITC section 7) accounted respectively for 36.1 and 27.9 percent of imported goods (see table 2). Other major commodity groups included mineral fuels, lubricants and related materials (SITC section 3) (10.4 percent) and food, live animals, beverages and tobacco (SITC sections 0+1) (8.0 percent). Over the last three years, top imported products were petroleum oils, other than crude (HS code 2710), structures (excluding prefabricated buildings of heading 94.06) (HS code 7308) and yarn of carded wool, not put up for retail sale (HS code 5106) (see table 5).

Overview:

From 2006 to 2010, Malawi's exports increased on average by 12.5 percent each year despite a drop of 10.2 percent in 2010 and amounted to 1066.2 mln US\$ (see table 1 and graph1). During the same period, imports increased on average by 15.8 percent each year to 2173.0 mln US\$ (see table 2). The trade deficit increased from 0.8 bln US\$ in 2009 to 1.1 bln US\$ in 2010 (see graph 1). By MDG regions, the deficit with Sub-Saharan Africa amounted to 0.7 bln US\$ in 2010 (see graph 2). Other major deficits were recorded with Eastern Asia (-200.1 mln US\$) and Southern Asia (-156.4 mln US\$). Malawi's trade was diversified across partners in 2010: 15 major partners accounted for 80 percent of both exports and imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

Malawi's exports were largely food, live animals, beverages and tobacco (SITC sections 0+1): they accounted for 74.7 percent of exported goods in 2010 (see table 1). Other major commodity groups for exports included inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) and miscellaneous manufactured articles (SITC section 8) respectively with 16.0 and 3.6 percent of exports. Major markets for exports were Belgium, Canada and Egypt (see table 4). Exports to Belgium and Egypt were largely food, live animals, beverages and tobacco (SITC sections 0+1). The major product for exports was unmanufactured tobacco; tobacco refuse (HS code 2401): it accounted for 54.9 percent of exports in 2010 (see table 3). Other top products were tea, whether or not flavoured (HS code 0902) and cane or beet sugar and pure sucrose, in solid form (HS code 1701).

Imports Profile:

In 2010, imports of chemicals and related products, n.e.s. (SITC section 5) increased by 14.7 percent and accounted for 24.5 percent of imported goods (see table 2). Other major commodity goods for imports were machinery and transport equipment (SITC section 7) and manufactured goods classified chiefly by material (SITC section 6) respectively with 23.7 and 15.9 percent of imports. Top imported good from 2008 to 2010 were petroleum oils, other than crude (HS code 2710), mineral or chemical fertilisers, nitrogenous (HS code 3102) and mineral or chemical fertilisers (HS code 3105) (see table 5).

Overview:

From 2006 to 2010, Malaysia's exports increased on average by 5.5 percent each year and amounted to 198.8 bln US\$ in 2010, reaching its previous level of 2008 after a significant decline in 2009 (see table 1). Imports increased on average by 5.8 percent each year and reached 164.6 bln US\$ (see table 2). This resulted in a trade surplus of 34.2 bln US\$ in 2010, slightly higher than surplus in 2009 of 33.6 bln US\$ (see graph 1). Trade were in surpluses with most MDG regions (see graph 2). Large surpluses were recorded with Southern Asia (+8.4 bln US\$), Eastern Asia (+8.1 bln US\$), South-eastern Asia (+5.8 bln US\$) and Developed Asia-Pacific (+4.5 bln US\$) among others. By partners, both imports and exports were diversified: 14 major partners accounted for 80 percent of exports and 13 major partners for imports in 2010 (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2010, exports of machinery and transport equipment (SITC section 7), the largest commodity group, increased by 19.4 percent and represented for 43.9 percent of total (see table 1). Second largest commodity group, mineral fuels, lubricants and related materials (SITC section 3), went up by 35.7 percent and represented 15.8 percent. Top markets for exported goods were Singapore, China and Japan (see table 4). Exports to Singapore and China were largely machinery and transport equipment (SITC section 7). Top exported products were electronic integrated circuits and microassemblies (HS code 8542), petroleum gases and other gaseous hydrocarbons (HS code 2711) and automatic data processing machines and units thereof (HS code 8471) (see table 3).

Imports Profile:

Similar to exports, the largest commodity group for 2010 imports was machinery and transport equipment (SITC section 7) (see table 2). It accounted for 49.5 percent of total. Other major commodity groups included manufactured goods classified chiefly by material (SITC section 6) and mineral fuels, lubricants and related materials (SITC section 3), respectively represented for 12.4 and 10.0 percent of total. Electronic integrated circuits and microassemblies (HS code 8542), petroleum oils, other than crude (HS code 2710) and parts and accessories for use with machines of heading 84.69 to 84.72 (HS code 8473) were the top three imported goods over the last three years (see table 5).

Overview:

Since 2004, Maldives' exports dropped on average by 7.1 percent each year and amounted to 126.4 mln US\$ in 2008 (see table 1 and graph 1). During the same period, imports increased more than twofold (on average by 21.3 percent each year) to 1.4 bln US\$ (see table 2 and graph 1). This resulted in a trade deficit amounting to 1.3 bln US\$ compared to a deficit of 0.5 bln US\$ in 2004 (see graph 1). By MDG regions, the trade balance recorded a deficit of 430.5 mln US\$ with South-eastern Asia (see graph 2). Other significant deficits were recorded with Western Asia (-264.1 mln US\$) and Southern Asia (-214.5 mln US\$). Trade, especially exports, was concentrated among a few partners: in 2008, 5 major partners accounted for 80 percent of exports compared to 10 major partners for imports (see graph 3). In addition, Thailand, the top partner for exports, was the destination for nearly half of exported goods (see table 4).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

Food, live animals, beverages and tobacco (SITC sections 0+1) accounted for a large part of Maldives' exports (see table 1). In 2008, their exports increased by 17.3 percent and they accounted for 98.4 percent of exported goods. Thailand, Sri Lanka and France, the three major markets in 2008 accounted respectively for 49.0, 9.5 and 8.8 percent of exported goods (see table 4). Over the last three years, top products for exports included fish, frozen, excluding fish fillets (HS code 0303), fish, fresh or chilled, excluding fish fillets (HS code 0302) and fish fillets and other fish meat (whether or not minced) (HS code 0304) (see table 3).

Imports Profile:

In 2008, machinery and transport equipment (SITC section 7) accounted for 26.6 percent of imported goods (see table 2). Imports of mineral fuels, lubricants and related materials (SITC section 3) increased by 55.0 percent and represented 22.7 percent of imports. Other major commodity groups for imports included food, live animals, beverages and tobacco (SITC sections 0+1) and manufactured goods classified chiefly by material (SITC section 6) respectively with 15.4 and 15.1 percent of imports. In addition to petroleum oils, other than crude (HS code 2710), top products for imports over the last three years included wood sawn or chipped lengthwise, sliced or peeled (HS code 4407) and petroleum gases and other gaseous hydrocarbons (HS code 2711) (see table 5).

Overview:

From 2004 to 2008, Mali's exports increased on average by 18.1 percent each year to 1.9 bln US\$ (see table 1 and graph 1). During the same period, imports increased on average by 25.1 percent each year to reach 3.3 bln US\$ (see table 2 and graph 1). The trade balance in 2008 recorded a deficit of 1.4 bln US\$ compared to 0.4 bln in 2004 (see graph 1). Deficit with Developed Europe alone amounted to 813.9 mln US\$ (see graph 2). Significant deficits were also recorded with Eastern Asia (-322.3 mln US\$) and Developed North America (-223.1 mln US\$). Trade recorded a surplus of 376.8 mln US\$ with Sub-Saharan Africa. Mali's exports were concentrated among a few partners: 3 major partners accounted for 80 percent of exports compared to 14 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

Commodities and transactions not classified elsewhere (SITC section 9), almost exclusively gold, was the largest commodity group for exports and accounted for 75.2 percent of Mali's exports (see table 1). Other major commodity groups included inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) and food, live animals, beverages and tobacco (SITC sections 0+1) respectively with 11.1 and 6.7 percent of exports. South Africa, Senegal and Côte d'Ivoire were the three major markets for exports in 2008 (see graph 2). Trade with South Africa accounted for 72.5 percent of exports and was almost exclusively gold. From 2006 to 2008, major products for exports were gold (including gold plated with platinum) (HS code 7108), cotton, not carded or combed (HS code 5201) and live bovine animals (HS code 0102) (see table 3).

Imports Profile:

In 2008, machinery and transport equipment (SITC section 7), mineral fuels, lubricants and related materials (SITC section 3) and manufactured goods classified chiefly by material (SITC section 6) accounted respectively for 25.8, 21.4 and 20.5 percent of Mali's imported goods (see table 2). Other major commodity groups for imports included chemicals and related products, n.e.s. (SITC section 5) (14.1 percent) and food, live animals, beverages and tobacco (SITC sections 0+1) (10.8 percent). Top imported goods were petroleum oils, other than crude (HS code 2710), portland cement, aluminous cement, slag cement (HS code 2523) and medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) (see table 5).

Overview:

After two years of continuous growth marked by a peak of 3.2 bln US\$ in 2007, the value of Malta's exports dropped by 24.7 percent in 2009 and amounted to 2.3 bln US\$, well below its 2003 level (see table 1 and graph 1). Imports showed a less pronounced development with an overall increase over the last five years (an average annual growth rate of 1.1 percent) (see table 2 and graph 1). In 2009, it declined by 21.5 percent to 4.0 bln US\$ (see table 2 and graph 1). This resulted in a trade deficit of 1.8 bln US\$ in 2009, compared to 2.1 bln US\$ in 2008 (see graph 1). Trade balance of Developed Europe, nearly -2.0 bln US\$, accounted for a large part of this deficit (see graph 2). Surpluses were recorded with South-eastern Asia (+132.1 mln US\$) and Northern Africa (+80.0 mln US\$). By partners, Malta's trade was relatively diversified: 14 (respectively 12) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

Machinery and transport equipment (SITC section 7) was the largest commodity group for exports in 2009: it accounted for the majority (57.4 percent) of exported goods (see table 1). Its exports dropped by 23.9 percent in 2009. Other major commodity groups included miscellaneous manufactured articles (SITC section 8) and chemicals and related products, n.e.s. (SITC section 5) respectively with 17.2 and 11.9 percent of exported goods. Top partners for exports were Germany, Singapore and France (see table 4). Exports to Singapore and France were largely machinery and transport equipment (SITC section 7). From 2007 to 2009, diodes, transistors and similar semiconductor devices (HS code 8541) was the top commodity group and accounted for 39.7 percent of exports in 2009 (see table 3). Other major exported products included medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) and electrical apparatus for switching or protecting electrical circuits (HS code 8536).

Imports Profile:

Imports of machinery and transport equipment (SITC section 7) dropped by 16.0 percent in 2009 and accounted for 39.7 percent of imported goods (see table 2). Imports of food, live animals, beverages and tobacco (SITC sections 0+1) and miscellaneous manufactured articles (SITC section 8) decreased respectively by 17.1 percent and 21.3 percent, representing respectively 15.2 percent and 11.9 percent of total imports. From 2007 to 2009, top imported goods included electronic integrated circuits (HS code 8542), petroleum oils, other than crude (HS code 2710) and other aircraft (for example, helicopters, aeroplanes); spacecraft (HS code 8802) (see table 5).

Overview:

Since 2004, Mauritania's exports increased on average by 39.1 percent each year and amounted to 1.6 bln US\$ in 2008 (see table 1). During the same period, imports increased on average by 5.1 percent each year to 1.6 bln US\$ (see table 2). As a result, trade deficit reduced from 65.6 mln US\$ in 2003 to 10.5 mln US\$ in 2008 (see graph 1). By MDG regions, trade was in surplus with Developed Europe (+200.4 mln US\$), Eastern Asia (+45.0 mln US\$) and Developed Asia-Pacific (+32.6 mln US\$) (see graph 2). A large surplus was also recorded with unknown partners (not shown). Trade recorded deficit with the Commonwealth of Independent States (-162.6 mln US\$), South-eastern Asia (-115.9 mln US\$) and Latin America and the Caribbean (-75.6 mln US\$) among others. Compared to imports, exports were concentrated among a few partners: in 2008, 7 major partners accounted for 80 percent of exports compared to 13 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2008, Mauritania's exports were in majority inedible crude materials (excluding fuels), vegetable and animal oils, fats and waxes (SITC sections 2+4): they accounted for 55.5 percent of exported goods (see table 1). Exports of mineral fuels, lubricants and related materials (SITC section 3) dropped by 3.6 percent and represented 20.1 percent of exported goods while exports of commodities and transactions not classified elsewhere (SITC section 9) increased by 89.8 percent to account for 12.9 percent. In 2008, major destinations for exported goods were France, Germany and China (see table 4). Top exported products between 2007 and 2008 included iron ores and concentrates, roasted iron pyrites (HS code 2601), petroleum oils, oils from bituminous minerals, crude (HS code 2709) and fish, frozen, whole (HS code 0303) (see table 3). They accounted respectively for 47.5, 20.1 and 11.1 percent of exports in 2008.

Imports Profile:

In 2008, imports of mineral fuels, lubricants and related materials (SITC section 3) increased by 31.2 percent and accounted for 35.0 percent of imported goods (see table 2). Other major commodity groups for imports included food, live animals, beverages and tobacco (SITC sections 0+1) and machinery and transport equipment (SITC section 7) respectively with 24.1 and 20.2 percent of imports. From 2006 to 2008, top imported products were oils petroleum, bituminous, distillates, except crude (HS code 2710), wheat and meslin (HS code 1001) and solid cane or beet sugar and chemically pure sucrose (HS code 1701) (see table 5).

Overview:

From 2005 to 2009, the value of the exports of Mauritius dropped on average by 4.7 percent each year and amounted to 1.8 bln US\$ (see table 1 and graph 1). Imports showed a continuous increase marked by a peak of 4.7 bln US\$ in 2008 before declining by 20.2 percent in 2009 to 3.7 bln US\$ (see table 2 and graph 1). The trade deficit narrowed from 2.3 bln US\$ in 2008 to 2.0 bln US\$ in 2009 (see graph 1). Deficits with Southern Asia and Eastern Asia amounted respectively to 747.8 and 556.8 mln US\$ in 2009. The trade balance recorded a surplus of 216.6 mln US\$ with Developed Europe. By partners, exports were more concentrated than imports: 9 major partners accounted for 80 percent of exports compared to 16 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

Two commodity groups accounted for a large part of Mauritius' exports: miscellaneous manufactured articles (SITC section 8) and food, live animals, beverages and tobacco (SITC sections 0+1) represented respectively 49.3 and 33.9 percent of exported goods in 2009 (see table 1). Exports of miscellaneous manufactured articles (SITC section 8) dropped on average by 0.2 percent each year since 2005 while food, live animals, beverages and tobacco (SITC sections 0+1) increased on average by 1.0 percent each year. In addition to United Kingdom, other major destinations for exports included France and USA (see table 4). Major exported products over the last three years were t-shirts, singlets and other vests, knitted or crocheted (HS code 6109), cane or beet sugar and pure sucrose, in solid form (HS code 1701) and prepared or preserved fish; caviar (HS code 1604) (see table 3).

Imports Profile:

In 2009, imports were composed of 23.4 percent of machinery and transport equipment (SITC section 7), 20.4 percent of food, live animals, beverages and tobacco (SITC sections 0+1) and 18.1 percent of manufactured goods classified chiefly by material (SITC section 6) (see table 2). Over the last three years, top imported products included petroleum oils, other than crude (HS code 2710), fish, frozen, excluding fish fillets (HS code 0303) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) (see table 5).

Overview:

In 2009, the value of the exports of Mayotte dropped by 12.4 percent and amounted to 6.8 mln US\$ (see table 1 and graph 1). Imports showed a continuous growth with a peak of 606.3 mln US\$ in 2008 before dropping by 17.2 percent in 2009 to 501.9 mln US\$ (see table 2 and graph 1). This resulted in a trade deficit of 495.1 mln US\$ in 2009 (see graph 1). Deficit with Developed Europe alone amounted to 320.5 mln US\$ (see graph 2). Significant deficits were also recorded with South-eastern Asia (-40.4 mln US\$) and Western Asia (-39.5 mln US\$). By partners, exports were highly concentrated: 3 major partners accounted for 80 percent of exports compared to 14 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Mln US\$ by year)

**Exports Profile:**

In 2009, exports of machinery and transport equipment (SITC section 7) increased by 2.0 percent and accounted for 56.6 percent of exported goods (see table 1). Exports of food, live animals, beverages and tobacco (SITC sections 0+1) decreased by 1.7 percent and represented 15.8 percent. France, the top partner, was the destination of 52.9 percent of exports in 2009 (see table 4). Other major markets for exported goods were Comoros and Madagascar. From 2007 to 2009, top exported products included motor cars and other motor vehicles principally designed for the transport (HS code 8703), fish, fresh or chilled, excluding fish fillets (HS code 0302) and essential oils (terpeneless or not), including concretes (HS code 3301) (see table 3).

Imports Profile:

Imports of machinery and transport equipment (SITC section 7) decreased by 7.1 percent in 2009 and represented 35.1 percent of imported goods (see table 2). Other major commodity groups for imports included food, live animals, beverages and tobacco (SITC sections 0+1) and manufactured goods classified chiefly by material (SITC section 6) respectively with 22.8 and 13.0 percent of imports. From 2007 to 2009, top imported products were petroleum oils, other than crude (HS code 2710), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and fishing vessels; factory ships and other vessels for processing (HS code 8902) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 291.3 bln US\$ in 2008, the value of the exports of Mexico dropped in 2009 (by 21.1 percent) but bounced back in 2010 by 29.9 percent to amount to 298.3 bln US\$ (see table 1 and graph 1). Imports showed a similar development with an increase of 28.6 percent to 301.5 bln US\$ in 2010. The trade deficit decreased from 4.7 bln US\$ in 2009 to 3.2 bln US\$ in 2010 (see graph 1). By MDG regions, major deficits were recorded with Eastern Asia (-58.5 bln US\$), Developed Europe (-18.9 bln US\$) and Developed Asia-Pacific (-13.5 bln US\$) (see graph 2). However, a large surplus was recorded with Developed North America (+95.5 bln US\$). Trade, especially exports, was highly concentrated among a few partners: USA, the top market for Mexico's exports accounted for 80 percent of exported goods in 2010 and 7 major partners accounted for 80 percent of imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

The majority of Mexico's exported goods in 2010 were machinery and transport equipment (SITC section 7): they represented 55.6 percent of exports (see table 1). Other major commodity groups included mineral fuels, lubricants and related materials (SITC section 3) and miscellaneous manufactured articles (SITC section 8), respectively 13.8 and 9.1 percent of exports. The three major markets for exports were USA, Canada and China (see table 4). From 2008 to 2010, top exported products were petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), reception apparatus for television (HS code 8528) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) (see table 3).

Imports Profile:

In 2010, machinery and transport equipment (SITC section 7) also accounted for a large share of imports: they represented 47.2 percent of imports (see table 2). Manufactured goods classified chiefly by material (SITC section 6), chemicals and related products, n.e.s. (SITC section 5) and miscellaneous manufactured articles (SITC section 8) accounted respectively for 13.6, 11.3 and 9.4 percent of imported goods. From 2008 to 2010, major imported goods were petroleum oils, other than crude (HS code 2710), parts and accessories of the motor vehicles of headings 87.01 to 87.05 (HS code 8708) and electrical apparatus for line telephony or line telegraphy (HS code 8517) (see table 5).

Overview:

From 2003 to 2007, Mongolia's exports increased on average by 32.3 percent each year to reach 1.9 bln US\$ in 2007 (see table 1 and graph 1). During the same period, imports increased on average by 27.5 percent each year to 2.1 bln US\$ in 2007 (see table 2 and graph 1). The trade balance turned from a surplus of 56.7 mln US\$ in 2006 to a deficit of 230.5 mln US\$ in 2007, largely due to an increase of imports by 42.5 percent. The trade balance was in surplus with Eastern Asia (+641.6 mln US\$) and Developed North America (+181.2 mln US\$) (see graph 2). However, trade recorded a deficit of 740.4 mln US\$ with the Commonwealth of Independent States. Trade, especially exports, was highly concentrated among a few partners (see graph 3). China alone accounted for 74.2 percent of exported goods in 2007. In addition, 6 major partners accounted for 80 percent of imports.

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

Two commodity groups accounted for a large part of Mongolia's exports: inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) and commodities and transactions not classified elsewhere (SITC section 9) (see table 1). From 2003 to 2007, exports of inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) increased on average by 50.2 percent each year and accounted for 71.0 percent of total exports in 2007. In addition to China, other major markets for exports were Canada and USA (see table 4). Exports to China were composed of 83.0 percent of inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) while exports to Canada and USA were largely gold. From 2005 to 2007, the three major exported products were copper ores and concentrates (HS code 2603), gold (including gold plated with platinum) (HS code 7108) and zinc ores and concentrates (HS code 2608) (see table 4). They accounted respectively for 43.0, 12.5 and 9.3 percent of exports in 2007.

Imports Profile:

In 2007, Mongolia's imports increased by 42.5 percent driven largely by machinery and transport equipment (SITC section 7) and manufactured goods classified chiefly by material (SITC section 6) (see table 2). Imports of these commodity groups increased respectively by 48.6 and 46.6 percent and represented 29.5 and 15.4 percent of imports. Mineral fuels, lubricants and related materials (SITC section 3), largely non crude petroleum oils, accounted for 26.9 percent of imported goods. From 2005 to 2007, top imported products were petroleum oils, other than crude (HS code 2710), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and unused postage, revenue or similar stamps of current or new issue (HS code 4907) (see table 5).

Overview:

From 2006 to 2010, Montenegro's exports decreased on average by 5.9 percent each year to reach 436.6 mln US\$ (see table 1 and graph 1). During the same period, imports increased on average by 4.3 percent each year to 2.2 bln US\$ in 2010, after having reached a peak in 2008 with 3.7 bln US\$ (see table 2 and graph 1). The trade balance recorded a deficit of 1.7 bln US\$ in 2010. By MDG regions, trade recorded large deficits with Developed Europe (-668.6 mln US\$), South-eastern Europe (-643.2 mln US\$) and Eastern Asia (-140.1 mln US\$) (see graph 2). By partners, exports were more concentrated than imports: 7 major partners accounted for 80 percent of exports compared to 13 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

Manufactured goods classified chiefly by material (SITC section 6) represented 47.6 percent of exported goods in 2010 (see table 1). Other major commodity groups for exports include inedible crude materials (excluding fuels), vegetable and animal oils, fats and waxes (SITC sections 2+4) and food, live animals, beverages and tobacco (SITC sections 0+1), respectively with 13.9 and 13.6 percent of exports. Major markets for exports included Serbia, Greece and Italy (see table 4). Over the last three years, main products for exports included unwrought aluminum (HS code 7601), other alloy steel in ingots or other primary forms (HS code 7224) and wine of fresh grapes, including fortified wines (HS code 2204) (see table 3).

Imports Profile:

Montenegro's imports were composed of 23.4 percent of food, live animals, beverages and tobacco (SITC sections 0+1), 20.6 percent of machinery and transport equipment (SITC section 7) and 16.1 percent of manufactured goods classified chiefly by material (SITC section 6) (see table 2). Over the last three years, top three products for imports were petroleum oils, other than crude (HS code 2710), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and electrical energy (HS code 2716) (see table 5).

Overview:

After two years of continuous growth marked by a peak of 4.1 mln US\$ in 2008, the value of the exports of Montserrat dropped in 2009 and 2010 to reach 1.1 mln US\$ (see table 1 and graph 1). Imports recorded a peak of 38.0 mln US\$ in 2008 before dropping by 22.2 percent in 2009 to 29.6 mln US\$ (see table 2 and graph 1). The trade balance recorded a deficit of 26.5 mln US\$ in 2009 (see graph 1). Developed North America accounted with 20.3 mln US\$ for a major part of this deficit (see graph 2). Trade was also in deficit with Latin America & the Caribbean (-2.2 mln US\$) and Developed Europe (-2.1 mln US\$). Montserrat's trade was highly concentrated among a few countries for exports in 2010: 4 major partners accounted for 80 percent of exports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Mln US\$ by year)

Exports Profile:

In 2010, exported goods were largely inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) and machinery and transport equipment (SITC section 7) (see table 1). They accounted for, respectively, 56.8 and 31.1 percent of exports in 2010. USA, France and Anguilla were the top three markets for exports (see table 4). From 2008 to 2010, the three major exported products were natural sands of all kinds (HS code 2505), surveying (including photogrammetrical surveying), hydrographic instruments (HS code 9015) and self-propelled bulldozers, angledozers, graders, levellers, scrapers (HS code 8429) (see table 3).

Imports Profile:

In 2009, the top commodity group for imports was mineral fuels, lubricants and related materials (SITC section 3) (see table 2). Even though with a decrease of 41.5 percent, it accounted for 26.7 percent of total imports. Other major commodities were machinery and transport equipment (SITC section 7) with 20.2 percent and food, live animals, beverages and tobacco (SITC sections 0+1) with 19.8 percent. In addition to petroleum oils, other than crude (HS code 2710), other major products for imports from 2007 to 2009 included motor cars and other motor vehicles principally designed for the transport (HS code 8703) and meat and edible offal, of the poultry of heading 01.05 (HS code 0207) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 20.3 bln US\$ in 2008, Morocco's exports decreased sharply in 2009 by 31.4 percent but bounced back in 2010 by 27.1 percent to 17.7 bln US\$, still well below its 2008 level (see table 1 and graph 1). Imports exhibited a less pronounced development with an increase of 4.3 percent to reach 34.5 bln US\$ in 2010 (see table 2 and graph 1). The trade balance recorded a deficit amounting to 16.7 bln US\$ (see graph 1). Trade was in deficit with most of the MDG regions (see graph 2). Significant trade deficits were recorded with Developed Europe (-5.6 bln US\$), Western Asia (-3.8 bln US\$) and Eastern Asia (-2.4 bln US\$) among others (see graph 2). Morocco's trade was diversified across partners: in 2010, 17 (respectively 18) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, Morocco's exports were composed of 20.4 percent of machinery and transport equipment (SITC section 7), 20.0 percent of chemical and related products, n.e.s. (SITC section 5) and 18.9 percent of miscellaneous manufactured articles (SITC section 8 (see table 1)). The three largest markets for exports were France, Spain and India (see table 4). The majority of exports to India were chemicals and related products, n.e.s. (SITC section 5). From 2008 to 2010, top products for exports were diphosphorus pentaoxide; phosphoric acid (HS code 2809), insulated (including enamelled or anodised) wire, cable (HS code 8544) and natural calcium phosphates (HS code 2510) (see table 3).

Imports Profile:

In 2010, Morocco's imports were composed of 27.3 percent of machinery and transport equipment (SITC section 7), 25.8 percent of mineral fuels, lubricants and related materials (SITC section 3) and 15.8 percent of manufactured goods classified chiefly by material (SITC section 6) (see table 2). From 2008 to 2010, petroleum products were the top three products for imports: petroleum oils, crude (HS code 2709), petroleum oils, other than crude (HS code 2710) and petroleum gases and other gaseous hydrocarbons (HS code 2711) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 2.6 bln US\$ in 2008, the value of the exports of Mozambique dropped in 2009 but increased again in 2010 by 4.5 percent to amount to 2.2 bln US\$, still well below its 2008 level (see table 1 and graph 1). Imports, on the other hand, continued to decrease (in 2010 by 5.3 percent) to reach 3.6 bln US\$. This resulted in a trade deficit of 1.3 bln US\$ in 2010, slightly lower than the 2009 deficit of 1.6 bln US\$ (see graph 1). This deficit came largely from trade with Sub-Saharan Africa (-0.8 bln US\$), Southern Asia (-0.2 bln US\$) and Western Asia (-0.2 bln US\$) (see graph 2). Trade, however, recorded a surplus with Developed Europe (+0.3 bln US\$). Exports were more concentrated among partners: in 2010, 4 major partners accounted for 80 percent of exported goods compared to 12 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, manufactured goods classified chiefly by material (SITC section 6) was the largest commodity group for exports and accounted for 52.4 percent of exported goods (see table 1). Other major commodity groups included mineral fuels, lubricants and related materials (SITC section 3) and food, live animals, beverages and tobacco (SITC sections 0+1) with respectively 19.9 percent and 13.9 percent of exports. Netherlands, the top partner for exports, accounted for 52.7 percent of exported goods (see table 4). Other major destinations for exports in 2010 included South Africa and Portugal. A large share of exports to Netherlands (98.1 percent) were manufactured goods classified chiefly by material (SITC section 6). Top exported products over the last three years were unwrought aluminium (HS code 7601), electrical energy (HS code 2716) and unmanufactured tobacco; tobacco refuse (HS code 2401) (see table 3).

Imports Profile:

Imports of machinery and transport equipment (SITC section 7) decreased by 14.6 percent and accounted for 26.0 percent of imported goods (see table 2). Imports of mineral fuels, lubricants and related materials (SITC section 3), on the other hand, increased by 22.2 percent and represented 19.9 percent of imported goods. Other major commodity groups included commodities and transactions not classified elsewhere (SITC section 9) and manufactured goods classified chiefly by material (SITC section 6) respectively with 17.3 and 12.6 percent of imports in 2010. Top imported products over the last three years were petroleum oils, other than crude (HS code 2710), motor vehicles for the transport of goods (HS code 8704) and electrical energy (HS code 2716) (see table 5).

Overview:

From 2004 to 2008, both Namibia's exports and imports increased on average by 18.0 percent each year and amounted to 4.7 bln US\$ (see tables 1, 2 and graph 1). The trade balance recorded a surplus of 40.8 mln US\$ compared to 24.2 mln US\$ in 2004 (see graph 1). By MDG regions, trade recorded a large deficit with Sub-Saharan Africa (-1.2 bln US\$) (see graph 2). However, large surpluses were recorded with Developed Europe (+784.2 mln US\$) and Developed North America (+493 mln US\$). In 2008, trade, especially imports, was very concentrated among a few partners: 8 major partners (respectively 4) accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2008, manufactured goods classified chiefly by material (SITC section 6), which accounted for 27.8 percent of exported goods, dropped by 15.5 percent (see table 1). Other major commodity groups included food, live animals, beverages and tobacco (SITC sections 0+1) and inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4), both accounted for 22.2 percent of exports. South Africa, the largest market for exports, was the destination for 32.0 percent of exported goods in 2008 (see table 4). United Kingdom was another major partner and 96.5 percent of its exports were manufactured goods classified chiefly by material (SITC section 6). From 2006 to 2008, top exported commodities were diamonds, whether or not worked, but not mounted or set (HS code 7102), unused postage, revenue or similar stamps of current or new issue (HS code 4907) and unwrought zinc (HS code 7901) (see table 3).

Imports Profile:

Namibia's imports were composed of 31.1 percent of machinery and transport equipment (SITC section 7), 18.7 percent of manufactured goods classified chiefly by material (SITC section 6) and 13.6 percent of mineral fuels, lubricants and related materials (SITC section 3) (see table 2). Top imported products were petroleum oils, other than crude (HS code 2710), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and motor vehicles for the transport of goods (HS code 8704) (see table 5).

Overview:

In 2010, exports of Nepal decreased by 5.9 percent to 834.0 mln US\$ (see table 1). During the same period, imports increased by 36.6 percent to 5.1 bln US\$ (see table 2). This resulted in a trade deficit of 4.3 bln US\$ in 2010 (see graph 1). By MDG regions, trade with Southern Asia alone accounted for a large part of this deficit (-2.3 bln US\$) (see graph 2). Significant deficits were also recorded with Eastern Asia and Western Asia (-0.7 bln US\$ and -0.5 bln US\$ respectively). Trade was concentrated among a few partners: in 2010, 4 (respectively 5) major partners accounted for 80 percent of exports (respectively imports) (see graph 3). See footnote*.

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

Manufactured goods classified chiefly by material (SITC section 6) accounted for 54.2 percent of exports in 2010 (see table 1). Other major commodity groups included food, live animals, beverages and tobacco (SITC sections 0+1) and miscellaneous manufactured articles (SITC section 8), respectively with 18.6 and 13.9 percent of exports. Major markets for exports included India, USA and Bangladesh (see table 4). In 2010, top products for exports were flat-rolled products of iron or non-alloy steel (HS code 7210), carpets and other textile floor coverings, knotted, whether or not made up (HS code 5701) and dried leguminous vegetables, shelled, whether or not skinned or split (HS code 0713) (see table 3).

Imports Profile:

In 2010, imports of machinery and transport equipment (SITC section 7) accounted for 24.5 percent of imported goods (see table 2). Other major commodity groups for imports included manufactured goods classified chiefly by material (SITC section 6) and mineral fuels, lubricants and related materials (SITC section 3), respectively with 19.8 and 15.7 percent of imports. In 2010, top imported products included petroleum oils, other than crude (HS code 2710), gold (including gold plated with platinum) (HS code 7108) and semi-finished products of iron or non-alloy steel (HS code 7207) (see table 5).

Overview:

After several years of continuous growth, the value of the Netherlands' exports dropped by 20.9 percent in 2009 and amounted to 431.5 bln US\$ (see table 1 and graph 1). Imports showed a similar development with a decline of 22.8 percent in 2009 to 382.2 bln US\$ (see table 2 and graph 1). This resulted in a trade deficit of 49.3 bln US\$ in 2009 (see graph 1). Trade with Eastern Asia, Developed North America and South-eastern Asia recorded deficits respectively of 26.0, 12.3 and 10.3 bln US\$ in 2009 (see graph 2). Major trade surplus was recorded with Developed Europe (+110.4 bln US\$). Netherlands' trade was diversified across partners: in 2009, 18 (respectively 19) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2009, exports were composed of 26.8 percent of machinery and transport equipment (SITC section 7), 16.1 percent of commodities and transactions not classified elsewhere (SITC section 9) and 14.0 percent of chemicals and related products, n.e.s. (SITC section 5) (see table 1). In addition to Germany, other major markets for exports in 2009 included Belgium and France (see table 4). From 2007 to 2009, top exported commodities were petroleum oils, other than crude (HS code 2710), automatic data processing machines and units thereof (HS code 8471) and printing machinery used for printing by means of the printing type, blocks (HS code 8443) (see table 3).

Imports Profile:

Similar to exports, machinery and transport equipment (SITC section 7) accounted for a large share of imports: 28.2 percent (see table 2). Other major commodity groups included commodities and transactions not classified elsewhere (SITC section 9) and mineral fuels, lubricants and related materials (SITC section 3) respectively with 14.6 and 13.2 percent of imported goods. From 2007 to 2009, top import commodities were petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), petroleum oils, other than crude (HS code 2710) and automatic data processing machines and units thereof (HS code 8471) (see table 5).

Overview:

In 2008, Netherlands Antilles' exports and imports increased almost at the same rate, on average, respectively by 25.9 and 24.8 percent each year amounting to 0.1 and 1.4 bln US\$ (see tables 1, 2 and graph 1). Trade balance recorded a deficit of 1.3 bln US\$ (see graph 1). Trade recorded deficits with Developed North America (-0.5 bln US\$), Developed Europe (-0.3 bln US\$) and Latin America & the Caribbean (-0.2 bln US\$) among others. Netherlands Antilles' trade was concentrated across partners: in 2008, 4 (respectively 8) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2008, exports were composed of 33.5 percent of machinery and transport equipment (SITC section 7), 27.5 percent of food, live animals, beverages and tobacco (SITC sections 0+1) and 15.5 percent of miscellaneous manufactured articles (SITC section 8) (see table 1). Major markets for exports in 2008 included Netherlands, USA and Aruba (see table 4). From 2006 to 2008, top exported commodities were articles of jewellery and parts thereof, of precious metal (HS code 7113), chocolate and other food preparations containing cocoa (HS code 1806) and parts of goods of heading 88.01 or 88.02 (HS code 8803) (see table 3).

Imports Profile:

Similar to exports, machinery and transport equipment (SITC section 7) accounted for a large share of imports: 32.3 percent (see table 2). Other major commodity groups included food, live animals, beverages and tobacco (SITC sections 0+1) and miscellaneous manufactured articles (SITC section 8) respectively with 20.1 and 18.5 percent of imported goods. From 2006 to 2008, top import commodities were motor cars and other motor vehicles principally designed for the transport (HS code 8703), medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) and automatic data processing machines and units thereof (HS code 8471) (see table 5).

Overview:

From 2006 to 2010, New Caledonia's exports increased on average by 2.8 percent each year despite a drop of 39.1 percent in 2010 and amounted to 1.3 bln US\$ (see table 1 and graph1). During the same period, imports increased on average by 13.4 percent each year to 3.3 bln US\$ (see table 2). This resulted in a trade deficit of 2.0 bln US\$ compared to 0.9 bln US\$ in 2006. This increase of the deficit occurred largely in 2008 as exports dropped by 1.0 percent and imports increased by 34.7 percent. By MDG regions, the large deficits were recorded with Developed Europe (-769.7 mln US\$), South-eastern Asia (-617.7 mln US\$) and Eastern Asia (-299.9 mln US\$) (see graph 2). New Caledonia's exports were concentrated among a few partners: 6 major partners accounted for 80 percent of exports compared to 10 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

Two commodity groups accounted for a large part of exports in 2010: manufactured goods classified chiefly by material (SITC section 6) and inedible crude materials (excluding fuels), vegetable and animal oils, fats and waxes (SITC sections 2+4) represented respectively 54.4 and 40.7 percent of exports (see table 1). Major destinations for exports included France, Japan and Other Asia, nes (see table 4). Exports to France were almost exclusively inedible crude materials (excluding fuels), vegetable and animal oils, fats and waxes (SITC sections 2+4) and exports to Other Asia, nes, manufactured goods classified chiefly by material (SITC section 6). Over the last three years, top exported goods included ferro-alloys (HS code 7202), nickel mattes, nickel oxide sinters and other intermediate products (HS code 7501) and nickel ores and concentrates (HS code 2604) (see table 3).

Imports Profile:

In 2010, New Caledonia's imports were composed of 27.9 percent of machinery and transport equipment (SITC section 7), 15.9 percent of mineral fuels, lubricants and related materials (SITC section 3) and 14.5 percent of commodities and transactions not classified elsewhere (SITC section 9) (see table 2). From 2008 to 2010, top imported products were petroleum oils, other than crude (HS code 2710), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and motor vehicles for the transport of goods (HS code 8704) (see table 5).

Table 5: Top 10 import commodities 2008 to 2010

Overview:

From 2006 to 2010, New Zealand's exports increased on average by 8.4 percent each year and amounted to 30.9 bln US\$ in 2010, reaching its previous level of 2008 after a significant decline in 2009 (see table 1). Imports increased on average by 3.4 percent each year and reached 30.2 bln US\$ (see table 2). This resulted in a trade surplus of 0.8 bln US\$ ending the deficit that existed in the last 8 years (see graph 1). The trade balance recorded surpluses with MDG regions such as Developed Asia-Pacific (+1.8 bln US\$), Oceania (+0.9 bln US\$) and Southern Asia (+0.8 bln US\$) (see graph 2). Large deficits were recorded with South-eastern Asia (-1.3 bln US\$) and Developed Europe (-1.0 bln US\$). Both imports and exports were diversified across partners: 21 (respectively 15) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2010, more than half (52.6 percent) of exported goods were food, live animals, beverages and tobacco (SITC sections 0+1) (see table 1). Other major commodity groups included inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) and manufactured goods classified chiefly by material (SITC section 6), respectively with 11.6 and 9.5 percent of exports. Exports of chemicals and related products, n.e.s. (SITC section 5), the only commodity group that decreased in 2010, represented 4.4 percent of the total. Australia, China and USA were the three major destinations for exports (see table 4). Over the last three years, top products for exports included milk and cream, concentrated or containing added sugar (HS code 0402), meat of sheep or goats, fresh, chilled or frozen (HS code 0204) and petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709) (see table 3).

Imports Profile:

Imports in 2010 were composed of 33.3 percent of machinery and transport equipment (SITC section 7), 15.3 percent of mineral fuels, lubricants and related materials (SITC section 3) and 14.2 percent of miscellaneous manufactured articles (SITC section 8) (see table 2). The three major imported products over the last three years included petroleum oils both crude and non crude (HS code 2709 and 2710) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) (see table 5).

Overview:

After several years of continuous growth, the value of the Nicaragua's exports dropped by 45.1 percent in 2009 and amounted to 1.4 bln US\$ (see table 1 and graph 1). Imports showed a similar development with a decline of 26.7 percent in 2009 to 3.5 bln US\$ (see table 2 and graph 1). This resulted in a trade deficit of 2.1 bln US\$ in 2009 (see graph 1). This deficit is essentially from trade with Latin America and the Caribbean (-1.3 bln US\$) (see graph 2). Major deficits were also recorded with Eastern Asia (-306.2 mln US\$) and Developed North America (-226.0 mln US\$). In 2009, exports were more concentrated among partners than imports: 8 major partners accounted for 80 percent of exports compared to 11 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2009, the majority of Nicaragua's exports were food, live animals, beverages and tobacco (SITC sections 0+1): they accounted for 75.1 percent of exported goods. Other major commodity groups included inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) and commodities and transactions not classified elsewhere (SITC section 9), respectively with 8.1 and 6.8 percent of exports (see table 1). The three major destinations for exports in 2009 were USA, El Salvador and Venezuela (see table 4). From 2007 to 2009, top exported products included coffee, whether or not roasted or decaffeinated (HS code 0901), meat of bovine animals, frozen (HS code 0202) and meat of bovine animals, fresh or chilled (HS code 0201) (see table 3).

Imports Profile:

In 2009, Nicaragua's imports were composed of 22.2 percent of mineral fuels, lubricants and related materials (SITC section 3), 19.1 percent of chemicals and related products, n.e.s. (SITC section 5) and 18.7 percent of machinery and transport equipment (SITC section 7) (see table 2). From 2007 to 2009, top imported products were petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), petroleum oils, other than crude (HS code 2710) and medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) (see table 5).

Overview:

Since 2004, Niger's exports increased on average by 12.4 percent each year and amounted to 503.1 mln US\$ in 2008 (see table 1 and graph 1). During the same period, imports increased on average by 16.9 percent to reach 1.2 bln US\$ (see table 2 and graph 1). This resulted in a trade deficit amounting to 744.4 mln US\$, a twofold increase compared to 2004. Trade was in deficit nearly with all MDG regions (see graph 2). Deficits with Developed Europe, Eastern Asia and Sub-Saharan Africa amounted respectively to 178.9 mln, 162.2 mln and 155.4 mln US\$. Contrary to imports, exports were very concentrated among a few partners: 6 major partners accounted for 80 percent of exports (compared to 17 major partners for imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

Inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4), largely uranium or thorium ores and concentrates, accounted for the majority of exported goods (see table 2). Their exports decreased by 1.5 percent in 2008 and accounted for 64.3 percent of exported goods. In 2008, exports of food, live animals, beverages and tobacco (SITC sections 0+1) increased by 0.4 percent and represented 18.7 percent of exports. Major partners for exports included France, USA and Nigeria (see table 4). Exports to France and USA were largely inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) while 88 percent of exports to Nigeria were food, live animals, beverages and tobacco (SITC sections 0+1). In addition to uranium or thorium ores and concentrates (HS code 2612), other major commodities for exports from 2006 to 2008 were gold (including gold plated with platinum) (HS code 7108) and worn clothing and other worn articles (HS code 6309) (see table 3).

Imports Profile:

Food, live animals, beverages and tobacco (SITC sections 0+1) and machinery and transport equipment (SITC section 7) accounted respectively for 22.2 and 20.2 percent of imports in 2008 (see table 2). By products, top commodities for imports from 2006 to 2008 included petroleum oils, other than crude (HS code 2710), rice (HS code 1006) and medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) (see table 5).

Overview:

From 2006 to 2010, Nigeria's exports increased on average by 10.0 percent each year and amounted to 86.6 bln US\$ (see table 1 and graph 1). During the same period, imports increased on average by 17.9 percent each year to 44.2 bln US\$ (see table 2). The trade surplus increased from 16.0 bln US\$ in 2009 to 42.3 bln US\$ in 2010 (see graph 1). Significant surpluses were recorded with Developed North America (+24.4 bln US\$), Developed Europe (+9.4 bln US\$) and Sub-Saharan Africa (+7.5 bln US\$) (see graph 2). Trade recorded deficits with Eastern Asia (-7.2 bln US\$) and Western Asia (-2.5 bln US\$). In 2010, exports were concentrated among a few partners while imports were diversified: 12 major partners accounted for 80 percent of exports compared to 16 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

Mineral fuels, lubricants and related materials (SITC section 3), largely crude petroleum oils, accounted for 87.1 percent of Nigeria's exports in 2010 (see table 1). Major partners included USA, India and Brazil (see table 4). In 2010, petroleum oils, crude (HS code 2709) represented 70.4 percent of exports (see table 3). Other major commodities for exports included petroleum oils, other than crude (HS code 2710) and petroleum gases and other gaseous hydrocarbons (HS code 2711).

Imports Profile:

In 2010, imports were composed of 50.1 percent of machinery and transport equipment (SITC section 7), 21.1 percent of manufactured goods classified chiefly by material (SITC section 6) and 10.8 percent of chemicals and related products, n.e.s. (SITC section 5) (see table 2). From 2008 to 2010, top imported products included motor cars and other motor vehicles principally designed for the transport (HS code 8703), motor vehicles for the transport of goods (HS code 8704) and motor vehicles for the transport of ten or more persons (HS code 8702) (see table 5).

Norway, including Svalbard and Jan Mayen Islands

Imports: CIF, by origin

Exports: FOB, by last known destination

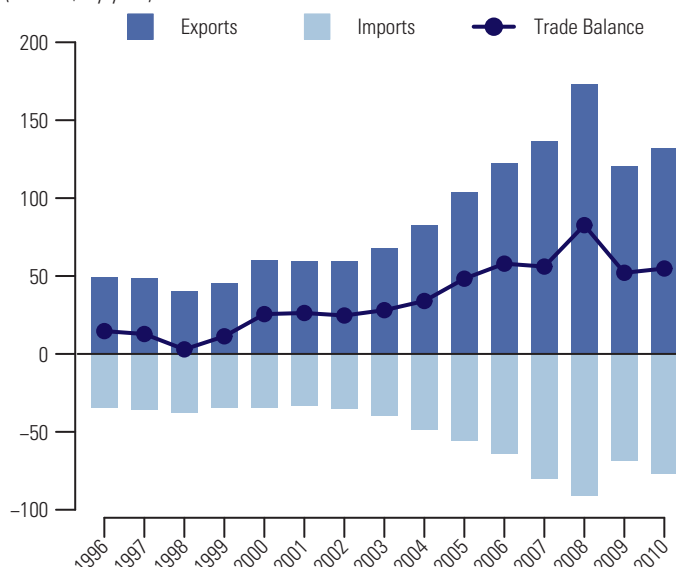

Trade System: General

Overview:

After several years of continuous growth marked by a peak of 173.2 bln US\$ in 2008, the value of the exports of Norway, including Svalbard and Jan Mayen Islands, contracted sharply in 2009 (by 30.3 percent) but bounced back in 2010 by 9.2 percent to amount to 131.7 bln US\$, still well below its 2008 level (see table 1 and graph 1). Imports showed a similar development with an increase by 12.1 percent to 76.9 bln US\$ in 2010. This resulted in a trade surplus of 54.8 bln US\$, slightly higher than the 2009 surplus of 52.1 bln US\$ (see graph 1). This surplus was accounted for largely by trade with Developed Europe: trade with this region recorded a surplus of 58.3 bln US\$ (see graph 2). Norway's trade was relatively diversified across partners: 11 major partners accounted for 80 percent of exports compared to 16 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2010, mineral fuels, lubricants and related materials (SITC section 3) represented nearly two-thirds (64.1 percent) of Norway's exports (see table 1). Other major commodity groups included machinery and transport equipment (SITC section 7) and manufactured goods classified chiefly by material (SITC section 6) respectively with 9.2 and 8.7 percent of exports. Major markets for exports included United Kingdom, Netherlands and Germany (see table 4). Top exported products over the last three years were petroleum products: petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), petroleum gases and other gaseous hydrocarbons (HS code 2711) and petroleum oils, other than crude (HS code 2710). They accounted respectively for 36.3, 23.4 and 4.0 percent of exports in 2010 (see table 3).

Occupied Palestinian Territory

Imports: CIF, by origin

Exports: FOB, by last known destination

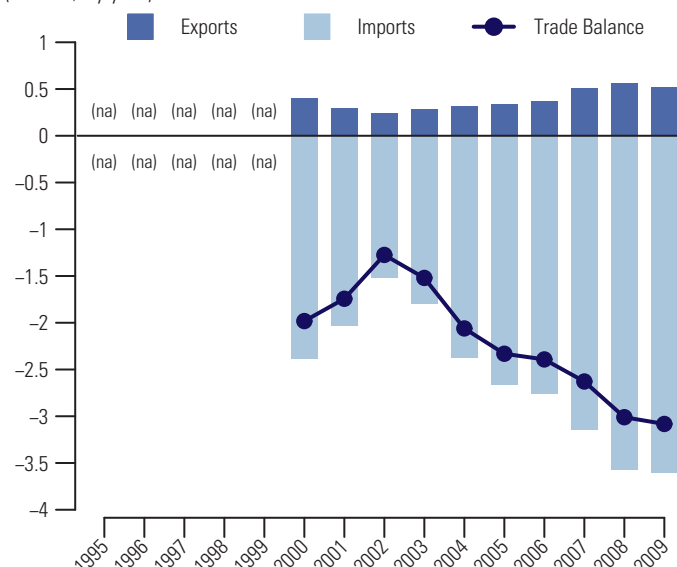

Trade System: Special

Overview:

From 2005 to 2009, the value of exports of the Occupied Palestinian Territory increased on average by 11.5 percent each year and amounted to 518.4 mln US\$ (see table 1 and graph 1). During the same period, imports increased on average by 7.8 percent each year to 3.6 bln US\$ (see table 2 and graph 1). The trade balance recorded a deficit of 3.1 bln US\$ (see graph 1). A large deficit was recorded with Western Asia (-2.3 bln US\$) (see graph 2). Significant deficits were also recorded with Developed Europe (-346.7 mln US\$) and Eastern Asia (-216.8 mln US\$). Trade was highly concentrated with top partners: in 2009, Israel was the destination for 87.5 percent of exports and 3 major partners accounted for 80 percent of imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2009, exports were composed of 36.9 percent of manufactured goods classified chiefly by material (SITC section 6) and 24.0 percent of miscellaneous manufactured articles (SITC section 8) (see table 1). In addition to Israel, other major partners for exports were Jordan and Algeria (see table 4). Top exported products included worked monumental or building stone (except slate) and articles thereof (HS code 6802), ferrous waste and scrap; remelting scrap ingots of iron or steel (HS code 7204) and articles for the conveyance or packing of goods, of plastics (HS code 3923) (see table 3).

Imports Profile:

In 2009, imports were composed of 31.5 percent of mineral fuels, lubricants and related materials (SITC section 3) and 20.6 percent of food, live animals, beverages and tobacco (SITC sections 0+1). Other major commodity groups for imports included machinery and transport equipment (SITC section 7) and manufactured goods classified chiefly by material (SITC section 6); they accounted respectively for 15.8 and 15.4 percent of imports. In 2009, top imported products were petroleum oils, other than crude (HS code 2710), electrical energy (HS code 2716) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) (see table 5).

Overview:

Since 2006, Oman's exports increased on average by 7.8 percent each year and amounted to 29.1 bln US\$ while imports increased on average by 13.3 percent each year to reach 18.2 bln US\$ (see tables 1 and 2 and graph 1). This resulted in a trade surplus of 11.0 bln US\$ compared to 10.5 bln US\$ in 2006. Trade with Southern Asia, Sub-Saharan Africa and South-eastern Asia recorded surpluses amounting respectively to 0.4 bln US\$, 0.2 bln US\$ and 0.1 bln US\$ (see graph 2). Trade recorded significant deficits with Western Asia (-3.4 bln US\$) and Developed Europe (-2.2 bln US\$), although these numbers are distorted by the lack of partner information for exports. By partners, exports were more concentrated than imports: in 2010, 2 major partners accounted for 80 percent of exports (compared to 13 major partners for imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, exports of mineral fuels, lubricants and related materials (SITC section 3) increased by 7.0 percent and accounted for 68.7 percent of total exports (see table 1). Other major commodity groups were commodities and transactions not classified elsewhere (SITC section 9) and chemicals and related products, n.e.s. (SITC section 5) with respectively 11.8 percent and 8.0 percent of exports. Major destinations for exported products were United Arab Emirates, India and China (see table 4). Over the last three years, top products for exports were petroleum products: petroleum oils, crude (HS code 2709), petroleum gases and other gaseous hydrocarbons (HS code 2711) and petroleum oils, other than crude (HS code 2710) (see table 3). In 2010, petroleum oils, crude (HS code 2709) alone accounted for more than half (52.7 percent) of exports.

Imports Profile:

Imports in 2010 were composed of commodities and transactions not classified elsewhere (SITC section 9) with 25.5 percent, machinery and transport equipment (SITC section 7) with 21.0 percent and manufactured goods classified chiefly by material (SITC section 6) with 16.7 percent (see table 2). From 2008 to 2010, top imported products were motor cars and other motor vehicles principally designed for the transport (HS code 8703), petroleum oils, other than crude (HS code 2710) and parts suitable for use principally with the machinery of headings 84.25 (HS code 8431) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 20.3 bln US\$ in 2008, the value of the exports of Pakistan dropped in 2009 (by 13.4 percent) but increased again in 2010 by 22.0 percent to amount to 21.4 bln US\$, exceeding its 2008 level (see table 1 and graph 1). Imports showed a similar development with an increase by 18.8 percent to 37.5 bln US\$ in 2010. This resulted in a trade deficit of 16.1 bln US\$, slightly higher than the 2009 deficit of 14.0 bln US\$ (see graph 1). This deficit was accounted for largely by trade with Western Asia (-8.9 bln US\$), Eastern Asia (-4.1 bln US\$) and South-eastern Asia (-4.0 bln US\$) (see graph 2). However, trade with Developed North America recorded a surplus exceeding 1.8 bln US\$ in 2010. Pakistan's trade was well diversified across partners: in 2010, 23 (respectively 16) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2010, Pakistan's exports were composed of 42.9 percent of manufactured goods classified chiefly by material (SITC section 6), 25.4 percent of miscellaneous manufactured articles (SITC section 8) and 16.0 percent of food, live animals, beverages and tobacco (SITC sections 0+1) (see table 1). The three largest markets for exported goods were USA, the United Arab Emirates and Afghanistan (see table 4). Over the last three years top exported goods included bed linen, table linen, toilet linen and kitchen linen (HS code 6302), rice (HS code 1006) and cotton yarn (other than sewing thread), containing 85 % or more (HS code 5205) (see table 3).

Imports Profile:

Mineral fuels, lubricants and related materials (SITC section 3) accounted for 30.4 percent of imported goods in 2010 (see table 2). Other major commodity groups included machinery and transport equipment (SITC section 7) and chemicals and related products (SITC section 5) respectively with 20.5 and 15.4 percent of imports. Over the last three years, top products for imports included petroleum oils, other than crude (HS code 2710), petroleum oils, crude (HS code 2709) and palm oil and its fractions (HS code 1511) (see table 5).

Overview:

Since 2006, the value of the exports of Panama increased on average by 8.1 percent each year and amounted to 11.0 bln US\$ in 2010 (see table 1 and graph 1). Similarly, imports increased on average by 11.6 percent each year to reach 16.7 bln US\$ (see table 2 and graph 1). The trade balance registered a deficit of 5.8 bln US\$ in 2010 (see graph 1). The majority of this deficit came from trade with Eastern Asia: deficit with this region amounted to 5.7 bln US\$ in 2010 (see graph 2). Trade recorded significant deficits with South-eastern Asia (-2.3 bln US\$), Developed Europe (-1.5 bln US\$) and Developed North America (-1.2 bln US\$) but a large surplus with Latin America and the Caribbean (+5.5 bln US\$). Panama's trade was relatively diversified among partners: 12 major partners each accounted for 80 percent of both exports and imports in 2010 (see graph 3). See footnote*.

(Bln US\$ by year)

**Exports Profile:**

In 2010, exports were composed of 34.7 percent of miscellaneous manufactured articles (SITC section 8), 32.2 percent of chemicals and related products, n.e.s. (SITC section 5) and 17.0 percent of machinery and transport equipment (SITC section 7) (see table 1). The three largest markets for exported goods were USA, Venezuela and Colombia (see table 4). Exports to USA were largely chemicals and related products, n.e.s. (SITC section 5). From 2008 to 2010, top products for exports were antibiotics (HS code 2941), medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) and other footwear with outer soles and uppers of rubber or plastics (HS code 6402) (see table 3).

Imports Profile:

In 2010, the top commodity groups for imports were miscellaneous manufactured articles (SITC section 8), machinery and transport equipment (SITC section 7) and chemicals and related products, n.e.s. (SITC section 5) respectively with 28.0, 27.1 and 22.9 percent of imports (see table 2). Similar to exports, the top imported goods from 2008 to 2010 were antibiotics (HS code 2941), medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) and other footwear with outer soles and uppers of rubber or plastics (HS code 6402) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 4.5 bln US\$ in 2008, the value of the exports of Paraguay dropped in 2009 (by 29.0 percent) but bounced back in 2010 by 43.2 percent to amount to 4.5 bln US\$ slightly above the peak reached in 2008 (see table 1 and graph 1). Imports showed a similar development with an increase by 44.7 percent to 10.0 bln US\$ in 2010. This resulted in a trade deficit of 5.5 bln US\$, slightly higher than the 2009 deficit of 3.8 bln US\$ (see graph 1). Large deficits were recorded with Eastern Asia (-3.6 bln US\$) and Latin America & the Caribbean (-1.5 bln US\$) (see graph 2). Trade recorded a surplus of 230.6 mln US\$ with the Commonwealth of Independent States. Exports were more diversified across partners than imports: in 2010, 12 major partners accounted for 80 percent of exports compared to 5 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2010, inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) and food, live animals, beverages and tobacco (SITC sections 0+1) accounted for nearly all the exports (see table 1). Inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) increased by 61.3 percent to represent 46.7 percent of total trade while exports of food, live animals, beverages and tobacco (SITC sections 0+1) increased by 27.5 percent to represent 42.6 percent. Uruguay, Brazil and Chile were the largest markets for exports (see table 4). The majority of exports to Brazil and Chile were composed respectively of 47.1 and 96.7 percent of food, live animals, beverages and tobacco (SITC sections 0+1) and to Uruguay, 77.9 percent of inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4). From 2008 to 2010, top exported goods were soya beans, whether or not broken (HS code 1201) and oil-cake and other solid residues (HS code 2304) (see table 3).

Imports Profile:

In 2010, imports of machinery and transport equipment (SITC section 7) went up by 60.1 percent and accounted for 43.0 percent of imported goods (see table 2). Other major commodity groups included chemicals and related products, n.e.s. (SITC section 5) and miscellaneous manufactured articles (SITC section 8) which accounted respectively for 13.2 and 12.4 percent of imports. From 2008 to 2010, major products for imports included petroleum oils, other than crude (HS code 2710), automatic data processing machines and units thereof (HS code 8471) and electrical apparatus for line telephony or line telegraphy (HS code 8517) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 31.3 bln US\$ in 2008, the value of the exports of Peru dropped in 2009 (by 14.5 percent) but increased again in 2010 by 31.2 percent to amount to 35.1 bln US\$, well above its 2008 level (see table 1 and graph 1). Imports showed a similar development with an increase by 36.6 percent to 29.9 bln US\$ in 2010 (see table 2 and graph 1). This resulted in a trade surplus of 5.2 bln US\$ in 2010, slightly higher than the 2009 surplus of 4.9 bln US\$ (see graph 1). This surplus came largely from trade with Developed Europe (+6.5 bln US\$) and Developed North America (+2.7 bln US\$) (see graph 2). Trade, however, recorded deficits with Latin America & the Caribbean (-3.5 bln US\$) and Sub-Saharan Africa (-0.7 bln US\$) among others. Both imports and exports were diversified across partners: 13 (respectively 14) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) accounted for 31.6 percent of Peru's exports (see table 1). Other major commodity groups for exports included commodities and transactions not classified elsewhere (SITC section 9) and food, live animals, beverages and tobacco (SITC sections 0+1). They accounted respectively for 22.0 and 15.0 percent of exports. USA, China and Switzerland were the major partners for exports (see table 4). A large majority (67.3 percent) of exports to China was inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4). Over the last three years, top exported commodities included gold (including gold plated with platinum) (HS code 7108), copper ores and concentrates (HS code 2603) and refined copper and copper alloys, unwrought (HS code 7403) (see table 3).

Table 1: Exports by SITC sections

Imports Profile:

In 2010, Peru's imports were composed of 35.0 percent of machinery and transport equipment (SITC section 7), 16.6 percent of manufactured goods classified chiefly by material (SITC section 6) and 14.7 percent of chemicals and related products, n.e.s. (SITC section 5). From 2008 to 2010, major products for imports included petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), petroleum oils, other than crude (HS code 2710) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) (see table 5).

Philippines

Imports: CIF, by origin

Exports: FOB, by last known destination

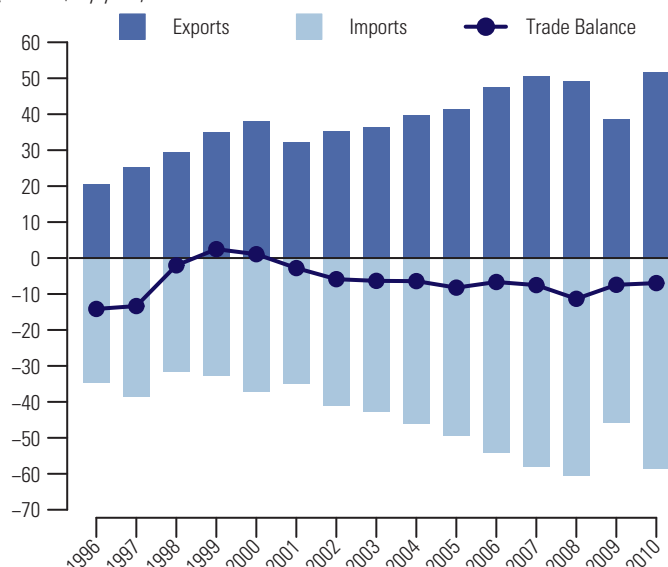

Trade System: General

Overview:

From 2006 to 2010, the exports of Philippines increased on average by 2.1 percent each year despite a decline of 21.7 percent in 2009 and amounted to 51.5 bln US\$ (see table 1 and graph 1). During the same period, imports also increased on average by 2.0 percent each year to 58.5 bln US\$ (see table 2 and graph 1). This resulted in a trade deficit of 7.0 bln US\$ in 2010 (see graph 1). By MDG regions, large deficits were recorded with South-eastern Asia (-4.9 bln US\$) and Western Asia (-4.2 bln US\$) (see graph 2). Trade also recorded a surplus with Developed Europe (+2.9 bln US\$). Philippines' trade, especially exports, was relatively concentrated among a few partners: 9 major partners accounted for 80 percent of exports compared to 12 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2010, machinery and transport equipment (SITC section 7) was the largest commodity group for exports (see table 1). It accounted for 70.1 percent of exported goods. Other major commodity groups for exports included miscellaneous manufactured articles (SITC section 8) and manufactured goods classified chiefly by material (SITC section 6). Major partners for exports were Japan, USA and Singapore (see table 4). From 2008 to 2010, top exported commodities were electronic integrated circuits and microassemblies (HS code 8542), automatic data processing machines and units thereof (HS code 8471) and parts and accessories for use with machines of heading 84.69 to 84.72 (HS code 8473) (see table 3).

Imports Profile:

Imports were composed of 47.1 percent of machinery and transport equipment (SITC section 7), 16.9 percent of mineral fuels, lubricants and related materials (SITC section 3) and 10.5 percent of food, live animals, beverages and tobacco (SITC sections 0+1) (see table 2). From 2008 to 2010, top imported products were electronic integrated circuits and microassemblies (HS code 8542), petroleum oils, crude (HS code 2709) and parts and accessories for use with machines of heading 84.69 to 84.72 (HS code 8473) (see table 5).

Overview:

After several years of continuous growth, the value of the Poland's exports dropped by 20.5 percent in 2009 and amounted to 136.6 bln US\$ (see table 1 and graph 1). Imports showed a similar development with a decline of 28.9 percent in 2009 to 149.6 bln US\$ (see table 2 and graph 1). This resulted in a trade deficit of 12.9 bln US\$ in 2009 (see graph 1). Trade with Eastern Asia, Commonwealth of Independent States and Developed Asia-Pacific recorded deficits respectively of 17.5, 4.9 and 2.5 bln US\$ in 2009 (see graph 2). Major trade surpluses were recorded with Developed Europe (+15.5 bln US\$) and South-eastern Europe (+1.5 bln US\$). Both exports and imports were diversified across partners: in 2009, 16 (respectively 17) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2009, a large share (43.0 percent) of Poland's exports were machinery and transport equipment (SITC section 7) (see table 1). Other major commodity groups included manufactured goods classified chiefly by material (SITC section 6) and miscellaneous manufactured articles (SITC section 8) respectively with 19.1 and 12.7 percent of exports. In addition to Germany, other major destinations for exports included France and Italy (see table 4). From 2007 to 2009, top exported commodities were motor cars and other motor vehicles principally designed for the transport (HS code 8703), parts and accessories of the motor vehicles of headings 87.01 to 87.05 (HS code 8708) and reception apparatus for television (HS code 8528) (see table 3).

Imports Profile:

In 2009, machinery and transport equipment (SITC section 7) also accounted for a large share of imported goods: 35.1 percent (see table 2). Other major commodity groups included manufactured goods classified chiefly by material (SITC section 6) and chemicals and related products, n.e.s. (SITC section 5) respectively with 17.0 and 13.7 percent of imports. From 2007 to 2009, top imported products included petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and parts and accessories of the motor vehicles of headings 87.01 to 87.05 (HS code 8708) (see table 5).

Portugal

Imports: CIF, by origin/consignment for intra-eu

Exports: FOB, by last known destination

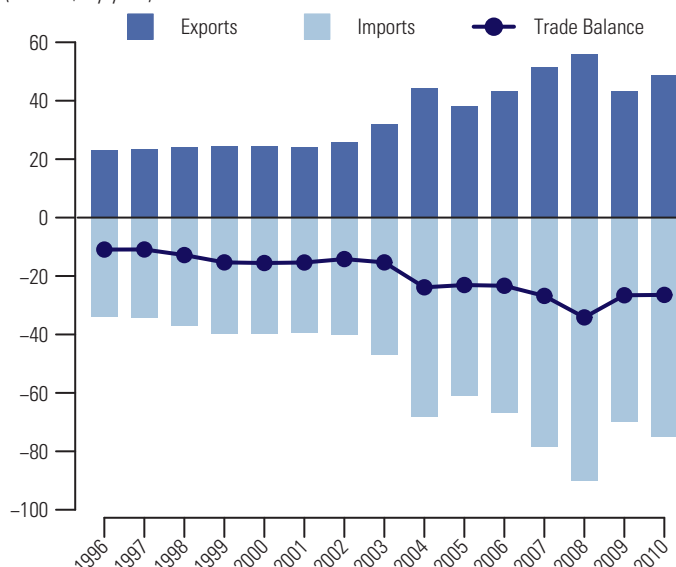

Trade System: Special

Overview:

Since 2006, the value of the exports of Portugal increased on average by 3.0 percent each year and amounted to 48.8 bln US\$ in 2010 (see table 1 and graph 1). Similarly, imports increased on average by 3.1 percent each year to reach 75.2 bln US\$ (see table 2 and graph 1). The trade balance registered a deficit of 26.5 bln US\$ in 2010, slightly lower than the deficit in 2009 of 26.6 bln US\$ (see graph 1). The majority of this deficit came from trade with Developed Europe: deficit with this region amounted to 21.4 bln US\$ in 2010 (see graph 2). Trade recorded significant deficits with Eastern Asia (-2.1 bln US\$) and Commonwealth of Independent States (-1.7 bln US\$) but a surplus with Developed North America (+0.6 bln US\$) and Sub-Saharan Africa (+0.3 bln US\$). Portugal's trade was diversified across partners: in 2010, 14 major partners accounted for 80 percent of both imports and exports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2010, machinery and transport equipment (SITC section 7) accounted for 27.1 percent of exported goods (see table 1). Other major commodity groups included manufactured goods classified chiefly by material (SITC section 6) and miscellaneous manufactured articles (SITC section 8). They accounted respectively for 22.3 and 16.4 percent of exports. Major destinations for exported goods were Spain, Germany and France (see table 4). From 2008 to 2010, top exported products were petroleum oils, other than crude (HS code 2710), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and parts and accessories of the motor vehicles of headings 87.01 to 87.05 (HS code 8708) and (see table 3).

Imports Profile:

In 2010, machinery and transport equipment (SITC section 7) accounted for nearly one-third (30.2 percent) of Portugal's imports (see table 2). Other major commodity groups included manufactured goods classified chiefly by material (SITC section 6) and mineral fuels, lubricants and related materials (SITC section 3). They accounted respectively for 15.0 and 14.7 percent of imports. From 2008 to 2010, top imported products were petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 54.9 bln US\$ in 2008, the value of exports of Qatar dropped in 2009 by 9.9 percent to reach 49.5 bln US\$ (see table 1 and graph 1). From 2005 and 2008, imports increased on average by 40.5 percent each year to 27.9 bln US\$ (see table 2). In 2008, trade recorded a surplus of 27.0 bln US\$ (see graph 1). This surplus came largely from trade with Developed Asia-Pacific (+17.0 bln US\$) (see graph 2). Trade was also in surplus with Eastern Asia (+9.5 bln US\$), South-eastern Asia (+7.4 bln US\$) and Southern Asia (+2.1 bln US\$). Deficits were recorded with Developed Europe (-6.7 bln US\$) and Western Asia (-3.9 bln US\$). Qatar's exports were concentrated among a few partners in 2009: 8 major partners accounted for 80 percent of exports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

Exports of Qatar were mainly composed of 71.1 percent of mineral fuels, lubricants and related materials (SITC section 3), which decreased by 30.6 percent in 2009 (see table 1). Other major commodity groups for exports in 2009 were commodities and transactions not classified elsewhere (SITC section 9) and chemicals and related products, n.e.s. (SITC section 5), respectively 21.2 and 4.5 percent of exports. Major partners for exports included Japan, Republic of Korea and India (see table 4). From 2007 to 2009, top exported products were petroleum products: petroleum gases and other gaseous hydrocarbons (HS code 2711), petroleum oils, crude (HS code 2709) and petroleum oils, other than crude (HS code 2710) (see table 3). They accounted respectively for 39.4, 28.4 and 21.2 percent of exported goods in 2009.

Imports Profile:

In 2008, imports of machinery and transport equipment (SITC section 7) increased by 16.2 percent and accounted for 51.4 percent of imported goods (see table 2). Manufactured goods classified chiefly by material (SITC section 6) increased by 20.3 percent and accounted for 25.7 percent. From 2006 to 2008, top imported products included motor cars and other motor vehicles principally designed for the transport (HS code 8703), tubes, pipes and hollow profiles, seamless, of iron (other than cast iron) (HS code 7304) and insulated (including enamelled or anodised) wire, cable (HS code 8544) (see table 5).

Overview:

From 2006 to 2010, Republic of Moldova's exports increased on average by 10.8 percent each year and amounted to 1.6 bln US\$ in 2010 (see table 1). Imports increased on average by 9.4 percent each year and reached 3.9 bln US\$ (see table 2). This resulted in a trade deficit of 2.3 bln US\$ in 2010, slightly higher than the 2009 deficit of 2.0 bln US\$ (see graph 1). This deficit came largely from trade with Developed Europe (-0.8 bln US\$), Commonwealth of Independent States (-0.6 bln US\$) and Eastern Asia (-0.4 bln US\$) (see graph 2). By partners, exports were more concentrated than imports: 9 major partners accounted for 80 percent of exports compared to 13 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

Food, live animals, beverages and tobacco (SITC sections 0+1) represented 39.3 percent of exported goods in 2010 (see table 1). Miscellaneous manufactured articles (SITC section 8), another major commodity group for exports, represented 22.7 percent of exports. Major markets for exports included Russian Federation, Romania and Italy (see table 4). They accounted jointly for more than half of exports (51.2 percent). Over the last three years, main products for exports included wine of fresh grapes, including fortified wines (HS code 2204), insulated (including enamelled or anodised) wire, cable (HS code 8544) and other nuts, fresh or dries (HS code 0802) (see table 3).

Imports Profile:

Republic of Moldova's imports were composed of 20.9 percent of machinery and transport equipment (SITC section 7), 19.1 percent of manufactured goods classified chiefly by material (SITC section 6) and 14.2 percent of food, live animals, beverages and tobacco (SITC sections 0+1) (see table 2). Over the last three years, top three products for imports were petroleum oils, other than crude (HS code 2710), petroleum gases and other gaseous hydrocarbons (HS code 2711) and medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 49.5 bln US\$ in 2008, the value of the exports of Romania dropped in 2009 (by 18.0 percent) but bounced back in 2010 by 21.6 percent to amount to 49.4 bln US\$ slightly below the peak reached in 2008 (see table 1 and graph 1). Imports showed a similar development with an increase by 14.3 percent to 62.0 bln US\$ in 2010. This resulted in a trade deficit of 12.6 bln US\$, slightly lower than the 2009 deficit of 13.6 bln US\$ (see graph 1). Large deficits were recorded with Developed Europe (-9.0 bln US\$), Eastern Asia (-3.4 bln US\$) and Commonwealth of Independent States (-3.0 bln US\$) (see graph 2). Trade recorded a surplus of 2.2 bln US\$ with Western Asia. Exports were more diversified across partners than imports: in 2010, 17 major partners accounted for 80 percent of exports compared to 15 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

Machinery and transport equipment (SITC section 7) accounted for most of exports (41.9 percent) in 2010 (see table 1). Other important commodity groups included manufactured goods classified chiefly by material (SITC section 6) and miscellaneous manufactured articles (SITC section 8) respectively with 16.9 and 15.3 percent. In 2010, Germany, Italy and France were the three largest markets for exports: they accounted for nearly 40.2 percent of exports (see table 4). Major commodities for exports included petroleum oils, other than crude (HS code 2710), insulated (including enamelled or anodised) wire, cable (HS code 8544) and parts and accessories of the motor vehicles of headings 87.01 to 87.05 (HS code 8708) (see table 3).

Imports Profile:

Machinery and transport equipment (SITC section 7) and manufactured goods classified chiefly by material (SITC section 6) accounted for large shares of imports: respectively 34.4 and 21.2 percent in 2010 (see table 2). Over the last three years, top imported products were petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) (see table 5).

Russian Federation

Imports: CIF, by origin

Exports: FOB, by last known destination

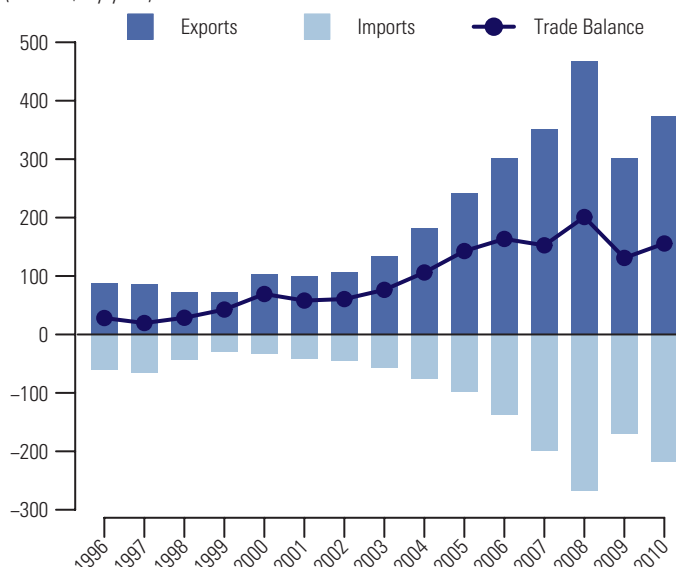

Trade System: General

Overview:

Since 2006, the exports of Russian Federation increased on average by 5.5 percent each year and amounted to 373.1 bln US\$ in 2010 while imports increased on average by 12.1 percent each year to reach 217.4 bln US\$ (see tables 1 and 2 and graph 1). This resulted in a trade surplus of 155.6 bln US\$ compared to 163.4 bln US\$ in 2006. Trade with Developed Europe, Western Asia and Southern Asia recorded surpluses amounting respectively to 91.4 bln US\$, 14.5 bln US\$ and 6.5 bln US\$ (see graph 2). Trade recorded significant deficits with Eastern Asia (-14.2 bln US\$) and Latin America & the Caribbean (-3.9 bln US\$). Trade was well diversified across partners: in 2010, 19 (respectively 21) major partners accounted for 80 percent of exports (respectively imports) (see graph 3). See footnote*.

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2010, exports of mineral fuels, lubricants and related materials (SITC section 3) accounted for more than two-third (69.1 percent) of exported goods (see table 1). Other major commodity groups for exports included manufactured goods classified chiefly by material (SITC section 6) and commodities and transactions not classified elsewhere (SITC section 9): they accounted respectively for 12.3 and 4.9 percent of exports. Major markets for exports included the Netherlands, Italy and China (see table 4). The majority of exports to these countries were largely mineral fuels, lubricants and related materials (SITC section 3). Over the last three years, petroleum products were the main products for exports: petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), petroleum oils, other than crude (HS code 2710) and petroleum gases and other gaseous hydrocarbons (HS code 2711) accounted respectively for 34.6, 18.6 and 12.8 percent of exports in 2010 (see table 3).

Imports Profile:

Machinery and transport equipment (SITC section 7) accounted for 41.1 percent of imported goods in 2010 (see table 2). Other major commodity groups included food, live animals, beverages and tobacco (SITC sections 0+1), chemicals and related products, n.e.s. (SITC section 5) and manufactured goods classified chiefly by material (SITC section 6) respectively with 13.9, 13.5 and 12.7 percent of imports. From 2008 to 2010, motor cars and other motor vehicles principally designed for the transport (HS code 8703), medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) and electrical apparatus for line telephony or line telegraphy (HS code 8517) were the three main imported products (see table 5).

Overview:

Since 2006, Rwanda's exports increased on average by 14.0 percent each year and amounted to 237.8 mln US\$ (see table 1 and graph 1). Between 2006 and 2009, imports increased on average by 31.6 percent each year, and amounted to 1.1 bln US\$ (see table 2 and graph 1). In 2009, the trade balance recorded a deficit of 851.4 mln US\$ compared to 347.1 mln US\$ deficit in 2006 (see graph 1). Trade was in deficit with all MDG regions in 2009 (see graph 2). The largest deficit was recorded with Developed Europe and amounted to 232.8 mln US\$. Trade with Sub-Saharan Africa and Western Asia recorded deficits of 210.9 and 111.4 mln US\$ respectively. Exports were concentrated among partners: in 2010, 8 major partners accounted for 80 percent of exports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2010, exports of food, live animals, beverages and tobacco (SITC sections 0+1) dropped by 9.9 percent and accounted for 44.7 percent of exported goods. Inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) accounted for 44.2 percent of exports. These two commodities formed the major part of exports. Major markets for exported products were Switzerland, Kenya and Belgium (see table 4). Exports to Kenya were largely food, live animals, beverages and tobacco (SITC sections 0+1) while exports to Switzerland and Belgium were largely food, live animals, beverages and tobacco (SITC sections 0+1) and inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4). From 2008 to 2010, tin ores and concentrates (HS code 2609), tea, whether or not flavoured (HS code 0902) and coffee, whether or not roasted or decaffeinated (HS code 0901) were the top exported products (see table 3). They jointly accounted for 67.2 percent of exported goods in 2010.

Imports Profile:

In 2009, Rwanda's imports were composed of 30.6 percent of machinery and transport equipment (SITC section 7), 20.1 manufactured goods classified chiefly by material (SITC section 6) and 16.9 percent of chemicals and related products, n.e.s. (SITC section 5) (see table 2). In addition to petroleum oils, other than crude (HS code 2710), other major products for imports from 2007 to 2009 were medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) and portland cement, aluminous cement, slag cement (HS code 2523) (see table 5).

Saint Kitts and Nevis

Imports: CIF, by origin

Exports: FOB, by last known destination

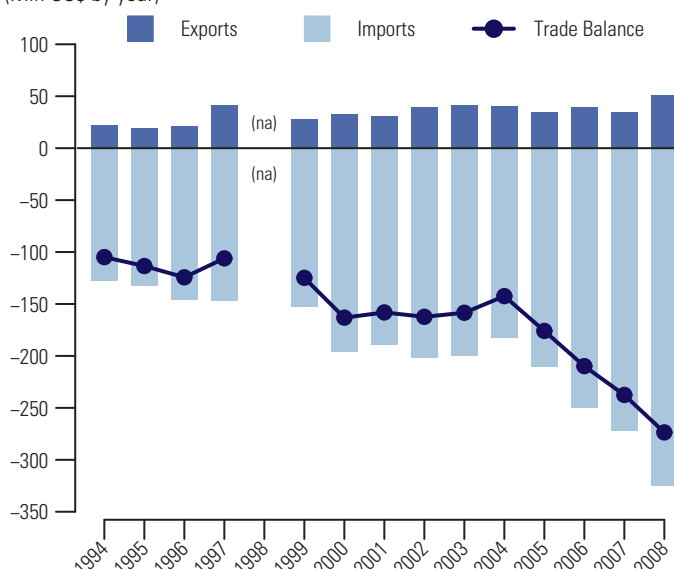

Trade System: Special

Overview:

From 2004 to 2008, exports of Saint Kitts and Nevis increased on average by 6.2 percent each year and amounted to 51.2 mln US\$ in 2008 (see table 1 and graph 1). Imports increased on average by 15.5 percent each year to reach 324.8 mln US\$ (see table 2 and graph 1). The trade deficit increased from 142.4 mln US\$ in 2004 to 273.6 mln US\$ in 2008. The largest deficit was recorded with Developed North America (-161.5 mln US\$) (see graph 2). Significant deficits were recorded with Latin America and the Caribbean (-70.3 mln US\$) and Developed Europe (-20.5 mln US\$). Trade was highly concentrated: USA, the top partner for exports accounted for 84.6 percent of exports and 4 major partners accounted for 80 percent of imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Mln US\$ by year)

Exports Profile:

In 2008, a large share of exported goods were machinery and transport equipment (SITC section 7) (see table 1). It increased by 46.0 percent in 2008 and accounted for 81.4 percent of exports. In addition to USA, other major partners for exports were United Kingdom and Netherlands Antilles (see table 4). From 2006 to 2008, the three major commodities for exports were electrical switches, connectors, etc, for < 1kV (HS code 8536), parts for radio, tv transmission, receive equipment (HS code 8529) and electric generating sets and rotary converters (HS code 8502) (see table 3).

Imports Profile:

In 2008, machinery and transport equipment (SITC section 7), miscellaneous manufactured articles (SITC section 8) and manufactured goods classified chiefly by material (SITC section 6) accounted respectively for 23.9, 23.4 and 18.1 percent of imports. From 2006 to 2008, major products for imports included oils petroleum, bituminous, distillates, except crude (HS code 2710), jewellery and parts, containing precious metal (HS code 7113) and motor vehicles for transport of persons (except buses) (HS code 8703) (see table 5).

Overview:

Since 2004, exports of Saint Lucia increased on average by 19.7 percent each year and amounted to 164.0 mln US\$ in 2008 (see table 1 and graph 1). This increase occurred largely in 2008 as exports increased by 212.7 percent. During the same period, imports increased on average by 11.7 percent each year to 655.7 mln US\$ in 2008 (see table 2 and graph 1). The trade balance recorded a deficit of 491.7 mln US\$ compared to 341.8 mln US\$ in 2004 (see graph 2). Large deficits were recorded with Developed North America (-234.5 mln US\$) and Latin America and the Caribbean (-167.4 mln US\$). Trade was concentrated among a few partners: in 2008, 4 (respectively 6) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Mln US\$ by year)

Exports Profile:

In 2008, exports of Saint Lucia were composed of 28.7 percent of food, live animals, beverages and tobacco (SITC sections 0+1), 20.0 percent of miscellaneous manufactured articles (SITC section 8), 19.0 percent of mineral fuels, lubricants and related materials (SITC section 3) and 16.6 percent of machinery and transport equipment (SITC section 7) (see table 1). Major partners for exports included USA, Trinidad and Tobago and United Kingdom (see table 4). Over the last three years, top exported products included bananas, including plantains, fresh or dried (HS code 0803), oils petroleum, bituminous, distillates, except crude (HS code 2710) and beer made from malt (HS code 2203) (see table 3).

Table 1: Exports by SITC sections

Imports Profile:

In 2008, imports of Saint Lucia were composed of 25.9 percent of mineral fuels, lubricants and related materials (SITC section 3), 20.8 percent of food, live animals, beverages and tobacco (SITC sections 0+1) and 19.4 percent of machinery and transport equipment (SITC section 7) (see table 2). Over the last three years, top imported products included oils petroleum, bituminous, distillates, except crude (HS code 2710), motor vehicles for transport of persons (except buses) (HS code 8703) and motor vehicles for the transport of goods (HS code 8704) (see table 5).

Saint Vincent and the Grenadines

Imports: CIF, by origin

Exports: FOB, by last known destination

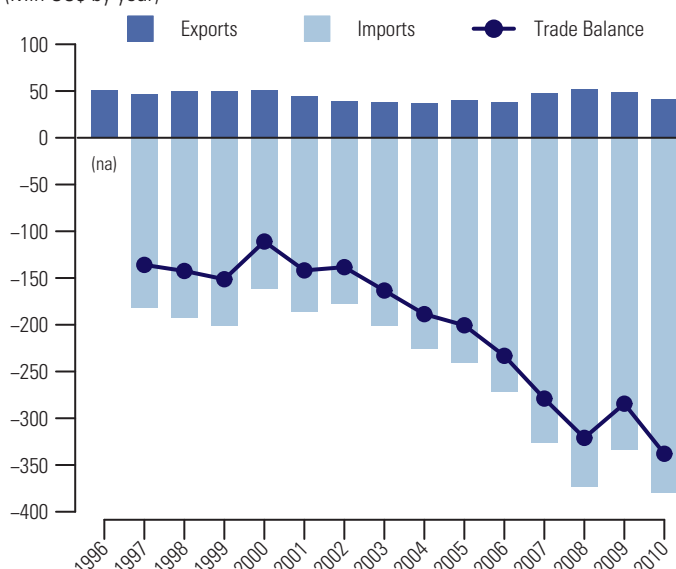

Trade System: Special

Overview:

From 2006 to 2010, the exports of Saint Vincent and the Grenadines increased on average by 2.2 percent each year despite a drop of 15.4 percent in 2010 and amounted to 41.5 mln US\$ (see table 1 and graph 1). During the same period, imports increased on average by 8.8 percent each year to 379.5 mln US\$ (see table 2). The trade deficit increased from 284.4 mln US\$ in 2009 to 338.0 mln US\$ in 2010 (see graph 1). By MDG regions, the large deficit was recorded with Developed North America to 142.5 mln US\$ in 2010 (see graph 2). Other major deficits were recorded with Latin America & the Caribbean (-125.2 mln US\$) and Developed Europe (-31.8 mln US\$). By partners, both imports and exports were concentrated: respectively 8 and 7 major partners accounted for 80 percent of respectively imports and exports in 2010 (see graph 3).

Graph 1: Total imports, exports and trade balance

(Mln US\$ by year)

Exports Profile:

In 2010, food, live animals, beverages and tobacco (SITC sections 0+1) accounted for over two-thirds (69.9 percent) of export goods and amounted to 29.0 mln US\$ (see table 1). Other major commodity groups included manufactured goods classified chiefly by material (SITC section 6) and machinery and transport equipment (SITC section 7) which accounted respectively for 12.7 and 10.3 percent of exports. Saint Lucia, Trinidad and Tobago and Barbados were the three main markets for exports in 2010 (see table 4). Over the last three years, the top three products for exports were wheat or meslin flour (HS code 1101), bananas, including plantains, fresh or dried (HS code 0803) and rice (HS code 1006) (see table 3).

Overview:

From 2006 to 2010, Samoa's exports decreased on average by 2.2 percent each year despite an increase of 29.4 percent in 2010 and amounted to 59.5 mln US\$ (see table 1 and graph). During the same period, imports increased on average by 3.0 percent each year to 309.8 mln US\$ (see table 2). This resulted in a trade deficit of 250.3 mln US\$ in 2010 (see graph 1). This deficit came largely from trade with Developed Asia-Pacific (-140.9 mln US\$) (see graph 2). Other significant deficits were recorded with Developed North America (-33.8 mln US\$), South-eastern Asia (-29.4 mln US\$) and Eastern Asia (-25.8 mln US\$) (see graph 2). Trade, especially exports, was highly concentrated among a few partners: Australia, the top partner for exports accounted for 77.1 percent of exported goods in 2010 (see table 4) and 5 major partners accounted for 80 percent of imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Mln US\$ by year)

Exports Profile:

Machinery and transport equipment (SITC section 7) accounted for 76.4 percent of Samoa's exports in 2010 (see table 1). Other major commodity groups included food, live animals, beverages and tobacco (SITC sections 0+1): they represented 17.1 percent of exports. In addition to Australia, other major partners for exported goods included New Zealand and American Samoa (see table 4). Top exported products over the last 3 years were insulated wire and cable, optical fibre cable (HS code 8544), fish, frozen, whole (HS code 0303) and coconut, palm kernel, babassu oil, fractions, refined (HS code 1513) (see table 3).

Imports Profile:

In 2010, the top commodity groups for imports were food, live animals, beverages and tobacco (SITC sections 0+1) and machinery and transport equipment (SITC section 7) both with 24.0 percent of imported goods (see table 2). Other major commodities were mineral fuels, lubricants and related materials (SITC section 3) with 17.6 percent and manufactured goods classified chiefly by material (SITC section 6) with 16.3 percent. Over the last three years, top imported products included oils petroleum, bituminous, distillates, except crude (HS code 2710), meat, edible offal of domestic poultry (HS code 0207) and meat of sheep or goats, fresh, chilled or frozen (HS code 0204) (see table 5).

Overview:

After three years of continuous growth marked by a peak of 10.6 mln US\$ in 2008, the value of the exports of Sao Tome and Principe significantly dropped by 23.7 percent in 2009 to 8.1 mln US\$ and then again by 21.4 percent to 6.4 mln US\$ in 2010 (see table 1 and graph 1). Imports showed an average annual growth of 12.1 percent over the last five years (see table 2). In 2010, it increased by 8.6 percent to 112.2 mln US\$ (see table 2 and graph 1), resulting in a trade deficit of 105.8 mln US\$ (see graph 1). Trade deficit with Developed Europe amounted to 69.4 mln US\$ (see graph 2). Other major trade deficits were recorded with Sub-Saharan Africa (-25.4 mln US\$) and Eastern Asia (-4.2 mln US\$). Both exports and imports were highly concentrated among a few partners: respectively 4 and 3 major partners accounted for more than 80 percent of respectively exports and imports in 2010 (see graph 3).

Graph 1: Total imports, exports and trade balance

(Mln US\$ by year)

Exports Profile:

In 2010, food, live animals, beverages and tobacco (SITC sections 0+1), inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) and machinery and transport equipment (SITC section 7) accounted for nearly all the exports (see table 1). Exports of food, live animals, beverages and tobacco (SITC sections 0+1) represented 90.8 percent of total exports. Portugal, Belgium and the Netherlands were the three major markets for exports in 2010 (see table 4). Exports to Portugal were food, live animals, beverages and tobacco (SITC sections 0+1) while exports to Belgium and the Netherlands were all from SITC sections 0+1. Over the last three years, top exported products were cocoa beans, whole or broken, raw or roasted (HS code 1801), oils petroleum, bituminous, distillates, except crude (HS code 2710) and chocolate and other foods containing cocoa (HS code 1806).

Imports Profile:

In 2010, imports of food, live animals, beverages and tobacco (SITC sections 0+1) decreased by 3.7 percent and represented 27.5 percent of total imports while imports of mineral fuels, lubricants and related materials (SITC section 3) increased by 13.3 percent to represent 16.1 percent of imports (see table 2). Machinery and transport equipment (SITC section 7) was another major commodity groups for imports: it accounted for 27.2 percent of imports in 2010. Over the last three years, top imported products were oils petroleum, bituminous, distillates, except crude (HS code 2710), motor vehicles for transport of persons (except buses) (HS code 8703) and rice (HS code 1006) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 313.5 bln US\$ in 2008, the value of the exports of Saudi Arabia dropped by 38.6 percent in 2009 and amounted to 192.3 bln US\$ (see table 1 and graph 1), well below its 2007 level. Imports showed a less pronounced development with a decline of 17.0 percent in 2009 to 95.6 bln US\$ (see table 2 and graph 1). The trade surplus dropped from 198.3 bln US\$ in 2008 to 96.8 bln US\$ in 2009 (see graph 1). This surplus was accounted for largely by trade with Eastern Asia: trade with this region recorded a surplus of 107.9 bln US\$ (see graph 2). Trade recorded large deficits with Developed Europe (-12.2 bln US\$), Developed Asia-Pacific (-9.2 bln US\$) and Western Asia (-7.8 bln US\$). Exports were concentrated among partners while imports were diversified: in 2009, 3 major partners accounted for 80 percent of exports compared to 20 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2009, mineral fuels, lubricants and related materials (SITC section 3), largely crude petroleum oils, accounted for 84.6 percent of Saudi Arabia's exports (see table 1). They also accounted for the majority of exports to all major partners (see table 4). Petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), the top exported commodity, accounted for 73.9 percent of exports in 2009 (see table 3). From 2007 to 2009, other major commodities for exports were petroleum oils, other than crude (HS code 2710) and petroleum gases and other gaseous hydrocarbons (HS code 2711).

Imports Profile:

In 2009, imports were composed of 49.4 percent of commodities and transactions not classified elsewhere (SITC section 9), 24.4 percent of machinery and transport equipment (SITC section 7) and 10.7 percent of food, live animals, beverages and tobacco (SITC sections 0+1). From 2007 to 2009, top three products for imports were motor cars and other motor vehicles principally designed for the transport (HS code 8703), electrical apparatus for line telephony or line telegraphy (HS code 8517) and barley (HS code 1003) (see table 5).

Overview:

Since 2006, the value of the exports of Senegal increased on average by 9.7 percent each year and amounted to 2.2 bln US\$ in 2010 (see table 1 and graph 1). Similarly, imports increased on average by 6.8 percent each year to reach 4.8 bln US\$ (see table 2 and graph 1). The trade balance registered a deficit of 2.6 bln US\$ in 2010, slightly lower than the deficit in 2009 of 2.7 bln US\$ (see graph 1). The essential of this deficit came from trade with Developed Europe: deficit with this region amounted to 1.6 bln US\$ in 2010 (see graph 2). Trade recorded significant deficits with Eastern Asia (-0.4 bln US\$) and Latin America & the Caribbean (-0.3 bln US\$) but a surplus with Sub-Saharan Africa (+0.4 bln US\$) and Southern Asia (+0.1 bln US\$). Senegal's trade was diversified across partners: in 2010, 14 (respectively 18) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2010, exports of mineral fuels, lubricants and related materials (SITC section 3) increased by 15.6 percent to account for 23.6 percent of total exports (see table 1). Other major commodity groups included food, live animals, beverages and tobacco (SITC sections 0+1) and manufactured goods classified chiefly by material (SITC section 6) which accounted respectively for 22.4 and 15.3 percent of exports. Mali, India and Switzerland were the three major partners in 2010 (see table 4). A large share of exported goods, (largely mineral fuels, lubricants and related materials (SITC section 3)) was reported as supplied to foreign vessels and aircrafts and the partner was unknown. Top exported products over the last three years were petroleum oils, other than crude (HS code 2710), diphosphorus pentaoxide; phosphoric acid; (HS code 2809) and portland cement, aluminous cement, slag cement (HS code 2523) (see table 3).

Imports Profile:

In 2010, imported goods were composed of 29.9 percent of mineral fuels, lubricants and related materials (SITC section 3), 21.0 percent of machinery and transport equipment (SITC section 7) and 19.8 percent of food, live animals, beverages and tobacco (SITC sections 0+1) (see table 2). The top three imported products over the last three years were petroleum oils, other than crude (HS code 2710), petroleum oils, crude (HS code 2709) and rice (HS code 1006) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 11.0 bln US\$ in 2008, the value of the exports of Serbia dropped in 2009 but increased again in 2010 by 17.4 percent to amount to 9.8 bln US\$, still well below its 2008 level (see table 1 and graph 1). Similarly, imports increased by 4.3 percent to 16.7 bln US\$ in 2010. This resulted in a trade deficit of 6.9 bln US\$ in 2010, slightly lower than the 2009 deficit of 7.7 bln US\$ (see graph 1). This deficit came largely from trade with Developed Europe (-3.8 bln US\$), Commonwealth of Independent States (-1.8 bln US\$) and Eastern Asia (-1.4 bln US\$) (see graph 2). Trade, however, recorded a surplus with South-eastern Europe (+1.2 bln US\$). In 2010, Serbia's trade was diversified across partners: 15 (respectively 20) major partners accounted for 80 percent of exports (respectively imports) (see graph 3). See footnote*.

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

Manufactured goods classified chiefly by material (SITC section 6) accounted for 29.0 percent of exported goods in 2010 (see table 1). Other major commodity groups included food, live animals, beverages and tobacco (SITC sections 0+1), machinery and transport equipment (SITC section 7) and miscellaneous manufactured articles (SITC section 8). They accounted respectively for 20.4, 16.3 and 12.6 percent of exports. Italy, Bosnia Herzegovina and Germany were the three largest markets for exports in 2010 (see table 4). Main exported commodities over the last three years included flat-rolled products of iron or non-alloy steel (HS code 7208), fruit and nuts (HS code 0811) and Maize (corn) (HS code 1005) (see table 3).

Imports Profile:

In 2010, major commodity groups for imports included manufactured goods classified chiefly by material (SITC section 6), machinery and transport equipment (SITC section 7) and mineral fuels, lubricants and related materials (SITC section 3) (see table 2). They accounted respectively for 18.1, 17.9 and 17.8 of imports. Over the last three years, petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), petroleum gases and other gaseous hydrocarbons (HS code 2711) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) were the top three products for imports (see table 5).

Overview:

From 2004 to 2008, Seychelles' exports increased on average by 4.0 percent each year and amounted to 340.6 mln US\$ (see table 1 and graph 1). During the same period, imports increased nearly twofold, on average by 19.8 percent to reach 1.0 bln US\$ (see table 2 and graph 1). The trade balance recorded a deficit of 681.3 mln US\$ (see graph 1). Trade was in deficit with nearly all MDG regions except a surplus of 0.3 mln US\$ with Commonwealth of Independent States (see graph 2). Large deficits were recorded with Western Asia (-236.4 mln US\$), Developed Europe (-165.2 mln US\$) and South-eastern Asia (-134.9 mln US\$) (see graph 2). Trade, especially exports, was concentrated among a few partners: in 2008, 4 partners accounted for 80 percent of exports (compared to 12 major partners for imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

Two commodity groups accounted for most of Seychelles' exports in 2008: commodities and transactions not classified elsewhere (SITC section 9) and food, live animals, beverages and tobacco (SITC sections 0+1) respectively with 54.9 and 41.2 percent (see table 1). Top partners for exports were Saudi Arabia, France and United Kingdom (see table 4). In 2008, exports to United Kingdom and France were almost exclusively food, live animals, beverages and tobacco (SITC sections 0+1). From 2006 to 2008, top exported commodities included prepared or preserved fish, fish eggs, caviar (HS code 1604), oils petroleum, bituminous, distillates, except crude (HS code 2710) and fish, cured, smoked, fish meal for human consumption (HS code 0305) (see table 3).

Imports Profile:

In 2008, imports of machinery and transport equipment (SITC section 7) increased by 12.1 percent and accounted for 23.5 percent of imported goods (see table 2). Other major commodity groups included commodities and transactions not classified elsewhere (SITC section 9) and food, live animals, beverages and tobacco (SITC sections 0+1) respectively with 19.9 and 15.6 percent of imports. From 2006 to 2008, top imported products were oils petroleum, bituminous, distillates, except crude (HS code 2710), fish, frozen, whole (HS code 0303) and passenger and goods transport ships, boats (HS code 8901) (see table 5).

Overview:

After several years of continuous growth, the value of Singapore's exports dropped by 20.2 percent in 2009 and amounted to 269.8 bln US\$ (see table 1 and graph 1). Imports showed a similar development with a decline of 23.1 percent in 2009 to 245.8 bln US\$ (see table 2 and graph 1). This resulted in a trade surplus of 24.0 bln US\$ in 2009 (see graph 1). Large surpluses were recorded with Eastern Asia (+23.0 bln US\$) and South-eastern Asia (+22.6 bln US\$) (see graph 2). However, trade was in deficit with Western Asia (-15.5 bln US\$), Developed Europe (-10.7 bln US\$) and Developed North America (-9.8 bln US\$). Singapore's trade was diversified across partners: in 2009, 15 (respectively 16) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

Machinery and transport equipment (SITC section 7) accounted for the majority of Singapore's exports in 2009: 51.9 percent (see table 1). Other major commodity groups were mineral fuels, lubricants and related materials (SITC section 3) and chemicals and related products, n.e.s. (SITC section 5) respectively with 15.2 and 11.2 percent. In 2009, China, Hong Kong SAR, Malaysia and China were the three largest markets for exports (see table 4). From 2007 to 2009, main exported products included electronic integrated circuits (HS code 8542), petroleum oils, other than crude (HS code 2710) and printing machinery used for printing by means of the printing type, blocks (HS code 8443) (see table 3).

Imports Profile:

In 2009, machinery and transport equipment (SITC section 7) also accounted for the majority of imported products: 47.7 percent (see table 2). Mineral fuels, lubricants and related materials (SITC section 3), largely non crude petroleum oils, accounted for 23.9 percent of imports. From 2007 to 2009, top imported products were electronic integrated circuits (HS code 8542), non crude and crude petroleum oils (HS code 2710 and 2709) (see table 5).

Overview:

From 2006 to 2010, Slovakia's exports increased on average by 11.6 percent each year to 64.7 bln US\$ (see table 1 and graph 1). During the same period, imports increased on average by 10.2 percent each year to reach 65.9 bln US\$ (see table 2 and graph 1). The trade balance recorded a deficit of 1.2 bln US\$ in 2010 (see graph 1). By MDG regions, trade recorded a surplus exceeding 10.8 bln US\$ with Developed Europe (see graph 1). However, large deficits were recorded with Eastern Asia (-8.6 bln US\$) and the Commonwealth of Independent States (-3.6 bln US\$). Both imports and exports were diversified across partners: in 2010, 12 (respectively 11) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, machinery and transport equipment (SITC section 7) accounted for the majority of exported goods (54.6 percent) (see table 1). Other major commodity groups were manufactured goods classified chiefly by material (SITC section 6) and miscellaneous manufactured articles (SITC section 8) respectively with 19.0 and 9.8 percent of exports. Germany, Czech Republic and Poland were the top three markets for exports in 2010. From 2008 to 2010, main exported products were motor cars and other motor vehicles principally designed for the transport (HS code 8703), reception apparatus for television (HS code 8528) and petroleum oils, other than crude (HS code 2710) (see table 3).

Imports Profile:

Slovakia's imports were composed of 42.7 percent of machinery and transport equipment (SITC section 7), 15.6 percent of manufactured goods classified chiefly by material (SITC section 6) and 12.5 percent of mineral fuels, lubricants and related materials (SITC section 3) (see table 2). Main imported products from 2008 to 2010 were parts and accessories of the motor vehicles of headings 87.01 to 87.05 (HS code 8708), parts suitable for use with the apparatus of headings 85.25 to 85.28 (HS code 8529) and petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 29.2 bln US\$ in 2008, the value of the exports of Slovenia dropped in 2009 (by 23.8 percent) but increased again in 2010 by 8.5 percent to amount to 24.2 bln US\$, still well below its 2008 level (see table 1 and graph 1). Imports showed a similar development with an increase by 9.2 percent to 26.0 bln US\$ in 2010 (see table 2 and graph 1). This resulted in a trade deficit of 1.9 bln US\$ in 2010, slightly higher than the 2009 deficit of 1.6 bln US\$ (see graph 1). This deficit came largely from trade with Eastern Asia (-1.4 bln US\$) (see graph 2). Trade, however, recorded small surpluses with South-eastern Europe (+1.1 bln US\$) and Commonwealth of Independent States (+0.6 bln US\$). In 2010, Slovenia's trade was diversified across partners: 15 (respectively 18) major partners accounted for 80 percent of imports (respectively exports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, exports of machinery and transport equipment (SITC section 7) increased by 4.5 percent and accounted for 38.9 percent of Slovenia's exports (see table 1). Other major commodity groups for exports were manufactured goods classified chiefly by material (SITC section 6) and chemicals and related products, n.e.s. (SITC section 5), respectively with 22.2 and 16.1 percent of exports. Germany, Italy and Austria were the top three markets for exported goods (see table 4). A majority of exports to Germany (49.8 percent) and 78.3 percent of exports to France were machinery and transport equipment (SITC section 7). Over the last three years, motor cars and other motor vehicles principally designed for the transport (HS code 8703), medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) and parts and accessories of the motor vehicles of headings 87.01 to 87.05 (HS code 8708) were the top commodities for exports (see table 3).

Imports Profile:

Similar to exports, machinery and transport equipment (SITC section 7), manufactured goods classified chiefly by material (SITC section 6) and chemicals and related products, n.e.s. (SITC section 5) were the three largest commodity groups for imports in 2010 (see table 2). They accounted respectively for 29.7, 19.5 and 13.8 percent of imports. Over the last three years, petroleum oils, other than crude (HS code 2710), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and parts and accessories of the motor vehicles of headings 87.01 to 87.05 (HS code 8708) were the main products for imports (see table 5).

Solomon Islands

Imports: CIF, by origin

Exports: FOB, by last known destination

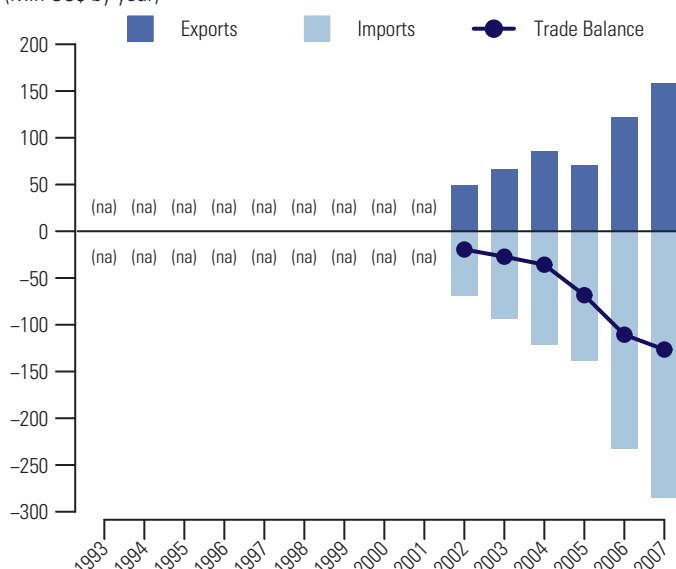

Trade System: Special

Overview:

From 2003 to 2007, exports of Solomon Islands increased on average by 24.2 percent each year and amounted to 158.5 mln US\$ (see table 1 and graph 1). During the same period, imports increased on average by 32.0 percent each year to reach 285.0 mln US\$ (see table 2 and graph 1). The trade balance recorded a deficit of 126.5 mln US\$ compared to 27.2 mln US\$ in 2003. Large deficits were recorded with Developed Asia-Pacific (-115.1 mln US\$), South-eastern Asia (-71.3 mln US\$) and Oceania (-18 mln US\$) (see graph 2). However, trade recorded a surplus amounting to 64.1 mln US\$ with Eastern Asia. Trade was concentrated among a few partners: in 2007, 7 (respectively 6) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Mln US\$ by year)

Exports Profile:

In 2007, exports of inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) and food, live animals, beverages and tobacco (SITC sections 0+1) increased respectively by 44.7 and 62.3 percent accounting largely for the increase in total exports by 30.3 percent (see table 1). They accounted respectively for 80.4 and 18.3 percent of exported goods. China, Thailand and Philippines were the three major partners for exports (see table 4). Top exported products in 2007 included wood in the rough, whether or not stripped of bark or sapwood (HS code 4403), palm oil and its fractions (HS code 1511) and fish, fresh or chilled, excluding fish fillets (HS code 0302) (see table 3).

South Africa

Imports: FOB, by origin

Exports: FOB, by last known destination

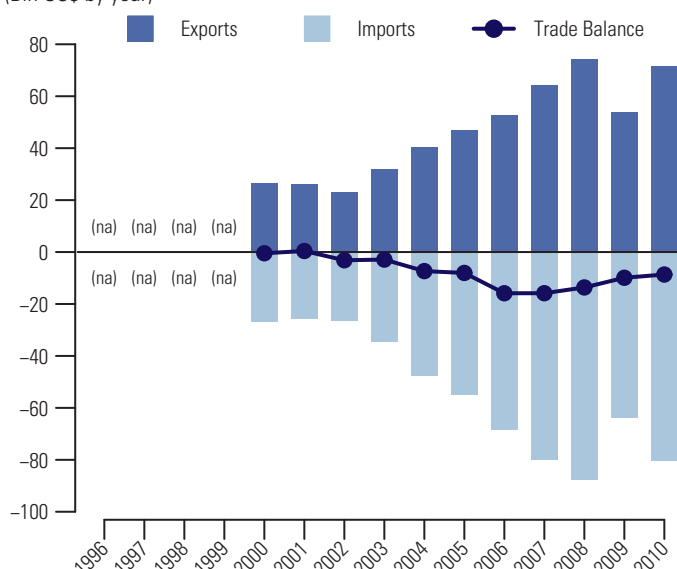

Trade System: General

Overview:

From 2006 to 2010, South Africa's exports increased on average by 8.0 percent each year and amounted to 71.5 bln US\$ in 2010, reaching its previous level of 2008 after a significant decline in 2009 (see table 1). Imports increased on average by 4.0 percent each year and reached 80.1 bln US\$ (see table 2). This resulted in a trade deficit of 8.7 bln US\$ in 2010, slightly lower than the 2009 deficit of 9.9 bln US\$ (see graph 1). The trade balance recorded deficits with MDG regions such as Developed Europe (-5.6 bln US\$), Western Asia (-2.9 bln US\$), South-eastern Asia (-2.8 bln US\$) and Southern Asia (-2.7 bln US\$) (see graph 2). Large surpluses were recorded with Sub-Saharan Africa (+5.7 bln US\$), Developed Asia-Pacific (+1.8 bln US\$) and Developed North America (+1.0 bln US\$). South Africa's trade was diversified across partners: 24 major partners accounted for 80 percent of exports (compared to 23 major partners for imports) in 2010 (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2010, manufactured goods classified chiefly by material (SITC section 6) and machinery and transport equipment (SITC section 7) accounted for a majority of exported goods. Their exports increased respectively by 40.2 and 24.7 percent and accounted for 34.4 and 18.8 percent of total exports (see table 1). Inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) accounted for 18.5 percent of exports. Major markets for exports were China, USA and Japan (see table 4). More than two-thirds (69.5 percent) of exports to China were inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4). Over the last three years, South Africa's main commodities for exports were platinum, unwrought or in semi-manufactured forms, or in powder form (HS code 7110), coal; briquettes, ovoids and similar solid fuels manufactured from coal (HS code 2701) and ferro-alloys (HS code 7202) (see table 3).

Imports Profile:

In 2010, imports of machinery and transport equipment (SITC section 7) went up by 27.9 percent and accounted for 35.4 percent of imported goods (see table 2). Imports of mineral fuels, lubricants and related materials (SITC section 3) increased by 15.1 percent and represented 19.6 percent of imports. Over the last three years, top products for imports were petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), petroleum oils, other than crude (HS code 2710) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) and (see table 5).

Overview:

After several years of continuous growth marked by a peak of 279.2 bln US\$ in 2008, the value of the exports of Spain dropped by 20.1 percent in 2009 and amounted to 223.1 bln US\$ (see table 1 and graph 1). Imports showed a more pronounced development with a decline by 31.3 percent in 2009 to 287.5 bln US\$ (see table 2 and graph 1). The trade deficit decreased from 139.5 bln US\$ in 2008 to 64.4 bln US\$ in 2009 (see graph 1). By MDG regions, large deficits were recorded with Eastern Asia (-19.8 bln US\$) and Developed Europe (-13.6 bln US\$). Spain's trade was well diversified across partners: in 2009, 20 (respectively 25) major partners accounted for 80 percent of exports (respectively imports).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2009, machinery and transport equipment (SITC section 7) accounted for more than a third (35.2 percent) of exported goods (see table 1). Other major commodity groups included manufactured goods classified chiefly by material (SITC section 6), food, live animals, beverages and tobacco (SITC sections 0+1) and chemicals and related products, n.e.s. (SITC section 5) respectively with 16.3, 14.7 and 13.5 percent of exports. France, together with Germany and Portugal were the largest markets for exported products in 2009. From 2007 to 2009, main exported products were motor cars and other motor vehicles principally designed for the transport (HS code 8703), parts and accessories of the motor vehicles of headings 87.01 to 87.05 (HS code 8708) and petroleum oils, other than crude (HS code 2710) (see table 3).

Imports Profile:

Machinery and transport equipment (SITC section 7) also accounted for a large share of imported goods (29.8 percent) (see table 1). Other major commodity groups for imports included mineral fuels, lubricants and related materials (SITC section 3) and chemicals and related products, n.e.s. (SITC section 5) respectively with 16.5 and 14.9 percent of imports. From 2007 to 2009, main imported goods included petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and parts and accessories of the motor vehicles of headings 87.01 to 87.05 (HS code 8708) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 8.2 bln US\$ in 2008, the value of the exports of Sri Lanka dropped in 2009 (by 12.9 percent) but increased again in 2010 by 16.6 percent to amount to 8.3 bln US\$ slightly above the peak reached in 2008 (see table 1 and graph 1). Imports recorded a peak of 13.6 bln US\$ in 2008 before dropping in 2009 (by 30.8 percent) and bouncing back in 2010 by 31.0 percent to 12.4 bln US\$. This resulted in a trade deficit of 4.0 bln US\$ in 2010, higher than the 2009 deficit of 2.3 bln US\$ (see graph 1). Large deficits were recorded with Southern Asia (-2.8 bln US\$), South-eastern Asia (-2.1 bln US\$) and Eastern Asia (-2.0 bln US\$) (see graph 2). Trade recorded a surplus of 1.4 bln US\$ with Developed North America. Sri Lanka's trade was diversified across partners: in 2010, 20 (respectively 16) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, exports were composed of 45.9 percent of miscellaneous manufactured articles (SITC section 8), 26.6 percent of food, live animals, beverages and tobacco (SITC sections 0+1) and 14.5 percent of manufactured goods classified chiefly by material (SITC section 6). USA, United Kingdom and India were the three largest markets for exports (see table 4). The majority of exports to USA and United Kingdom were composed respectively of 82.1 and 85.4 percent of miscellaneous manufactured articles (SITC section 8). From 2008 to 2010, top exported products were tea, whether or not flavoured (HS code 0902), women's or girls' suits, ensembles, jackets, blazers, dresses, skirts (HS code 6204) and women's or girls' slips, petticoats, briefs, panties, nightdresses (HS code 6108) (see table 3).

Imports Profile:

Imports in 2010 were composed of 28.5 percent of manufactured goods classified chiefly by material (SITC section 6), 21.4 percent of machinery and transport equipment (SITC section 7) and 16.7 percent of mineral fuels, lubricants and related materials (SITC section 3). From 2008 to 2010, top products for imports were petroleum oils, other than crude (HS code 2710), petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709) and other knitted or crocheted fabrics (HS code 6006) (see table 5).

Overview:

From 2005 to 2009, Sudan's exports increased on average by 19.1 percent each year and amounted to 9.1 bln US\$ (see table 1). Imports increased on average by 3.9 percent and amounted to 8.6 bln US\$ (see table 2). The trade balance recorded a surplus of 0.5 bln US\$ in 2009 ending the large deficits that existed in the earlier years. By MDG regions, trade was in deficit with most of the MDG regions (see graph 2). Large deficits were recorded with Developed Europe (-1.2 bln US\$), Developed Asia-Pacific (-0.9 bln US\$) and Western Asia (-0.7 bln US\$). By partners, Imports were relatively more diversified among partners: in 2009, 3 major partners accounted for 80 percent of exports compared to 18 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2009, Sudan's exports were composed of 78.8 percent of mineral fuels, lubricants and related materials (SITC section 3), almost exclusively crude petroleum oils (see tables 1 and 3). Other major commodity groups include commodities and transactions not classified elsewhere (SITC section 9) and food, live animals, beverages and tobacco (SITC sections 0+1), respectively with 14.1 and 3.3 percent of exports. China, the major market for exports, accounted for 65.3 percent of exports in 2009 (see table 4). Other major markets for exports were United Arab Emirates and Canada. From 2007 to 2009, petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), gold (including gold plated with platinum) (HS code 7108) and petroleum oils, other than crude (HS code 2710) were the three main products for exports (see table 3).

Imports Profile:

In 2009, imports of machinery and transport equipment (SITC section 7) decreased by 62.9 percent and accounted for 37.9 percent of imported goods (see table 2). Other major commodity groups included manufactured goods classified chiefly by material (SITC section 6) and food, live animals, beverages and tobacco (SITC sections 0+1), respectively with 21.0 and 14.2 percent of imports. From 2007 to 2009, top imported goods included other aircraft (for example, helicopters, aeroplanes); spacecraft (HS code 8802), parts of goods of heading 88.01 or 88.02 (HS code 8803) and electrical apparatus for line telephony or line telegraphy (HS code 8517) (see table 5).

Overview:

Since 2004, Suriname's exports increased more than twofold, on average by 21.2 percent each year, to reach 1.7 bln US\$ (see table 1 and graph 1). During the same period, imports increased on average by 15.2 percent each year to 1.3 bln US\$ (see table 2 and graph 1). This resulted in a trade surplus of 439.1 mln US\$ compared to 67.8 mln US\$ in 2004. By MDG regions, trade with Developed Europe recorded a surplus amounting to 110.5 mln US\$ (see graph 2). Large surpluses were also recorded with unknown partners. The trade balance recorded significant deficits with Latin America and the Caribbean (-187.6 mln US\$) and Eastern Asia (-112.4 mln US\$). Both imports and exports were highly concentrated among a few partners: in 2008, 5 (respectively 6) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

Exports were composed largely of commodities and transactions not classified elsewhere (SITC section 9): they represented 82.3 percent of exported goods in 2008 (see table 1). Exports of mineral fuels, lubricants and related materials (SITC section 3) increased by 219.1 percent in 2008 and represented 10.8 percent of exports. In 2008, top partners for exports were Canada, Belgium and Switzerland (see table 4). From 2006 to 2008, top exported products were oils petroleum, bituminous, distillates, except crude (HS code 2710), rice (HS code 1006) and liqueur, spirits and undenatured ethyl alcohol <80% (HS code 2208) (see table 3).

Overview:

From 2003 to 2007, Swaziland's exports dropped on average by 9.4 percent each year and amounted to 1.1 bln US\$ in 2007 (see table 1 and graph 1). During the same period, imports dropped on average by 3.4 percent each year and amounted to 1.3 bln US\$ resulting in a trade deficit of 156.8 mln US\$ (see table 2 and graph 1). This deficit compares with a surplus of 368.5 mln US\$ in 2004. Deficit with Sub-Saharan Africa alone amounted to 136.9 mln US\$ (see graph 2). However, trade recorded surplus with Developed Europe (+122.0 mln US\$). Both imports and exports were concentrated among a few partners. In 2007, imported goods were almost exclusively from the top partner, and 2 major partners accounted for 80 percent of exports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2007, exports were composed of 54.0 percent of chemicals and related products, n.e.s. (SITC section 5), 21.1 percent of food, live animals, beverages and tobacco (SITC sections 0+1) and 8.9 percent of miscellaneous manufactured articles (SITC section 8). Top markets for exports were South Africa, Italy and Namibia (see table 4). From 2005 to 2007, top exported products were mixed odoriferous substances for industrial use (HS code 3302), solid cane or beet sugar and chemically pure sucrose (HS code 1701) and prepr binder for foundry (HS code 3824) (see table 3).

Overview:

After several years of continuous growth marked by a peak of 183.9 bln US\$ in 2008, the value of Sweden's exports dropped by 28.7 percent in 2009 but bounced back in 2010 by 20.6 percent to amount to 158.1 bln US\$ (see table 1 and graph 1). Imports increased by 23.7 percent and amounted to 148.4 bln US\$ (see table 2 and graph 1). The trade surplus decreased from 11.2 bln US\$ in 2009 to 9.7 bln US\$ in 2010 (see graph 1). By MDG regions, top trade surpluses were recorded with Developed North America (+8.1 bln US\$), Western Asia (+3.8 bln US\$) and Sub-Saharan Africa (+2.4 bln US\$) among others (see graph 2). Major trade deficits were recorded with Developed Europe (-7.6 bln US\$), the Commonwealth of Independent States (-3.7 bln US\$) and Eastern Asia (-3.0 bln US\$). In 2010, exports were more diversified across partners than imports: 20 major partners accounted for 80 percent of exports compared to 14 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, exports of machinery and transport equipment (SITC section 7), the largest commodity group for exports, increased by 21.8 percent and represented 36.8 percent of exported goods (see table 1). Other major commodity groups included manufactured goods classified chiefly by material (SITC section 6) and chemicals and related products, n.e.s. (SITC section 5) respectively with 18.6 and 11.4 percent of exports. In addition to Norway, other major markets for exports in 2010 were Germany and United Kingdom (see table 4). Sweden's main exported products over the last three years were petroleum oils, other than crude (HS code 2710), electrical apparatus for line telephony or line telegraphy (HS code 8517) and medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) (see table 3).

Imports Profile:

Similar to exports, machinery and transport equipment (SITC section 7) also accounted for a large share of imports in 2010 (see table 2). It represented 35.8 percent of total imports. Other major commodity groups for imports included manufactured goods classified chiefly by material (SITC section 6) and mineral fuels, lubricants and related materials (SITC section 3) respectively with 13.5 and 13.4 percent of imported goods. Petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), petroleum oils, other than crude (HS code 2710) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) were the top imported goods over the last three years (see table 5).

Overview:

From 2006 to 2010, the value of the exports of Switzerland-Liechtenstein increased on average by 7.2 percent each year despite a drop of 14.0 percent in 2009 and amounted to 195.4 bln US\$ (see table 1 and graph 1). During the same period, imports increased on average by 5.6 percent each year to reach 175.9 bln US\$ in 2010 (see table 2 and graph 1). This resulted in a trade surplus of 19.5 bln US\$ in 2010 (see graph 1). Switzerland-Liechtenstein's trade recorded surpluses with several MDG regions. The top trade surpluses were with Developed North America (+12.2 bln US\$), Eastern Asia (+8.7 bln US\$) and Western Asia (+6.8 bln US\$) (see graph 2). A major trade deficit was recorded with Developed Europe (-21.9 bln US\$). In 2010, exports were more diversified across partners than imports: 19 major partners accounted for 80 percent of exports compared to 11 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

Chemicals and related products, n.e.s. (SITC section 5), the largest commodity group for exports in 2010, increased by 10.5 percent and represented 38.2 percent of total exports (see table 1). Other major commodity groups for exports were miscellaneous manufactured articles (SITC section 8) and machinery and transport equipment (SITC section 7), respectively with 22.2 and 20.9 percent of exports. Germany, USA and Italy were the three largest markets for exports in 2010 (see table 4). Over the last three years, main exported goods were medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004), human blood; animal blood prepared for therapeutic uses (HS code 3002) and wrist-watches, pocket-watches and other watches, including stop-watches (HS code 9102) (see table 3).

Imports Profile:

In 2010, Switzerland-Liechtenstein's imports were composed of 26.9 percent of machinery and transport equipment (SITC section 7), 21.6 percent of chemicals and related products, n.e.s. (SITC section 5) and 20.9 percent of miscellaneous manufactured articles (SITC section 8) (see table 2). Over the last three years, main products for imports were medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and petroleum oils, other than crude (HS code 2710) (see table 5).

Syrian Arab Republic

Imports: CIF, by consignment

Exports: FOB, by last known destination

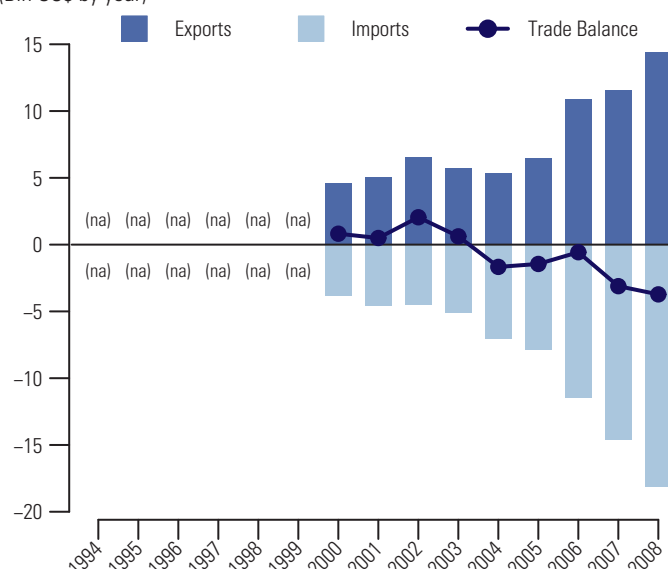

Trade System: Special

Overview:

From 2004 to 2008, exports of Syrian Arab Republic increased on average by 27.8 percent each year to 14.4 bln US\$ (see table 1 and graph 1). During the same period, imports increased on average by 26.6 percent each year to 18.1 bln US\$ (see table 2 and graph 1). Trade deficit more than doubled to 3.7 bln US\$ in 2008 compared to 1.7 bln US\$ in 2004 (see graph 1). Large deficits were recorded with the Commonwealth of Independent States (-4.2 bln US\$) and Eastern Asia (-2.8 bln US\$) (see graph 2). Large surpluses were recorded with Western Asia (+4.3 bln US\$) and Northern Africa (+0.6 bln US\$). Trade, especially imports, was diversified across partners: in 2008, 19 major partners accounted for 80 percent of imports compared to 11 major partners for exports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2008, exports of the Syrian Arab Republic were composed of 38.6 percent of mineral fuels, lubricants and related materials (SITC section 3), 20.8 percent of food, live animals, beverages and tobacco (SITC sections 0+1) and 17.6 percent of manufactured goods classified chiefly by material (SITC section 6) (see table 1). Iraq, Germany and Lebanon were the top three markets in 2008 (see table 4). From 2006 to 2008, top exported products included petroleum oils, crude (HS code 2709), petroleum oils, other than crude (HS code 2710) and woven fabrics of synthetic filament yarn (HS code 5407) (see table 3).

Imports Profile:

In 2008, imports of the Syrian Arab Republic were composed of 31.4 percent of mineral fuels, lubricants and related materials (SITC section 3), 25.5 percent of manufactured goods classified chiefly by material (SITC section 6) and 12.1 percent of chemical and related products, n.e.s. (SITC section 5) (see table 2). From 2006 to 2008, top imported products included petroleum oils, other than crude (HS code 2710), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and semi-finished products of iron or non-alloy steel (HS code 7207) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 175.9 bln US\$ in 2008, the value of the exports of Thailand dropped in 2009 (by 13.3 percent) but increased again in 2010 by 28.1 percent to amount to 195.3 bln US\$, well above its 2008 level (see table 1 and graph 1). Imports showed a similar development with an increase by 36.3 percent to 182.4 bln US\$ in 2010 (see table 2 and graph 1). This resulted in a trade surplus of 12.9 bln US\$ in 2010 (see graph 1). Trade with South-eastern Asia, Developed North America and Developed Europe recorded surpluses amounting respectively to 11.7 bln US\$, 10.0 bln US\$ and 6.8 bln US\$ (see graph 2). Trade recorded significant deficits with Developed Asia-Pacific (-13.7 bln US\$) and Western Asia (-11.5 bln US\$) among others. Compared to imports, exports were diversified across partners: 21 major partners accounted for 80 percent of exports compared to 15 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

Machinery and transport equipment (SITC section 7) accounted for 42.2 percent of exported goods in 2010. Other major commodity groups included food, live animals, beverages and tobacco (SITC sections 0+1) and manufactured goods classified chiefly by material (SITC section 6): they accounted respectively for 12.6 and 12.2 percent (see table 1). Top markets for exports were China, Japan and USA all having large shares of exports of machinery and transport equipment (SITC section 7) (see table 4). From 2008 to 2010, Thailand's main exported products were automatic data processing machines and units thereof (HS code 8471), petroleum oils, other than crude (HS code 2710) and electronic integrated circuits (HS code 8542) (see table 3).

Imports Profile:

In 2010, machinery and transport equipment (SITC section 7) accounted for over one-third (35.3 percent) of imports (see table 2). Other major commodity groups included manufactured goods classified chiefly by material (SITC section 6) and mineral fuels, lubricants and related materials (SITC section 3), respectively with 18.2 and 17.4 percent of imports. Main imported goods were petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), electronic integrated circuits (HS code 8542) and gold (including gold plated with platinum) (HS code 7108) (see table 5).

The former Yugoslav Republic of Macedonia

Imports: CIF, by origin

Exports: FOB, by last known destination

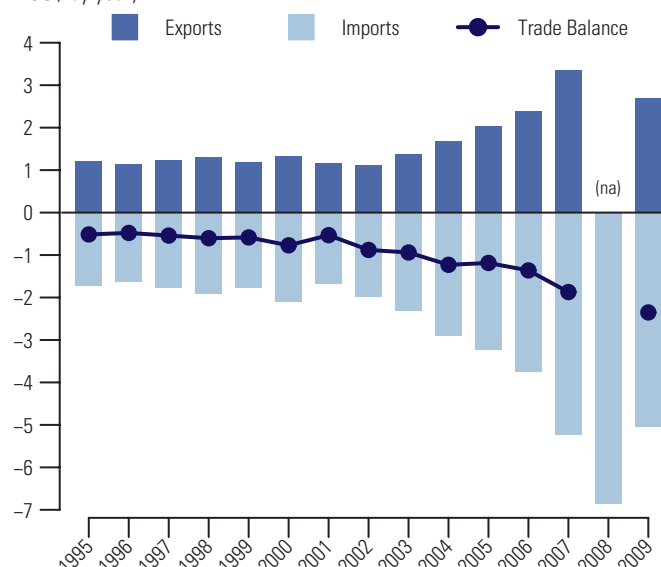

Trade System: Special

Overview:

Since 2005, exports of The Former Yugoslav Republic of Macedonia increased on average by 7.2 percent each year and amounted to 2.7 bln US\$ in 2009 (see table 1 and graph 1). Imports registered a continuous increase marked by a peak of 6.9 bln US\$ in 2008 before dropping by 26.4 percent to 5.0 bln US\$ in 2009 (see table 2 and graph 1). The trade balance recorded a deficit of 2.4 bln US\$ in 2009 (see graph 1). By MDG regions, TFYR of Macedonia recorded a trade deficit of 1.1 bln US\$ with Developed Europe (see graph 2). Major trade deficits were also recorded with Commonwealth of Independent States (-552.0 mln US\$) and Eastern Asia (-335.0 mln US\$). South-eastern Europe is the only region with a trade surplus (+255.0 mln US\$). In 2009, imports were more diversified across partners than exports: 18 major partners accounted for 80 percent of imported goods compared to 9 major partners for exports (see graph 3). See footnote*.

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2009, TFYR of Macedonia's exports were composed of 27.5 percent of miscellaneous manufactured articles (SITC section 8), 26.2 percent of commodities and transactions not classified elsewhere (SITC section 9) and 17.9 percent of food, live animals, beverages and tobacco (SITC sections 0+1) (see table 1). Serbia, Germany and Greece were the three main markets for exports (see table 4). A large share (79.9 percent) of exports to Germany was composed of miscellaneous manufactured articles (SITC section 8). Over the last three years, top exported goods included ferro-alloys (HS code 7202), women's or girls' suits, ensembles, jackets, blazers, dresses, skirts (HS code 6204) and flat-rolled products of iron or non-alloy steel (HS code 7208) (see table 3).

Imports Profile:

In 2009, imports were composed of 23.8 percent of manufactured goods classified chiefly by material (SITC section 6), 20.6 percent of machinery and transport equipment (SITC section 7) and 16.8 percent of commodities and transactions not classified elsewhere (SITC section 9) (see table 2). Over the last three years, top imported products included petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), electrical energy (HS code 2716) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) (see table 5).

Overview:

In 2010, exports of Togo amounted to 770.4 mln US\$, a 175.1 percent increase compared to 2007 (see table 1 and graph 1). Imports amounted to 855.5 mln US\$ in 2010 compared to 787.1 mln US\$ in 2007 (see table 2 and graph 1). This resulted in a trade deficit of 85.1 mln US\$ in 2010 (see graph 1). This deficit came largely from trade with Developed Europe (-268.9 mln US\$), Developed North America (-39.1 mln US\$) and Eastern Asia (-38.6 mln US\$) (see graph 2). Major surplus was recorded with Sub-Saharan Africa (+296 mln US\$). Togo's exports were diversified in 2010: 15 major partners accounted for 80 percent of exports compared to 19 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Mln US\$ by year)

**Exports Profile:**

In 2010, the majority of the exports of Togo were inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) and manufactured goods classified chiefly by material (SITC section 6): they accounted respectively for 37.0 and 23.3 percent of exports (see table 1). Major destinations in 2010 were China, Benin and Burkina Faso (see table 4). More than 97.0 percent of exports to China were inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4). The top commodities for exports in 2010 were cotton, not carded or combed (HS code 5201), portland cement, aluminous cement, slag cement (HS code 2523) and gold (including gold plated with platinum) (HS code 7108) (see table 3).

Overview:

From 2003 to 2007, Tonga's exports dropped on average by 16.3 percent each year and amounted to 8.0 mln US\$ in 2007 (see table 1 and graph 1). During the same period, imports increased on average by 11.3 percent each year to 142.6 mln US\$ resulting in a trade deficit of 134.5 mln US\$ (see table 2 and graph 1). By MDG regions, deficits with Developed Asia-Pacific and South-eastern Asia amounted respectively to 64.1 mln US\$ and 34.1 mln US\$ (see graph 2). Major deficits were also recorded with Oceania (-12.5 mln US\$), Developed North America (-12.3 mln US\$) and Eastern Asia (-9.6 mln US\$). Both imports and exports were concentrated among a few partners: in 2007, 4 (respectively 5) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Mln US\$ by year)

**Exports Profile:**

In 2007, two commodity groups accounted for a large part of Tonga's exports: food, live animals, beverages and tobacco (SITC sections 0+1) and commodities and transactions not classified elsewhere (SITC section 9) (see table 1). Their exports dropped respectively by 12.0 and 16.7 percent and they accounted for 47.0 and 44.4 percent of total exports in 2007. Major markets for exported goods were New Zealand, USA and Japan (see table 4). Exports to New Zealand and Japan were in majority food, live animals, beverages and tobacco (SITC sections 0+1) while 83.2 percent of exports to USA were commodities and transactions not classified elsewhere (SITC section 9). From 2005 to 2007, top products for exports were vegetables nes, fresh or chilled (HS code 0709), manioc, arrowroot, salep etc, fresh, dried, sago pith (HS code 0714) and locust beans, seaweed, sugar beet, cane, for food (HS code 1212) (see table 3).

Imports Profile:

In 2007, commodities and transactions not classified elsewhere (SITC section 9) accounted for a third of imported goods (see table 2). Other major commodity groups included mineral fuels, lubricants and related materials (SITC section 3) and food, live animals, beverages and tobacco (SITC sections 0+1) respectively with 24.8 and 21.9 percent of imports. From 2005 to 2007, top imported products were oils petroleum, bituminous, distillates, except crude (HS code 2710), meat of sheep or goats, fresh, chilled or frozen (HS code 0204) and meat, edible offal of domestic poultry (HS code 0207) (see table 5).

Trinidad and Tobago

Imports: CIF, by origin

Exports: FOB, by last known destination

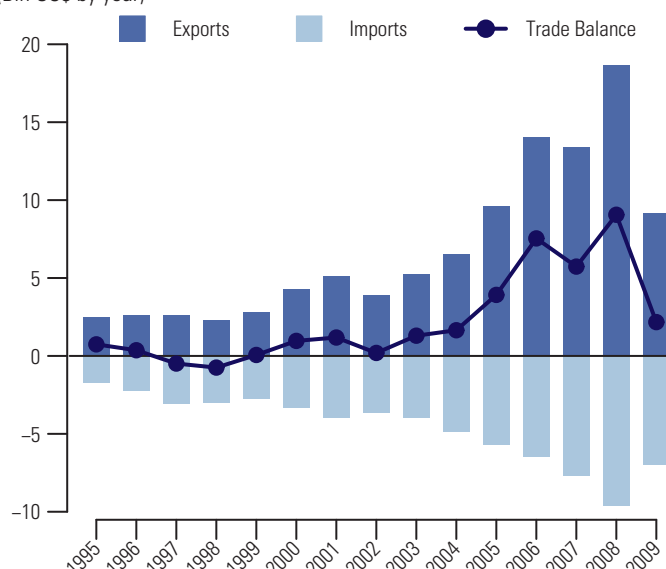

Trade System: Special

Overview:

After several years of continuous growth marked by a peak of 18.7 bln US\$ in 2008, the value of exports of Trinidad and Tobago dropped by 51.1 percent in 2009 and amounted to 9.1 bln US\$ (see table 1 and graph 1). Imports showed a similar development with a decline of 27.5 percent in 2009 to 7.0 bln US\$ (see table 2 and graph 1). The trade surplus decreased from 9.1 bln US\$ in 2008 to 2.2 bln US\$ in 2009 (see graph 1). Trade with Developed North America recorded a surplus of 2.7 bln US\$ (see graph 2). Other major surpluses were recorded with Latin America and the Caribbean (+717.7 mln US\$) and Developed Europe (+487.3 mln US\$). However, trade with Sub-Saharan Africa recorded a deficit of 696.5 mln US\$. By partners, 11 major partners accounted for 80 percent of exports compared to 12 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

Mineral fuels, lubricants and related materials (SITC section 3) accounted for three-fourths of exports in 2009 in spite of a drop of 47.0 percent compared to 2008 (see table 1). Exports of chemicals and related products, n.e.s. (SITC section 5) decreased by 74.2 percent and accounted for 9.6 percent of exports. USA, the top market for exported goods, accounted for 54.4 percent of exports (see table 4). Other major partners were Jamaica and Spain. The majority of exports to these partners were mineral fuels, lubricants and related materials (SITC section 3). Over the last three years, top exported goods were petroleum products: petroleum gases and other gaseous hydrocarbons (HS code 2711), petroleum oils, other than crude (HS code 2710) and petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709) (see table 3).

Imports Profile:

In 2009, mineral fuels, lubricants and related materials (SITC section 3), largely crude petroleum oils, accounted for nearly one-third of imported goods (32.9 percent) (see table 2). Other major commodity groups included machinery and transport equipment (SITC section 7) and manufactured goods classified chiefly by material (SITC section 6) respectively with 27.6 percent and 13.1 percent. Top imported products over the last three years were petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), iron ores and concentrates, including roasted iron pyrites (HS code 2601) and machinery, plant or laboratory equipment (HS code 8419) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 19.3 bln US\$ in 2008, the value of the exports of Tunisia dropped by 25.2 percent in 2009 and amounted to 14.4 bln US\$, well below its 2007 level (see table 1 and graph 1). Imports showed a similar pattern with a decline of 22.5 percent in 2009 to 19.1 bln US\$ (see table 2 and graph 1). The trade balance recorded a deficit of 4.7 bln US\$ in 2009 (see graph 1). Significant deficits were recorded with Developed Europe (-1.2 bln US\$), Eastern Asia (-1.2 bln US\$) and Commonwealth of Independent States (-1.0 bln US\$) (see graph 2). Trade, especially imports, was diversified across partners: in 2009, 16 major partners accounted for 80 percent of imports compared to 9 major partners for exports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2009, Tunisia's exports were composed of 29.9 percent of miscellaneous manufactured articles (SITC section 8), 25.1 percent of machinery and transport equipment (SITC section 7) and 13.6 percent of mineral fuels, lubricants and related materials (SITC section 3) (see table 1). There was an overall decrease in exports for all commodity groups in 2009. Top markets for exported goods were France, Italy and Germany (see table 4). Main exported goods over the last three years included petroleum oils, crude (HS code 2709), insulated (including enamelled or anodised) wire, cable (HS code 8544) and men's or boys' suits, ensembles, jackets, blazers, trousers (HS code 6203) (see table 3).

Imports Profile:

Imports trade were composed of 34.6 percent of machinery and transport equipment (SITC section 7), 22.7 percent of manufactured goods classified chiefly by material (SITC section 6) and 11.4 percent of mineral fuels, lubricants and related materials (SITC section 3). From 2007 to 2009, top imported commodities included petroleum oils, other than crude (HS code 2710), petroleum oils, crude (HS code 2709) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 132.0 bln US\$ in 2008, the value of the exports of Turkey contracted sharply in 2009 (by 22.6 percent) but bounced back in 2010 by 11.6 percent to amount to 114.0 bln US\$, still well below its 2008 level (see table 1 and graph 1). Imports showed a more pronounced development with an increase by 31.7 percent to 185.5 bln US\$ in 2010 (see table 2 and graph 1). The trade deficit increased from 38.7 bln US\$ in 2009 to 71.6 bln US\$ in 2010 (see graph 1). By MDG regions, large deficits were recorded with the Eastern Asia (-21.0 bln US\$), Developed Europe (-19.8 bln US\$) and Commonwealth of Independent States (-19.8 bln US\$) (see graph 2). Trade with Western Asia recorded a surplus amounting to 11.6 bln US\$. Turkey's trade was highly diversified across partners: more than 25 major partners accounted for 80 percent of exports while 25 major partners accounted for 80 percent of imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2010, Turkey's exports were composed of 29.1 percent of manufactured goods classified chiefly by material (SITC section 6), 27.9 percent of machinery and transport equipment (SITC section 7) and 17.2 percent of miscellaneous manufactured articles (SITC section 8) (see table 1). Major partners for exports were Germany, United Kingdom and Italy (see table 4). Over the last three years, top exported products were motor cars and other motor vehicles principally designed for the transport (HS code 8703), other bars and rods of iron or non-alloy steel (HS code 7214) and petroleum oils, other than crude (HS code 2710) (see table 3).

Imports Profile:

Imported goods in 2010 were composed of 29.0 percent of machinery and transport equipment (SITC section 7), 17.1 percent of manufactured goods classified chiefly by material (SITC section 6) and 14.4 percent of mineral fuels, lubricants and related materials (SITC section 3) (see table 2). Over the last three years, major products for imports included petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), petroleum oils, other than crude (HS code 2710) and ferrous waste and scrap; remelting scrap ingots of iron or steel (HS code 7204) (see table 5).

Overview:

After a peak of 24.8 mln US\$ in 2008, the value of the exports of Turks and Caicos Islands dropped by 16.2 percent in 2009 and amounted to 20.8 mln US\$ (see table 1 and graph 1). Imports showed a more pronounced development with a drop of 36.5 percent in 2009 to 375.4 mln US\$ (see table 2 and graph 1). The trade balance recorded a deficit of 354.6 mln US\$ in 2009, compared to 566.5 mln US\$ in 2008 (see graph 1). This deficit was accounted for mainly by trade with Developed North America (-348.5 mln US\$) (see graph 2). Imports and exports were concentrated with one partner country (see graph 3).

Graph 1: Total imports, exports and trade balance

(Mln US\$ by year)

Exports Profile:

In 2009, 60.3 percent of exports were reported as machinery and transport equipment (SITC section 7) (see table 1). Food, live animals, beverages and tobacco (SITC sections 0+1) and commodities and transactions not classified elsewhere (SITC section 9) accounted respectively for 21.2 and 6.9 percent of exports. USA, the top partner for exports was the destination of over 99.0 percent of exports (see table 4). From 2007 to 2009, top products for exports were crustaceans, molluscs and other aquatic invertebrates (HS code 1605), crustaceans, whether in shell or not (HS code 0306) and self-propelled bulldozers, angledozers, graders, levellers, scrapers (HS code 8429) (see table 3).

Imports Profile:

Imports in 2009 were composed of 20.6 percent each of food, live animals, beverages and tobacco (SITC sections 0+1) and machinery and transport equipment (SITC section 7) (see table 2). Other major commodity groups for imports were miscellaneous manufactured articles (SITC section 8) and manufactured goods classified chiefly by material (SITC section 6), respectively with 19.7 and 16.5 percent of imports. Over the last three years, top imported products were petroleum oils, other than crude (HS code 2710), unused postage, revenue or similar stamps of current or new issue (HS code 4907) and printed books, brochures, leaflets and similar printed matter (HS code 4901) (see table 5).

Overview:

After several years of continuous growth, the value of the Uganda's exports dropped by 9.1 percent in 2009 and amounted to 1.6 bln US\$ (see table 1 and graph 1). Imports showed a similar development with a decline of 6.2 percent in 2009 to 4.2 bln US\$ (see table 2 and graph 1). This resulted in a trade deficit of 2.7 bln US\$ in 2009 (see graph 1). Trade was in deficit with all MDG regions (see graph 2). The largest deficit was recorded with Western Asia (-625.5 mln US\$). Large deficits were also recorded with Southern Asia (-531.8 mln US\$), Eastern Asia (-455.0 mln US\$) and Developed Europe (-343.5 mln US\$). Uganda's trade was relatively diversified across partners: 14 (respectively 17) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2009, food, live animals, beverages and tobacco (SITC sections 0+1) accounted for nearly half of Uganda's exports (47.0 percent) (see table 1). Other major commodity groups included manufactured goods classified chiefly by material (SITC section 6), machinery and transport equipment (SITC section 7) and inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) respectively with 14.3, 13.1 and 10.6 percent of exports. In 2009, the three largest markets for exports were Sudan, Kenya and Democratic Republic of Congo (see table 4). Coffee, whether or not roasted or decaffeinated (HS code 0901), the top commodity for exports over the last three years, accounted for 17.9 percent of exports in 2009 (see table 3). Other top commodities included fish fillets and other fish meat (whether or not minced) (HS code 0304) and transmission apparatus for radio-telephony, radio-broadcasting (HS code 8525) (see table 3).

Imports Profile:

Uganda's imports in 2009 were composed of 30.0 percent of machinery and transport equipment (SITC section 7), 17.9 percent of manufactured goods classified chiefly by material (SITC section 6) and 17.5 percent of mineral fuels, lubricants and related materials (SITC section 3) (see table 2). From 2007 to 2009, top commodities for imports were petroleum oils, other than crude (HS code 2710), medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) and palm oil and its fractions (HS code 1511) and (see table 5).

Overview:

After several years of continuous growth marked by a peak of 67.0 bln US\$ in 2008, the value of the exports of Ukraine contracted sharply in 2009 (by 40.7 percent) but bounced back in 2010 by 29.6 percent to amount to 51.4 bln US\$, still well below its 2008 level (see table 1 and graph 1). Imports showed a similar development with an increase by 33.7 percent to 60.7 bln US\$ in 2010 (see table 2 and graph 1). This resulted in a trade deficit of 9.3 bln US\$ in 2010 (see graph 1). This deficit came largely from trade with the Commonwealth of Independent States (-7.6 bln US\$), Developed Europe (-6.7 bln US\$) and Eastern Asia (-3.7 bln US\$) (see graph 2). Trade, however, recorded a large surplus with Western Asia (+5.6 bln US\$). Trade, especially exports, was well diversified across partners: more than 25 major partners accounted for 80 percent of exports in 2010; 16 major partners accounted for 80 percent of imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

Manufactured goods classified chiefly by material (SITC section 6), the largest commodity group for exports, accounted for 37.1 percent of exported goods in 2010 (see table 1). Other major commodity groups included machinery and transport equipment (SITC section 7) and inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4), respectively with 17.3 and 15.3 percent of exports. In addition to Russian Federation, other major partners included Turkey and Italy (see table 4). Over the last three years, top exported products included semi-finished products of iron or non-alloy steel (HS code 7207), flat-rolled products of iron or non-alloy steel (HS code 7208) and petroleum oils, other than crude (HS code 2710) (see table 3).

Imports Profile:

In 2010, imports were composed of 32.3 percent of mineral fuels, lubricants and related materials (SITC section 3), 19.5 percent of machinery and transport equipment (SITC section 7) and 14.4 percent of manufactured goods classified chiefly by material (SITC section 6) (see table 2). From 2008 to 2010, petroleum products were the top three products for imports: petroleum gases and other gaseous hydrocarbons (HS code 2711), petroleum oils, crude (HS code 2709) and petroleum oils, other than crude (HS code 2710) (see table 5).

Overview:

After several years of continuous growth, the value of United Arab Emirates exports dropped by 16.8 percent in 2009 and amounted to 174.7 bln US\$ (see table 1 and graph 1). Imports showed a less pronounced development with a decline of 6.4 percent in 2009 to 164.3 bln US\$ (see table 2 and graph 1). This resulted in a trade surplus of 10.4 bln US\$ in 2009 (see graph 1). By MDG regions, a large deficit was recorded with Developed Europe (-26.5 bln US\$) (see graph 2). Deficits were also recorded with Developed North America (-10.7 bln US\$) and Developed Asia-Pacific (-9.0 bln US\$). Trade, however, recorded large surplus with Eastern Asia (+23.4 bln US\$). Exports were concentrated among few partners but imports were diversified: in 2009, 5 major partners accounted for 80 percent of exports compared to 15 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2009, more than a third of exported goods were mineral fuels, lubricants and related materials (SITC section 3) (see table 1): they represented 36.9 percent. Commodities and transactions not classified elsewhere (SITC section 9) accounted for 37.0 percent of exports. Other major commodity groups for exports included machinery and transport equipment (SITC section 7) and manufactured goods classified chiefly by material (SITC section 6), respectively with 9.5 and 8.4 percent of exports. Other Asia, nes, India and Iran were the three major partners for exported goods (see table 4). From 2007 to 2009, top exported commodities were petroleum oils, crude (HS code 2709), petroleum oils, other than crude (HS code 2710) and gold (including gold plated with platinum) (HS code 7108) (see table 3).

Imports Profile:

In 2009, imports were composed of 35.0 percent of commodities and transactions not classified elsewhere (SITC section 9), 27.3 percent of machinery and transport equipment (SITC section 7) and 15.7 percent of manufactured goods classified chiefly by material (SITC section 6) (see table 2). From 2007 to 2009, top imported products were gold (including gold plated with platinum) (HS code 7108), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and diamonds, whether or not worked, but not mounted or set (HS code 7102) (see table 5).

United Kingdom

Imports: CIF, by origin/consignment for intra-eu

Exports: FOB, by last known destination

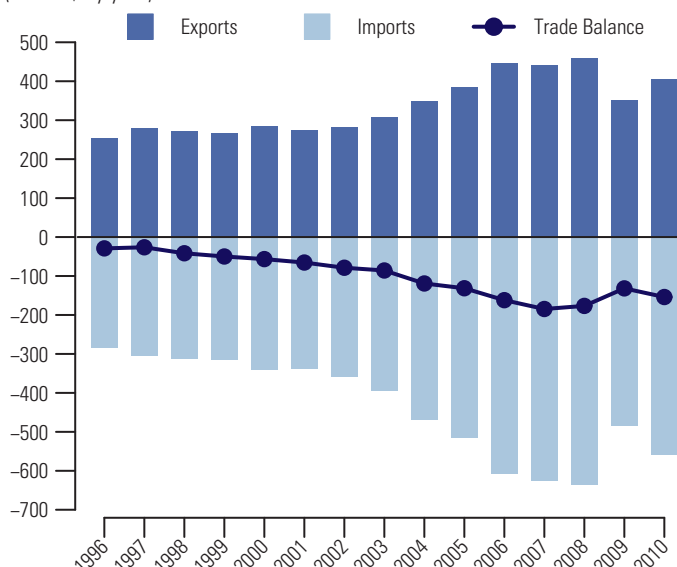

Trade System: General

Overview:

After several years of continuous growth marked by a peak of 457.7 bln US\$ in 2008, the value of the exports of United Kingdom contracted sharply in 2009 (by 23.3 percent) but bounced back in 2010 by 15.3 percent to amount to 404.7 bln US\$, still well below its 2008 level (see table 1 and graph 1). Imports showed a similar development with an increase of 15.7 percent to 558.6 bln US\$ in 2010 (see table 2 and graph 1). This resulted in a trade deficit of 153.9 bln US\$ in 2010, slightly higher than the 2009 deficit of 131.7 bln US\$ (see graph 1). This deficit came largely from trade with Developed Europe (-100.9 bln US\$) and Eastern Asia (-41.4 bln US\$) (see graph 2). Trade, however, recorded surpluses with Western Asia (+6.3 bln US\$) and Developed North America (+2.4 bln US\$). United Kingdom's trade was well diversified across partners: in 2010, respectively 23 and 20 major partners accounted for 80 percent of exports and imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2010, machinery and transport equipment (SITC section 7), chemicals and related products, n.e.s. (SITC section 5) and mineral fuels, lubricants and related materials (SITC section 3) accounted respectively 31.6, 17.9 and 12.7 percent of exported goods (see table 1). The three major markets for exports were USA, Germany and Netherlands (see table 4). Main exported goods over the last three years were medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004), petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) (see table 3).

Imports Profile:

In 2010, machinery and transport equipment (SITC section 7) accounted for 31.3 percent of imported goods (see table 2). Other major commodity groups included miscellaneous manufactured articles (SITC section 8) and manufactured goods classified chiefly by material (SITC section 6) respectively with 15.3 and 12.3 percent of imports. Over the last three years, top commodities for imports included motor cars and other motor vehicles principally designed for the transport (HS code 8703), petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709) and petroleum oils, other than crude (HS code 2710) (see table 5).

United Republic of Tanzania

Imports: CIF, by origin

Exports: FOB, by last known destination

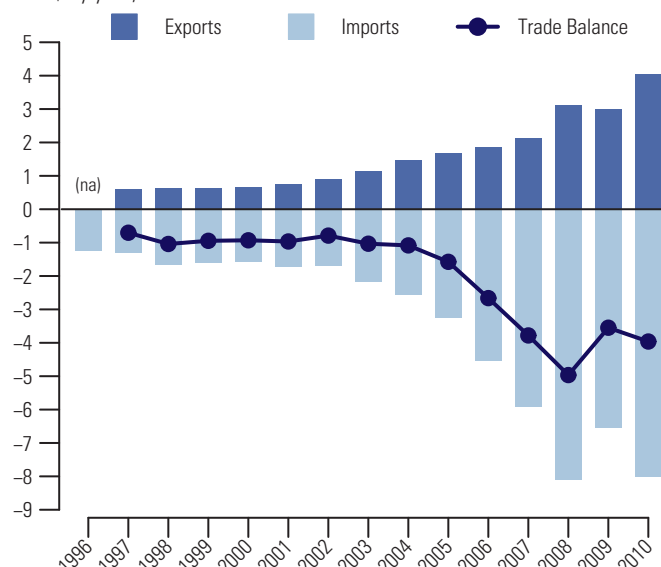

Trade System: General

Overview:

After several years of continuous growth marked by a peak of 3.1 bln US\$ in 2008, the value of the exports of United Republic of Tanzania dropped in 2009 (by 4.4 percent) but bounced back in 2010 by 35.8 percent to amount to 4.1 bln US\$, well above the peak reached in 2008 (see table 1 and graph 1). Imports showed a similar development with an increase by 22.7 percent to 8.0 bln US\$ in 2010. This resulted in a trade deficit of 4.0 bln US\$, slightly higher than the 2009 deficit of 3.5 bln US\$ (see graph 1). Large deficits were recorded with Western Asia (-1.0 bln US\$), Southern Asia (-0.7 bln US\$) and South-eastern Asia (-0.6 bln US\$) (see graph 2). Trade recorded a surplus of 0.2 bln US\$ with Sub-Saharan Africa. By partner, trade was diversified: in 2010, 13 (respectively 17) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2010, exports of inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) increased by 59.8 percent and accounted for 32.7 percent of exports. Other major commodity groups were commodities and transactions not classified elsewhere (SITC section 9) and food, live animals, beverages and tobacco (SITC sections 0+1), respectively with 24.1 and 20.7 percent of exports. Top markets for exports included Switzerland, China and South Africa (see table 4). Exports to Switzerland were mainly commodities and transactions not classified elsewhere (SITC section 9) (77.6 percent) while 98.4 percent of exports to China were inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4). In addition to gold (including gold plated with platinum) (HS code 7108), other major products exported from 2008 to 2010 included precious metal ores and concentrates (HS code 2616) and unmanufactured tobacco; tobacco refuse (HS code 2401) (see table 3).

Imports Profile:

Machinery and transport equipment (SITC section 7), mineral fuels, lubricants and related materials (SITC section 3) and manufactured goods classified chiefly by material (SITC section 6) were the three major commodity groups for imports: they accounted respectively for 29.7, 27.6 and 14.4 percent of imported goods in 2010 (see table 2). From 2008 to 2010, top imported goods were petroleum oils, other than crude (HS code 2710), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and wheat and meslin (HS code 1001) (see table 5).

United States of America, including Puerto Rico and U.S.V.I.

Imports: CIF, by origin

Exports: FOB, by last known destination

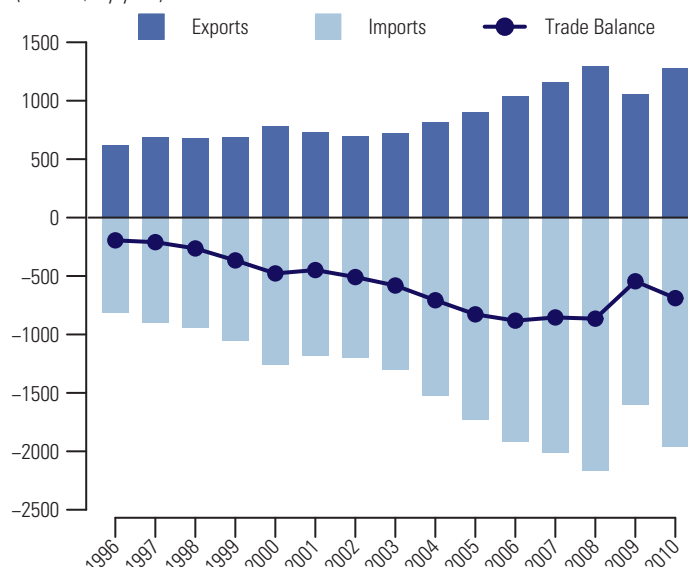

Trade System: General

Overview:

From 2006 to 2010, exports of United States of America, including Puerto Rico and U.S.V.I. increased on average by 5.3 percent each year and amounted to 1,277.1 bln US\$ in 2010, almost reaching its previous level of 2008 after a significant decline in 2009 (see table 1). Imports increased on average by 0.6 percent each year and reached 1,966.5 bln US\$ (see table 2). This resulted in a trade deficit of 689.4 bln US\$ in 2010, higher than the 2009 deficit of 545.2 bln US\$ (see graph 1). Trade was in deficit with nearly all MDG regions (see graph 2). The largest deficit was recorded with Eastern Asia (-291.7 bln US\$). Other major deficits were recorded with Developed Europe (-86.8 bln US\$), Latin America & the Caribbean (-67.6 bln US\$) and Developed Asia-Pacific (-50.1 bln US\$). Trade was well diversified across partners: in 2010, respectively 22 and 20 major partners accounted for 80 percent of exports and imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2010, machinery and transport equipment (SITC section 7), the largest commodity group, increased by 22.4 and accounted for 35.2 percent of exported goods (see table 1). Other major commodity groups of exports included chemicals and related products, n.e.s. (SITC section 5) (14.8 percent), miscellaneous manufactured articles (SITC section 8) (10.5 percent) and commodities and transactions not classified elsewhere (SITC section 9) (10.3 percent). Major markets for exports were Canada, Mexico and China (see table 4). From 2008 to 2010, top products for exports included petroleum oils, other than crude (HS code 2710), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and electronic integrated circuits (HS code 8542) (see table 3).

Imports Profile:

Imports in 2010 were composed of 37.0 percent of machinery and transport equipment (SITC section 7), 18.4 percent of mineral fuels, lubricants and related materials (SITC section 3) and 15.3 percent of miscellaneous manufactured articles (SITC section 8) (see table 2). Top imported products over the last three years were petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and petroleum oils, other than crude (HS code 2710) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 5.9 bln US\$ in 2008, the value of the exports of Uruguay dropped by 9.4 percent in 2009 and amounted to 5.4 bln US\$ (see table 1 and graph 1). Imports showed a more pronounced development with a decline of 23.8 percent in 2009 to 6.9 bln US\$ (see table 2 and graph 1). The trade deficit dropped by half to 1.5 bln US\$ in 2009 (see graph 1). Major deficits were recorded with Latin America & the Caribbean (-1.7 bln US\$), Eastern Asia (-0.6 bln US\$) and Developed North America (-0.4 bln US\$) (see graph 2). Trade with Western Asia recorded a surplus of 0.3 bln US\$. Compared to imports, exports were well diversified across partners: 18 major partners accounted for 80 percent of exports compared to 8 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

Exports of food, live animals, beverages and tobacco (SITC sections 0+1), the largest commodity group, decreased by 5.1 percent in 2009 and represented 54.3 percent of exported goods (see table 1). Other major commodity groups included inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) and manufactured goods classified chiefly by material (SITC section 6). They accounted respectively for 19.3 and 8.7 percent of exports in 2009. Major destinations for exports included Brazil, Argentina and China (see table 4). The majority of exports to Brazil were food, live animals, beverages and tobacco (SITC sections 0+1). Over the last three years, top export commodities were meat of bovine animals, frozen (HS code 0202), rice (HS code 1006) and soya beans, whether or not broken (HS code 1201) (see table 3).

Imports Profile:

In 2009, imports of machinery and transport equipment (SITC section 7), the largest commodity group, decreased by 16.6 percent and accounted for 28.2 percent of imported goods (see table 2). Other major commodity groups included mineral fuels, lubricants and related materials (SITC section 3) and chemicals and related products, n.e.s. (SITC section 5) respectively with 24.4 and 16.1 percent of imports. Over the last three years, top products for imports were petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), petroleum oils, other than crude (HS code 2710) and electrical apparatus for line telephony or line telegraphy (HS code 8517) (see table 5).

Overview:

In 2007, Vanuatu's exports dropped by 18.5 percent to 29.9 mln US\$ while imports increased by 26.8 percent and amounted to 201.7 mln US\$ (see tables 1, 2 and graph 1). This resulted in a trade deficit of 171.8 mln US\$ (see graph 1). Trade was in deficit with nearly all MDG regions (see graph 2). Deficit with Developed Asia-Pacific alone amounted to 102.2 mln US\$. Significant deficits were recorded with South-eastern Asia (-29.8 mln US\$), Oceania (-20.4 mln US\$) and Eastern Asia (-17.8 mln US\$). Vanuatu's trade was concentrated among a few partners: in 2007, 9 (respectively 6) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Mln US\$ by year)

Exports Profile:

In 2007, exports of inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) increased by 30.8 percent and represented 34.4 percent of exported goods (see table 1). However, exports of food, live animals, beverages and tobacco (SITC sections 0+1) and commodities and transactions not classified elsewhere (SITC section 9) dropped respectively by 29.0 and 38.8 percent accounting for 29.3 and 27.7 percent of exported goods. Major partners for exports were Philippines, New Caledonia and Fiji (see table 4). In 2007, exports to Philippines were exclusively inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4). From 2005 to 2007, top exported products were locust beans, seaweed, sugar beet, cane, for food (HS code 1212), copra (HS code 1203) and coconut, palm kernel, babassu oil, fractions, refined (HS code 1513) (see table 3).

Imports Profile:

In 2007, imports were composed of 24.5 percent of machinery and transport equipment (SITC section 7) and 20.3 percent of food, live animals, beverages and tobacco (SITC sections 0+1) (see table 2). Imports of mineral fuels, lubricants and related materials (SITC section 3) increased nearly twofold (93.0 percent) and accounted for 18.1 percent of imported goods. From 2005 to 2007, top imported products were oils petroleum, bituminous, distillates, except crude (HS code 2710), rice (HS code 1006) and motor vehicles for the transport of goods (HS code 8704) (see table 5).

Overview:

Venezuela's exports dropped significantly in 2009 by 32.2 percent and amounted to 56.6 bln US\$ (see table 1). Similarly, imports dropped by 18.5 percent to reach 38.7 bln US\$ (see table 2). This resulted in a trade surplus of 17.9 bln US\$ in 2009 compared to 36.0 bln US\$ in 2008 (see graph 1). By MDG regions, large surpluses were recorded with Developed North America (+3.4 bln US\$) and Latin America and the Caribbean (+2.5 bln US\$) (see graph 2). Significant deficits were recorded with Developed Europe (-2.4 bln US\$) and Eastern Asia (-2.0 bln US\$). By partners, 3 major partners accounted for 80 percent of exported goods compared to 13 major partners for imported goods (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2009, the top commodity group for exports of Venezuela was mineral fuels, lubricants and related materials (SITC section 3), still accounting for 95.8 percent of total exports despite a drop of 30.6 percent (see table 1). Other top commodities were manufactured goods classified chiefly by material (SITC section 6), chemicals and related products, n.e.s. (SITC section 5) and inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4) with respectively 2.6 percent, 0.5 percent and 0.5 percent in 2009. Exports of both SITC sections 2+4 and 5 decreased by more than 60 percent. Major partners for exports were USA, Colombia and China (see table 4). Over the last three years, top three exported goods were petroleum oils, crude (HS code 2709), petroleum oils, other than crude (HS code 2710) and unwrought aluminium (HS code 7601) (see table 3).

Imports Profile:

In 2009, imports were composed of 34.4 percent of machinery and transport equipment (SITC section 7), 17.1 percent of chemicals and related products, n.e.s. (SITC section 5), and 14.9 percent each of manufactured goods classified chiefly by material (SITC section 6) and food, live animals, beverages and tobacco (SITC sections 0+1) (see table 2). From 2007 to 2009, top imported products were transmission apparatus for radio-telephony, radio-broadcasting (HS code 8525), motor cars and other motor vehicles principally designed for the transport (HS code 8703) and medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) (see table 5).

Overview:

After several years of continuous growth, the value of the Viet Nam's exports dropped by 8.9 percent in 2009 and amounted to 57.1 bln US\$ (see table 1 and graph 1). Imports showed a similar development with a decline of 13.3 percent in 2009 to 69.9 bln US\$ (see table 2 and graph 1). This resulted in a trade deficit of 12.9 bln US\$ in 2009 compared to 18.0 bln US\$ deficit in 2008 (see graph 1). By MDG regions, large deficits were recorded with Eastern Asia (-20.7 bln US\$) and South-eastern Asia (-7.6 bln US\$) (see graph 2). However, large surpluses were recorded with Developed North America (+9.1 bln US\$), Developed Europe (+6.0 bln US\$) and Sub-Saharan Africa (+0.8 bln US\$). Trade, especially exports, was diversified across partners: 18 major partners accounted for 80 percent of exports compared to 11 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

In 2009, exports were composed of 34.8 percent of miscellaneous manufactured articles (SITC section 8), 20.5 percent of food, live animals, beverages and tobacco (SITC sections 0+1) and 14.9 percent of mineral fuels, lubricants and related materials (SITC section 3) (see table 1). Major markets for exported goods were USA, Japan and China (see table 4). A large share of exports to the USA were miscellaneous manufactured articles (SITC section 8) at 67.9 percent. From 2007 to 2009, top exported products included petroleum oils, crude (HS code 2709), rice (HS code 1006) and footwear with outer soles of rubber, plastics, leather (HS code 6403) (see table 3).

Imports Profile:

Imports in 2009 were composed of 31.3 percent machinery and transport equipment (SITC section 7), 25.4 percent of manufactured goods classified chiefly by material (SITC section 6) and 14.6 percent of chemicals and related products, n.e.s. (SITC section 5) (see table 2). From 2007 to 2009, top imported products were petroleum oils, other than crude (HS code 2710), flat-rolled products of iron or non-alloy steel (HS code 7208) and gold (including gold plated with platinum) (HS code 7108) and (see table 5).

Overview:

After a peak of 7.6 bln US\$ in 2008, the value of the exports of Yemen dropped by 17.5 percent in 2009 to 6.3 bln US\$ (see table 1 and graph 1). Imports showed a similar development with a decline by 12.9 percent in 2009 to 9.2 bln US\$ (see table 2 and graph 1). The trade balance recorded a deficit of 2.9 bln US\$ in 2009, slightly below the deficit in 2008 of 3.0 bln US\$ (see graph 1). By MDG regions, trade recorded deficits with Developed Europe (-1.7 bln US\$), Western Asia (-1.6 bln US\$) and Developed North America (-0.6 bln US\$) (see graph 2). However, surpluses were recorded with South-eastern Asia (+1.0 bln US\$), Southern Asia (+0.8 bln US\$) and Eastern Asia (+0.5 bln US\$) among others. Compared to exports, imports were more diversified across partners: 6 major partners accounted for 80 percent of exports compared to 19 major partners for imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2009, exports of mineral fuels, lubricants and related materials (SITC section 3), which accounted for 89.5 percent of Yemen's exports, dropped by 16.8 percent. Other major commodity groups included food, live animals, beverages and tobacco (SITC sections 0+1) and machinery and transport equipment (SITC section 7), which accounted respectively for 5.8 and 2.3 percent of exports and declined by 4.2 and 57.9 percent in 2009. Top markets for exports in 2009 were China, India and Thailand (see table 4). From 2007 to 2009, major exported products were petroleum oils, crude (HS code 2709), petroleum oils, other than crude (HS code 2710) and oils and other products of high temperature coal tar (HS code 2707) (see table 3).

Imports Profile:

Yemen's imports of food, live animals, beverages and tobacco (SITC sections 0+1) decreased slightly by 0.4 and accounted for 26.5 percent of imported goods. Other major commodity groups included machinery and transport equipment (SITC section 7) and mineral fuels, lubricants and related materials (SITC section 3); they accounted respectively for 23.4 and 20.9 percent of imports. From 2007 to 2009, top products for imports were petroleum oils, other than crude (HS code 2710), wheat and meslin (HS code 1001) and motor cars and other motor vehicles principally designed for the transport (HS code 8703) (see table 5).

Overview:

After several years of continuous growth marked by a peak of 5.1 bln US\$ in 2008, the value of the exports of Zambia dropped in 2009 (by 15.4 percent) but increased again in 2010 by 67.0 percent to amount to 7.2 bln US\$, well above its 2008 level (see table 1 and graph 1). Imports showed a similar development with an increase by 40.3 percent to 5.3 bln US\$ in 2010 (see table 2 and graph 1). This resulted in a trade surplus of 1.9 bln US\$ in 2010, much higher than the 2009 surplus of 0.5 bln US\$ (see graph 1). By MDG region, trade recorded deficits with Sub-Saharan Africa (-2.0 bln US\$), Western Asia (-0.4 bln US\$) and Southern Asia (-0.1 bln US\$) while Developed Europe and Eastern Asia recorded surpluses, respectively 3.5 bln and 1.1 bln US\$ (see graph 2). Zambia's trade was relatively concentrated among a few partners: respectively 3 and 7 major partners accounted for 80 percent of exports and imports (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

In 2010, exports of manufactured goods classified chiefly by material (SITC section 6), the largest commodity group for exports, increased by 87.5 percent and represented 80.0 percent of exported goods (see table 1). Exports of inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4), the other major commodity group for exports, also increased by 6.4 percent and represented 8.7 percent of exports in 2010. Switzerland, the top partner for exports, accounted for a large share (51.0 percent) of total exports in 2010 (see table 4). Other major partners for exports included China and South Africa. Over the last three years, copper products were the top commodities for exports (see table 3). These are refined copper and copper alloys, unwrought (HS code 7403), copper plates, sheets and strip, of a thickness exceeding 0.15 mm (HS code 7409) and copper ores and concentrates (HS code 2603). They accounted respectively for 63.6, 9.5 and 3.3 percent of exports in 2010.

Imports Profile:

In 2010, imports of machinery and transport equipment (SITC section 7) increased by 40.8 percent and accounted for 28.7 percent of imported goods (see table 2). Other major commodity groups for imports included inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC section 2+4) and chemicals and related products, n.e.s. (SITC section 5) respectively with 18.5 and 17.4 percent of imports. From 2008 to 2010, major imported products were petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), copper ores and concentrates (HS code 2603) and refined copper and copper alloys, unwrought (HS code 7403) (see table 5).

Overview:

After a peak of 6.4 bln US\$ in 2006, the value of the exports of Zimbabwe dropped below 2.0 bln US\$ in 2008 before bouncing back, with an increase of 33.9 percent, to reach 2.3 bln US\$ in 2009 (see table 1 and graph 1). In 2009, imports increased by 24.5 percent and amounted to 3.5 bln US\$ (see table 2 and graph 1). The trade deficit stood at 1.3 bln US\$ in 2009, close to its 2008 level (see graph 1). By MDG regions, large deficits were recorded with Sub-Saharan Africa (-1.1 bln US\$), Developed North America (-274 mln US\$) and Western Asia (-84 mln US\$) (see graph 2). However, trade recorded a surplus amounting to 340.0 mln US\$ with Developed Europe. Zimbabwe's trade was concentrated among a few partners: in 2009, 7 (respectively 5) major partners accounted for 80 percent of exports (respectively imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

**Exports Profile:**

There was an increase in trade in most of the major commodity groups for exports in 2009 (see table 1). Exports of inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4), which accounted for 42.5 percent of exports, increased by 55.4 percent. Other major commodity groups included miscellaneous manufactured articles (SITC section 8) (21.7 percent) and food, live animals, beverages and tobacco (SITC sections 0+1) (17.4 percent): they increased respectively by 76.7 and 39.4 percent in 2009. Major partners for exports included South Africa, Netherlands and Switzerland (see table 4). Exports to these partners were largely inedible crude materials (except fuels), animal and vegetable oils, fats and waxes (SITC sections 2+4). From 2007 to 2009, top exported products were unused postage, revenue or similar stamps of current or new issue (HS code 4907), cut flowers and flower buds of a kind suitable for bouquets (HS code 0603) and nickel mattes, nickel oxide sinters and other intermediate products (HS code 7501) (see table 3).

Imports Profile:

In 2009, Zimbabwe's imports were composed of 31.1 percent of machinery and transport equipment (SITC section 7), 19.1 percent of food, live animals, beverages and tobacco (SITC sections 0+1) and 12.9 percent of mineral fuels, lubricants and related materials (SITC section 3) (see table 2). From 2007 to 2009, top imported products were petroleum oils, other than crude (HS code 2710), motor vehicles for the transport of goods (HS code 8704) and maize (corn) (HS code 1005) (see table 5).

European Union (27 member states)

Imports: CIF, by origin

Exports: FOB, by last known destination

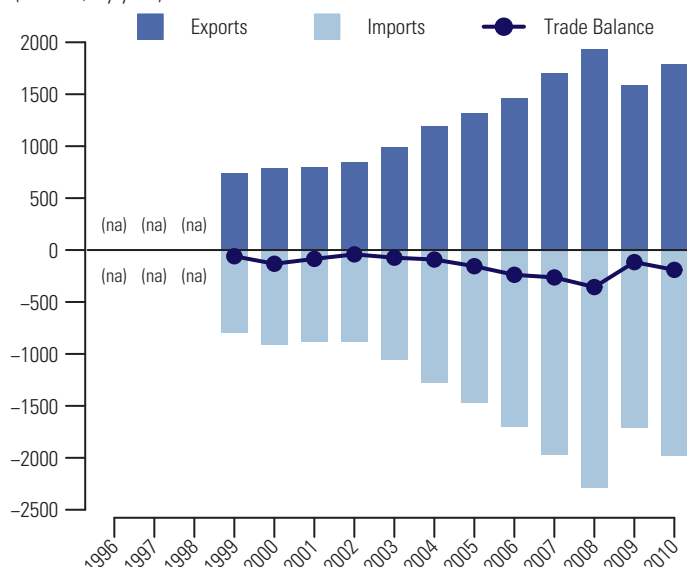

Trade System: Special

Overview:

After several years of continuous growth marked by a peak of 1,928.6 bln US\$ in 2008, the value of the exports of the EU-27 dropped in 2009 (by 17.6 percent) but increased again in 2010 by 12.4 percent to amount to 1,784.9 bln US\$, still well below its 2008 level (see table 1 and graph 1). Imports showed a similar development with an increase by 15.9 percent to 1,975.7 bln US\$ in 2010 (see table 2 and graph 1). This resulted in a trade deficit of 190.8 bln US\$ in 2010, higher than the 2009 deficit of 116.1 bln US\$ (see graph 1). In 2010, trade with Eastern Asia and Commonwealth of Independent States recorded deficits respectively of 228.8 and 95.8 bln US\$ (see graph 2). The trade balance recorded surpluses with Developed North America (+106.4 bln US\$) and Western Asia (+77.0 bln US\$). By partners, both exports and imports were diversified: in 2010, 25 major partners accounted for 80 percent of exports (compared to 21 major partners for imports) (see graph 3).

Graph 1: Total imports, exports and trade balance

(Bln US\$ by year)

Exports Profile:

Machinery and transport equipment (SITC section 7) accounted for 42.1 percent of EU-27's exports (see table 1). Other major commodity groups for exports included chemicals and related products, n.e.s. (SITC section 5), manufactured goods classified chiefly by material (SITC section 6) and miscellaneous manufactured articles (SITC section 8): they accounted respectively for 16.8, 12.5 and 10.2 percent of exported goods. Main destinations for exports included USA, China and Switzerland (see table 4). Over the last three years, top exported products were motor cars and other motor vehicles principally designed for the transport (HS code 8703), medicaments (excluding goods of heading 30.02, 30.05 or 30.06) (HS code 3004) and petroleum oils, other than crude (HS code 2710) (see table 3).

Imports Profile:

In 2010, machinery and transport equipment (SITC section 7) were the largest commodity group accounting for 29.7 percent of imported goods (see table 2). Other major commodities were mineral fuels, lubricants and related materials (SITC section 3) and miscellaneous manufactured articles (SITC section 8) respectively with 23.3 and 13.5 percent of total imports. Over the last three years, top imported products were petroleum products: petroleum oils and oils obtained from bituminous minerals, crude (HS code 2709), petroleum gases and other gaseous hydrocarbons (HS code 2711) and petroleum oils, other than crude (HS code 2710) (see table 5).
